

STATISTICAL SURVEY/WORK

Annual survey on mines, quarries and salterns

DESCRIPTION

Annual survey covering the Divisions 10-14 of NACE Rev.1.1 (extraction and quarrying of energy materials). The survey unit is the metal mining or quarrying establishment. The main scope of the survey is the collection of data referring to basic economic figures as well as the definition of the sector's percentage of participation to the national income.

TYPE

Census survey for all classes of NACE Rev.1.1, with the exception of establishments that engage less than 10 persons and belong to classes 14.11 (marble and other stone quarries used in building) and 14.21 (gravel and sand quarries, extraction or surface collection of sand), that are surveyed on a sample basis.

The sampling method used is the single stratified random sampling. The establishments surveyed on a sample basis are stratified as following:

- I) Stratum 1: 1-4 employees,
- II) Stratum 2: 5-9 employees.

The sampling fraction is about 27%

LOWER LEVEL OF ANALYSIS

1.Geographical

NUTSII (13 Administrative Regions of Greece)

2.Statistical code

4digit NACE Rev.1.1

FREQUENCY

Annual

VARIABLES

- 1.Employment and remunerations, 2.Income and expenses of the enterprises by kind,
- 3.Investments, 4.Gross production and value added.

AVAILABILITY OF RESULTS

18 months after the reference year

LEGAL BASIS

- D.L. 3627/1956 (concerning the role of National Statistical Service of Greece)
