

PRESS RELEASE

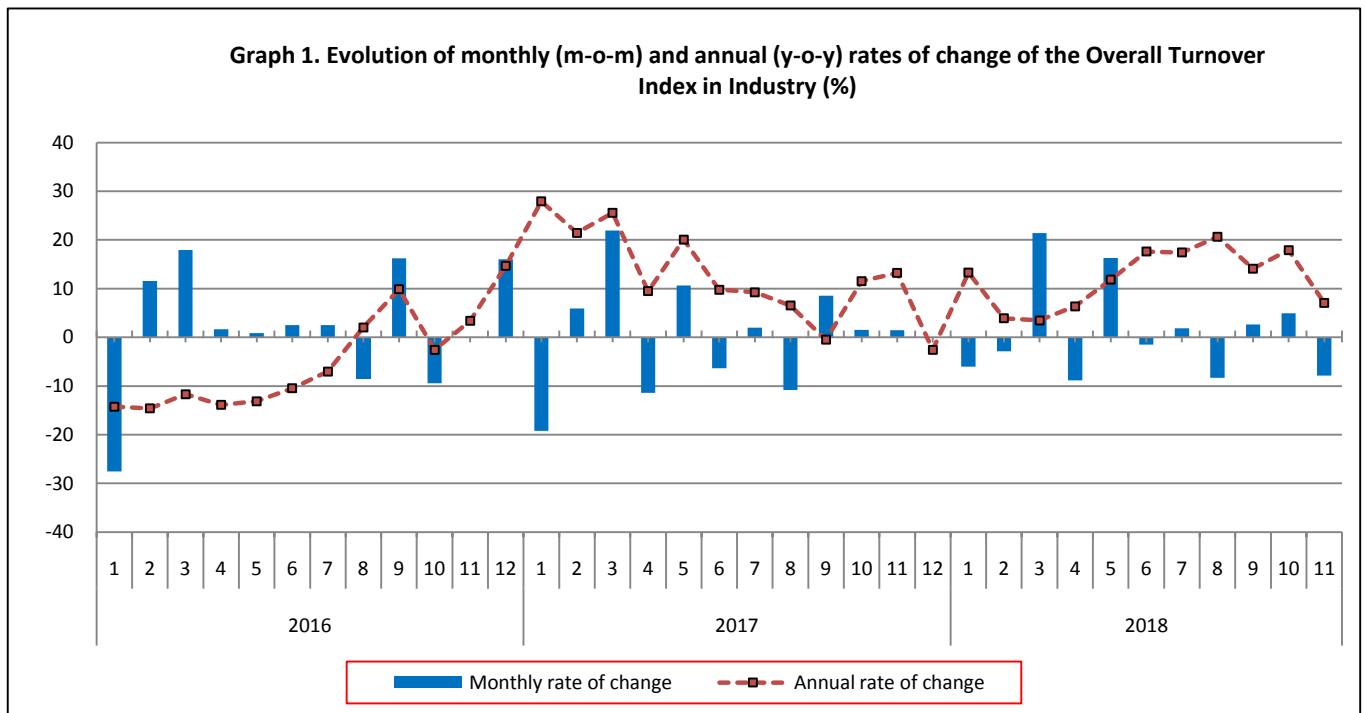

TURNOVER INDEX IN INDUSTRY: November 2018, y-o-y increase of 7.0%

The evolution of the Turnover Index in Industry with base year 2010=100.0 for November 2018, on the basis of provisional data, is as follows:

The Overall Turnover Index in Industry (both domestic and non-domestic market) in November 2018 recorded an increase of 7.0% compared with the corresponding index of November 2017. In November 2017, the corresponding annual rate of change of the Overall Turnover Index in Industry was 13.2% (Table 1).

The Overall Turnover Index in Industry in November 2018, compared with October 2018, recorded a decrease of 7.9% (Table 6).

The average Overall Turnover Index in Industry for the 12-month period from December 2017 to November 2018 increased by 10.8%, compared with the corresponding index of the 12-month period from December 2016 to November 2017. In November 2017, the corresponding annual rate of change of the Overall Turnover Index in Industry was 13.5% (Table 13).

Evolution of the Overall Turnover Index in Industry

I. Annual changes of the Overall Turnover Index in Industry: November 2018/November 2017

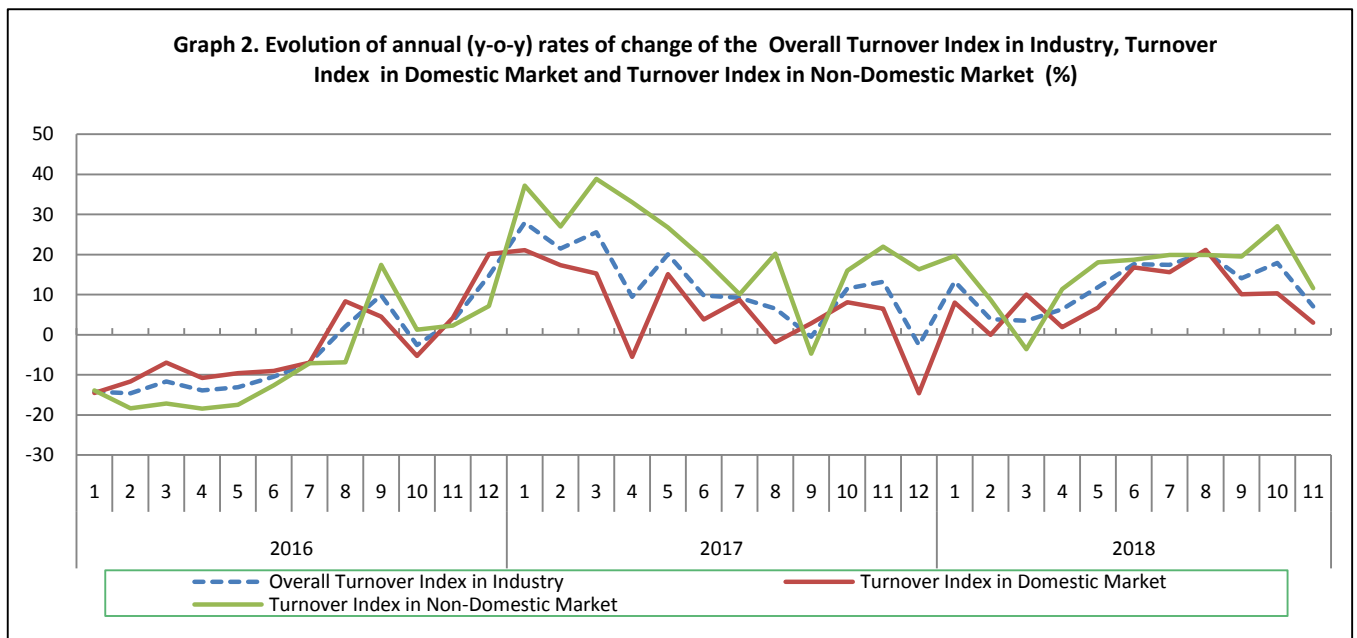

The 7.0% increase in the Overall Turnover Index in Industry in November 2018, compared with the corresponding index in November 2017, was due to the following:

1. Changes in the sub-indices of the industrial sections (Table 1):

- The Turnover Index in Mining and quarrying increased by 4.6%. The increase was the result of the annual changes of the sub-indices in the following 2-digit divisions: mining of coal and lignite, mining of metal ores.
- The Turnover Index in Manufacturing increased by 7.1%. The increase was the result of the annual changes of the sub-indices in the following 2-digit divisions: tobacco products, coke and refined petroleum products, chemicals and chemical products, basic pharmaceutical products and pharmaceutical preparations, fabricated metal products.

2. Changes in the sub-indices of the domestic and non-domestic market:

- The Turnover Index in Industry for the domestic market increased by 3.0% (Table 2).
- The Turnover Index in Industry for the non-domestic market increased by 11.6% (Table 3).

II. Annual changes of the Turnover Index in Industry in the Domestic Market: November 2018/November 2017

The 3.0% increase of the Turnover Index in Industry for the domestic market in November 2018, compared with November 2017, is due to the following annual changes in the sub-indices of the following industrial sections (Table 2):

- The Turnover Index in Mining and quarrying increased by 9.3%. The increase was the result of the annual changes of the sub-indices in the following 2-digit divisions: mining of coal and lignite, other mining and quarrying products.
- The Turnover Index in Manufacturing increased by 3.0%. The increase was the result of the annual changes of the sub-indices in the following 2-digit divisions: tobacco products, chemicals and chemical products, fabricated metal products, computers, electronic and optical products, electrical equipment.

III. Annual changes of the Turnover Index in Industry in the Non-Domestic Market: November 2018/November 2017

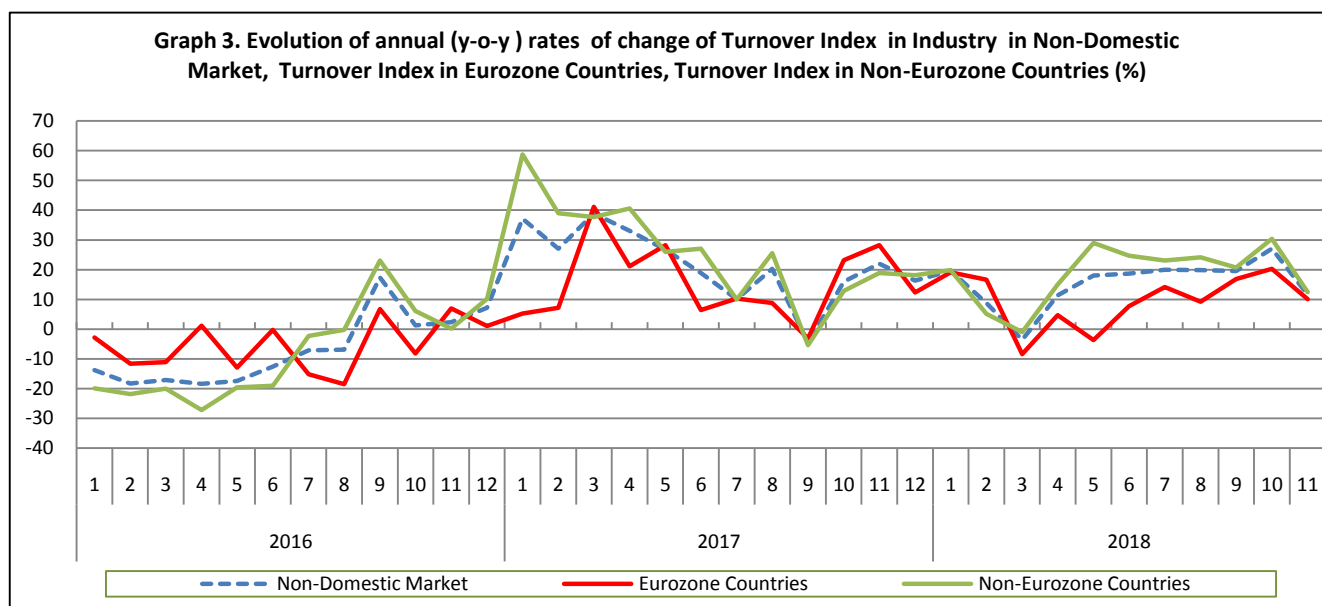

The 11.6% increase of the Turnover Index in Industry for the Non-Domestic market in November 2018, compared with November 2017, was due to the following:

1. Changes in the sub-indices of the industrial sections (Table 3):

- The Turnover Index in Mining and quarrying increased by 1.9%. The increase was the result of the annual change of the sub-index in the 2-digit division mining of metal ores.
- The Turnover Index in Manufacturing increased by 11.9%. The increase was the result of the annual changes of the sub-indices in the following 2-digit divisions: tobacco products, coke and refined petroleum products, chemicals and chemical products, basic metals.

2. Changes in the sub-indices for Eurozone and Non-Eurozone countries:

- The Turnover Index in Industry for Eurozone countries increased by 10.1% (Table 4).
- The Turnover Index in Industry for non-Eurozone countries increased by 12.4% (Table 5).

IV. Monthly changes of the Overall Turnover Index in Industry: November 2018/ October 2018

The 7.9% decrease of the Overall Turnover Index in Industry in November 2018, compared with the corresponding index in October 2018, was due to the following:

1. Changes in the sub-indices of industrial sections (Table 6):

- The Turnover Index in Manufacturing decreased by 8.0%.
- The Turnover Index in Mining and quarrying increased by 1.8%.

2. Changes in the sub-indices of the domestic and non-domestic market:

- The Turnover Index in Industry for the domestic market decreased by 7.6% (Table 7).
- The Turnover Index in Industry for the non-domestic market decreased by 8.2% (Table 8).

Note: The indices and the percentage changes are rounded up to two and one decimal figures, respectively, when published.

METHODOLOGICAL NOTES

Generally	The Turnover Index is compiled since January 2006.
Purpose of the index	The purpose of this index is to measure the monthly activity of the industrial sector in terms of value. Turnover comprises the totals invoiced (without VAT) by the observation units during the reference period and corresponds to the market sales of goods or services supplied to third parties. The purposes and the characteristics of the Turnover Index apply, as well, to the indices for the distinction between domestic and non-domestic turnover.
Legal basis	The compilation and publication of the Turnover Index is based on the framework of requirements of Council Regulation (EC) No 1165/98 concerning short-term statistics (STS-R), as well as Regulation (EC) No 1158/05 of the European Parliament and Council amending Council Regulation (EC) No 1165/98. Furthermore, this index is governed by Regulation (EC) No 1893/2006 of the European Parliament and of the Council, by Commission Regulation (EC) No 656/2007 and by Regulation (EC) No 451/2008 of the Council.
Reference period	Month.
Base year	2010=100.0.
Revision	The latest revision of the Turnover Index in Industry (base year 2010=100.0) took place in the framework of Council Regulation (EC) No 1165/98 concerning short-term statistics. In accordance with this regulation the index is revised every five years, in years ending in 0 or 5.
Statistical classifications	At the level of categories of economic activities, the classification of NACE Rev. 2 was used (Regulation No 1893/2006), while at the level of main industrial groups, the allocation of two-digit and three-digit NACE Rev. 2 headings to categories of aggregate classification was used, in accordance with Commission Regulation No 656/2007. At product level, the Eurostat classification CPA 2008 was used, pursuant to Council Regulation No 451/2008.
Geographical coverage	The Index covers the whole Country.
Coverage of economic activities	The Turnover Index in Industry covers the whole country and is compiled for all activities listed in Sections C (mining and quarrying) and D (manufacturing) of the NACE Rev.2 classification.
Computation of the Index	The Turnover Index in Industry is a fixed base index. This index is calculated at a first stage at the four-digit level of economic activity and subsequently, with the implementation of appropriate weighting coefficients, the index is calculated at higher levels (three-level, two-level and one-level of economic activity) or at the level of Main Industrial Groupings (MIGs).
Publication of data	The Turnover Index in Industry (2010=100.0) is released since November 2014 with September 2014 as first reference month. Data with base year 2010=100.0 are available from January 2000 onwards.
References	More information about the methodology concerning the compilation and calculation of the index and for the time series is available on the website of the Hellenic Statistical Authority (ELSTAT) (http://www.statistics.gr/en/statistics/-/publication/DKT24/).
