PRESS RELEASE

QUARTERLY NATIONAL ACCOUNTS: 2nd Quarter 2017 (Provisional data)

The Hellenic Statistical Authority (ELSTAT) announces the Gross Domestic Product (GDP) for the 2nd quarter of 2017 (provisional data).

- The available **seasonally adjusted data**¹ indicate that in the 2nd quarter of 2017 the Gross Domestic Product (GDP) in volume terms increased by 0.5% in comparison with the 1st quarter of 2017, while in comparison with the 2nd quarter of 2016, it increased by 0.8% (Table 1).
- The available **non-seasonally adjusted data** indicate that in the 2nd quarter of 2017 the Gross Domestic Product (GDP) in volume² terms increased by 0.7% in comparison with the 2nd quarter of 2016 (Table 2).
- It is noted that GDP for the first quarter of 2017 was revised on account of updated General Government data and Short-Term Indices data.
- Users should note that the seasonally adjusted figures are recalculated every time a new quarter is added in the time series; therefore the seasonal adjusted data are revised every quarter.
- In tables 3-9 are presented levels and rates of GDP and components, with and without seasonal adjustment.

EXPLANATORY NOTES

Generally	Quarterly national accounts (QNA) are an integrated system of macroeconomic indicators which provide a complete picture of the economic status and are used mainly for purposes of economic analysis, forecasting, decision making and policy design. The main variables are the following: Gross Domestic Product (GDP), Gross Value Added, Final consumption expenditure, Gross fixed capital formation, Imports and Exports of goods and services, Compensation of employees, Employment.
Legal basis	The QNA are compiled in accordance with the European System of Accounts ESA 2010 of the Council Regulation (EU) No 549/2013 of the European Parliament and of the Council of 21 May 2013.
Reference period	The accounting period is the quarter.
Geographical coverage	The whole Greek territory.
Unit of measure	The economic data are published in million euros. QNA aggregates are compiled at current prices. previous year prices and chained-linked volumes (reference year :2010)
Revision	<p>The revision policy of national accounts data is defined as follows:</p> <p>45 calendar days after the end of the reference quarter, the first estimation for the quarter is calculated as well as possible revisions of previous quarters.</p> <p>60 calendar days after the end of reference quarter, the second estimation of the quarter is calculated.</p> <p>Additionally, when annual national accounts' data are revised, the respective quarterly data are also revised, in order to ensure their internal coherence.</p>
Statistical classification	The standard followed is the European System of Accounts (ESA 2010). Breakdowns exist for variables by economic activity and type of non-financial asset. The classification NACE Rev2 is applied for the breakdown of economic activities.
Adjustments	QNA are compiled both in raw and seasonally adjusted form. Seasonal adjustments are carried out using JDemetra+ software with Greek calendar regressors. The seasonal adjustments (including calendar adjustment where relevant) are performed applying TRAMO/SEATS method.
Publication of data	The QNA data are published twice for the reference quarter. The first publication is at 45 days (flash estimates) and the second (provisional data) at about 60 days after the end of the reference quarter. The first publication involves only the GDP while the second publication includes GDP and components.
