## FOREWORD

The Hellenic Statistical Authority (ELSTAT) through the quarterly publication Greece in figures, published in both the Greek and English languages, presents statistical data providing an updated demographic, social and economic picture of Greece in a clear and comprehensive manner.

The publication Greece in figures is intended for users of statistics who seek to have a comprehensive view of Greece, on the basis of the most recent statistical data. The statistical time series included in this publication are, mostly, compiled by ELSTAT. Furthermore, for comparability reasons, the publication also presents, by theme, selected tables with statistical data of EU Member States.
The publication will be updated with the most recent data on a quarterly basis and will be posted on the portal of ELSTAT on the first Wednesday of January, April, July and October.

For more information on the data and statistics provided in Greece in figures, please contact the Division of Statistical Information and Publications of ELSTAT (tel: +30 213 1352301, +30 213 1352021, e-mail: data.dissem@statistics.gr). We welcome any suggestions and recommendations on the content of the publication.

(1) General Government primary balance is defined here as General Government balance (according to ESA 2010) minus interest expenditure of General Government entities to other sectors. The effect of support to financial institutions is included in this measure of the primary balance. The measure of the primary balance presented here differs from the definition of primary balance used under the Economic Adjustment Programme for Greece.
(2) Debt as defined in the Maastricht Treaty.
(3) Includes debt reduction under the private sector involvement (PSI) initiative.

(4) For the years 2009, 2010 and 2011, the impact of the support to financial institutions has been positive for the General Government balance. This is due to the fees accruing on the inter-bank lending guarantees and the bond loan scheme and the revenues from bank preference shares, being greater than the expenditures accrued. For the remaining years, the expenditures of the support were larger than the related revenues.
(5) The support to the financial institutions includes the on-going revenues and expenditures associated with interventions starting from 2008, in addition to new revenues and expenditures that arose during the years 2011 to 2013 for the banks' resolution and the recapitalisation of the four core banks

* $=$ Provisional data.
(1) General Government primary balance is defined here as General Government balance (according to ESA 2010) minus interest expenditure of General Government entities to other sectors. The effect of support to financial institutions is included in this measure of the primary balance. The measure of the primary balance presented here differs from the definition of primary balance used under the Economic Adjustment Programme for Greece.

(2) Debt as defined in the Maastricht Treaty.
(3) For the four quarters of 2014 and the first and third quarter of 2015, the impact of the support to financial institutions has been positive for the General Government balance. This is due to the fees accruing on the inter-bank lending guarantees and the bond loan scheme and the revenues from bank preference shares, being greater than the expenditures accrued. For the remaining quarters, the expenditures of the support were larger than the related revenues.

(1) As of June 2010, securitised assets are no longer derecognised from the Balance Sheet of banks that have adopted the International Accounting Standards. The counterpart of these assets is recorded on the liabilities side as "deposit liabilities to non-euro area residents"
(2) In August 2011 domestic credit institutions registered a reduction in the value of their portfolio of Greek Government securities amounting to EUR 4 billion because of their participation in the securities exchange programme agreed by the EU Summit of 21st July 2011. In January 2012 credit institutions registered a further reduction in the value of this portfolio amounting to EUR 5.8 billion, in March 2012 a reduction of EUR 15.2 billion and in April 2012 a reduction of EUR 4.1 billion.
(3) Revised data: as of June 2010 for OMFIs and as of June 2015 for the Bank of Greece, "capital and reserves" includes current year results and valuation adjustments. The revision was triggered by a recommendation of the relevant Eurosystem Working Group.

(1) Any kind of extraction of energy products from natural sources to a usable form is called primary production. Primary production takes place when the natural sources are exploited, for example in coal mines, crude oil fields, hydro power plants or fabrication of biofuels. Transformation of energy from one form to another, like electricity or heat generation in thermal power plants or coke production in coke ovens is not primary production.

General remark: Wherever necessary, the data have been rounded up, thus, a slight difference may occur between the sum of the figures and their total.
(1) The data of the Intra-EU trade are adjusted to the total trade with EU countries from the year 2004 onwards. The "incomplete customs declarations" are incorporated in the trade data with third countries and, after having been completed, they will be replaced by the final data.
(2) International Trade in Goods Statistics have been revised for the period 2002-2014. The revision of the relevant data series resulted from the integration of additional data transmitted recently from administrative sources.
