PRESS RELEASE

SUPPLY & USE TABLES AND SYMMETRIC INPUT – OUTPUT TABLE Year 2015

The Hellenic Statistical Authority (ELSTAT) announces the Supply and Use and the Symmetric Input – Output Table, for the year 2015. These tables are compiled according to the European System of Accounts ESA 2010 (Regulation (EU) No 549/2013 of the European Parliament and of the Council) and are consistent with the respective annual national figures.

Supply, Use and Input-Output tables provide detailed information for a given year on production activities, the supply and demand of goods and services, intermediate consumption, primary inputs and foreign trade.

Supply and Use tables are matrices by product and industry showing the production processes and transactions for particular products or industries.

Symmetric Input-Output tables are product-by-product or industry-by-industry matrices combining both Supply and Use into a single table with identical classification of products or industries, applied to both rows and columns.

These tables present:

- a) the structure of the costs of production and the value added that is generated in the production process;
- b) the flows of goods and services produced in the Greek territory; and
- c) the flows of goods and services with the rest of the world.

For the compilation of Supply-Use and Input-Output tables data are used from the tables compiled by the National Accounts Division of ELSTAT for the calculation of Gross Domestic Product and the other macroeconomic variables.

The data sources used concern mainly:

- Surveys carried out by ELSTAT, like Structural Business Surveys (SBS), Household Budget Survey, Foreign Trade Statistics, Labor Force Survey, Labor Cost Survey, the census of population and buildings, Short Term Indicators for the volume and the prices etc.
- Data from the business register of ELSTAT
- Administrative sources, like the State Budget Outturn etc.
- Balance of Payments data from the Bank of Greece
- Other sources, like financial data of enterprises etc.

The data are presented using NACE Rev. 2 in 64 sectors and activities under the CPA 2008 to 64 products.

The figures in the Supply and Use Tables and in the Symmetric Input – Output Table are in current prices and the figures in the Symmetric Input – Output Table are in basic prices of the reference year.

The Supply and Use Tables and Symmetric Input – Output Table are available on ELSTAT portal at the following link:
