² The variation of the index is due to seasonality and to the payment of bonuses. During the 4th quarter (Q4) the 14th salary is paid alongside bonuses, thus resulting in an increase in the index.

EXPLANATORY NOTES

General	The Index of Wages Cost for Sections B-S of NACE Rev. 2 is a Laspeyres quarterly index with base year the year 2012 (2012=100.00).
Purpose of the index	The purpose of this index is to record the evolution of the hourly labour costs by branch of economic activity (Sections B-S of the European classification of economic activities, NACE Rev. 2).
Definitions	<p>The Index of Wages Cost for each Section of NACE Rev. 2 is calculated as the ratio of the hourly wage of each reference quarter to the annual average hourly wage of the base year 2012.</p> <p>The hourly wage is defined as the ratio of the gross earnings to the hours worked.</p> <p>Gross earnings include salaries and wages (regular payments and overtime payments), bonuses and extraordinary bonuses (Christmas and Easter bonuses, annual leave and other kind of bonuses not paid on a regular basis), as well as payments for days not worked (e.g. holidays, national holidays, maternity leave, child benefits, severance payments until the 4th quarter of 2012, etc).</p> <p>From the 1st quarter of 2013 and thereafter the severance payments are not included in the gross earnings.</p> <p>For the calculation of the quarterly aggregate Labour Cost Index (LCI) of a group of Sections, the LCI of each Section is weighted on the basis of the contribution of the annual labour cost of employees of this section in the previous year to the total labour cost of employees of all sections of the group in the above year.</p>
Legal Framework	<p>The Index of Wages Cost for the sections B-S is one of the main components of the LCI and it is compiled by virtue of Regulation (EC) 450/2003 and the Implementing Regulation (EC) No 1216/2003 of the European Parliament and of the Council.</p> <p>The Index of Wages Cost is also made available to and released by international organizations (EUROSTAT, IMF).</p>
Coverage	Whole of Greece.
Statistical Classification	NACE Rev. 2 classification of economic activities is used. The Sections covered by the index are B to S.
