

HELLENIC STATISTICAL AUTHORITY GREECE IN FIGURES

July - September 2017

FOREWORD

The Hellenic Statistical Authority (ELSTAT) through the quarterly publication **Greece in figures**, published in both the Greek and English languages, presents statistical data providing an updated demographic, social and economic picture of Greece in a clear and comprehensive manner.

The publication **Greece in figures** is intended for users of statistics who seek to have a comprehensive view of Greece, on the basis of the most recent statistical data. The statistical time series included in this publication are, mostly, compiled by ELSTAT. Furthermore, for comparability reasons, the publication also presents, by theme, selected tables with statistical data of EU Member States.

The publication will be updated with the most recent data on a quarterly basis and will be posted on the portal of ELSTAT on the first Wednesday of January, April, July and October.

For more information on the data and statistics provided in **Greece in figures**, please contact the Division of Statistical Information and Publications of ELSTAT (tel: +30 213 1352301, +30 213 1352021, e-mail: data.dissem@statistics.gr). We welcome any suggestions and recommendations on the content of the publication.

 Age dependency ratio: The ratio of the number of economically non-active persons (aged 0 - 14 and 65+) compared with the number of economically active persons (aged 15 - 64).

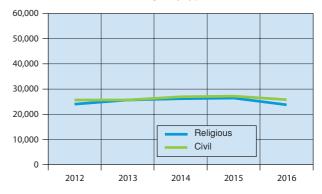

Ageing ratio: The number of persons aged 60 years or over per hundred persons under the age of 15.

Total fertility rate: The average number of living children that a woman will give birth to over the course of her lifetime (provided that during her reproductive age, the fertility conditions prevail by age of the reference year). The total fertility rate is used in order to determine the level of replacement of the generations, which, in developed countries is considered to be 2.1. Total mortality rate: The number of deaths per 1,000 people.

Infant mortality rate: The number of children dying at less than a year of age divided by the number of live births that year. The ratio is expressed by 1,000 live births.

(4) For the years 2010, 2011 and 2014 the impact of the support to financial institutions has been positive for the General Government balance. This is due to the fees accruing on the inter-bank lending guarantees and the bond loan scheme and the revenues from bank preference shares, being greater than the expenditures accrued. For the remaining years, the expenditures of the support were larger than the related revenues.

NOTE: The compilation of imports and exports of goods is based on ELSTAT's trade statistics instead of the settlements data formerly used.

(1) (+) increase (-) decrease

According to the new BPM6, an increase /decrease of assets receives a positive/negative sign and an increase/decrease of liabilities receives a positive/negative sign.

(2) (+) increase (-) decrease

According to the new BPM6, an increase /decrease of reserve assets receives a positive/negative sign.

(3) Reserve assets, as defined by the ECB, only include monetary gold, the reserve position at the IMF, Special Drawing Rights, and the Bank of Greece's claims in foreign currency on residents of countries outside the euro area. Conversely, reserve assets do not include claims in euro on residents of countries outside the euro area, claims in foreign currency and in euro on residents of euro area countries, and the Bank of Greece's participation in the capital and the reserve assets of the ECB.

(1) Any kind of extraction of energy products from natural sources to a usable form is called primary production. Primary production takes place when the natural sources are exploited, for example in coal mines, crude oil fields, hydro power plants or fabrication of biofuels. Transformation of energy from one form to another, like electricity or heat generation in thermal power plants or coke production in coke ovens is not primary production.

General remark: Wherever necessary, the data have been rounded up, thus, a slight difference may occur between the sum of the figures and their total.

(1) The data of the Intra-EU trade are adjusted to the total trade with EU countries from the year 2004 onwards. The "incomplete customs declarations" are incorporated in the trade data with third countries and, after having been completed, they will be replaced by the final data.

(2) International Trade in Goods Statistics have been revised for the period 2002 - 2014. The revision of the relevant data series resulted from the integration of additional data transmitted recently from administrative sources.

Crime statistics refer to offences committed during the year, either misdemeanors or felonies (prosecuted "ex proprio motu" or upon indictment) for which the Regional Departments of the Hellenic Police have conducted a preliminary investigation or submitted a lawsuit or indictment against the relevant offenders (principal perpetrators or accomplices). In the case of multiple offences, all the offences are stated separately and in the case of accomplices, abettors, etc. all those who participated in the offence are stated separately.

- (1) The number of offences committed refer to felonies and misdemeanor crimes, completed and attempts thereof.
- (2) The ratio is estimated on the basis of the estimated population on the 30th June of the relevant year.
- (3) The total number of offenders includes the offenders who were identified in the month when the offence was registered and the offenders who were unkown during the same month and who were identified later during the year, principal offenders and accomplices, arrested or not.
