# PRESS RELEASE ANNUAL AGRICULTURAL STATISTICAL SURVEY: 2017

The Hellenic Statistical Authority (ELSTAT) announces the results of the 2017 Annual Agricultural Statistical Survey.

# A. CULTIVATED AREAS

The **total utilized agricultural area** (arable land, crops under vegetables, permanent crops and fallow land) in 2017 amounted to 32,209.0 thousand stremmas.

Cultivated areas by main crop type and by year as presented in Table 1 and Graph 1, are distributed as follows:

- in 2017, 53.3% of the cultivated area (17,201.3 thousand stremmas) was used for arable farming (net area), 2.0% (633.1 thousand stremmas) was used for vegetables (net area), 33.7% (10,826.9 thousand stremmas) for permanent crops and 11.0% (3,547.6 thousand stremmas) was fallow land,
- in 2016, 53.5% of the cultivated area (17,240.4 thousand stremmas) was used for arable farming (net area), 2.0% (634.3 thousand stremmas) was used for vegetables (net area), 33.6% (10,852.0 thousand stremmas) for permanent crops and 10.9% (3,529.6 thousand stremmas) was fallow land.

Table 1. Areas under cultivation by type of crop (Greece total), 2016 – 2017 In thousand stremmas (1 stremma=0.1 ha)

| Crop type  | 2016     | 2017     | Change (%)<br>2017/2016 |
|--|----------|----------|-------------------------|
| Total cultivated agricultural area   | 32,256.3 | 32,209.0 | -0.1                    |
| Irrigated  | 12,083.0 | 12,341.6 | 2.1                     |

Graph 1. Percentage (%) distribution of the cultivated agricultural area by categories (Greece total), 2016 – 2017

The change of the most important (in terms of coverage of the total agricultural land) cultivated species, as recorded by type of crop and presented in Table 2, are the following:

- the cultivated areas under durum wheat decreased by 13.9% in 2017 compared with 2016. More specifically, the cultivated areas under durum wheat amounted to 3,365.4 thousand stremmas in 2017 and 3,907.5 thousand stremmas in 2016,
- the cultivated areas under **grain maize** decreased by 5.1% in 2017 compared with 2016. More specifically, the areas under maize amounted to 1,260.3 thousand stremmas in 2017 and 1,328.3 thousand stremmas in 2016,
- the cultivated areas under **cotton** increased by 5.6% in 2017 compared with 2016. More specifically, the areas under cotton amounted to 2,601.8 thousand stremmas in 2017 and 2,463.8 thousand stremmas in 2016,
- the cultivated areas under **vineyards** (**total**) decreased by 0.9% in 2017 compared with 2016. More specifically, the areas under vines amounted to 903.6 thousand stremmas in 2017 and 911.4 thousand stremmas in 2016,
- the cultivated areas under **orange trees** decreased by 1.0% in 2017 compared with 2016. More specifically, the areas under oranges amounted to 293.8 thousand stremmas in 2017 and 296.9 thousand stremmas in 2016,
- the cultivated areas under peach nectarine trees increased by 0.5% in 2017 compared with 2016. More specifically, the areas under peaches nectarines amounted to 399.2 thousand stremmas in 2017 and 397.3 thousand stremmas in 2016,
- the cultivated area under **olive trees (total)** decreased by 0.6% in 2017 compared with 2016. More specifically, the cultivated areas under olives for oil amounted 7,926.4 thousand stremmas in 2017 and 7,978.2 thousand stremmas in 2016.

Graph 3. Utilized agricultural land and percentage change (%), by crop category (Greece total), 2016 - 2017

# **B. PRODUCTION OF AGRICULTURAL PRODUCTS**

The major changes, in terms of volume of production of agricultural products, by group and species of products as presented in Table 3 and Graph 4 are the following:

- the production of **durum wheat** decreased by 12.6% in 2017 compared with 2016. More specifically, the production of durum wheat amounted to 989.8 thousand tonnes in 2017 and 1,131.9 thousand tonnes in 2016,
- the production of **grain maize** decreased by 2.9% in 2017 compared with 2016. More specifically, the production of grain maize amounted to 1,461.7 thousand tonnes in 2017 and 1,505.0 thousand tonnes in 2016,
- the production of **cotton** increased by 9.4% in 2017 compared to 2016. More specifically, the production of cotton amounted to 808.9 thousand tonnes in 2017 and 739.1 thousand tonnes in 2016,
- the production of **oranges** decreased by 9.7% in 2017 compared with 2016. More specifically, the production of oranges amounted to 727.5 thousand tonnes in 2017 and 805.9 thousand tonnes in 2016,
- the production of **grapes (total)** decreased by 0.8% in 2017 compared with 2016. More specifically, the production of grapes amounted to 827.5 thousand tonnes in 2017, and 833.8 thousand tonnes in 2016,
- the production of **must** decreased by 1.6% in 2017 compared with 2016. More specifically, the production of must amounted to 297.6 thousand tonnes in 2017, and 302.5 thousand tonnes in 2016,
- the production of **olives (total)** increased by 3.0% in 2017 compared with 2016. More specifically, the production of olives amounted to 2,837.8 thousand tonnes in 2017 and 2,755.5 thousand tonnes in 2016,
- the production of **olive oil** decreased by 5.0% in 2017 compared with 2016. More specifically, the production of olive oil amounted to 311.7 thousand tonnes in 2017 and 328.0 thousand tonnes in 2016.

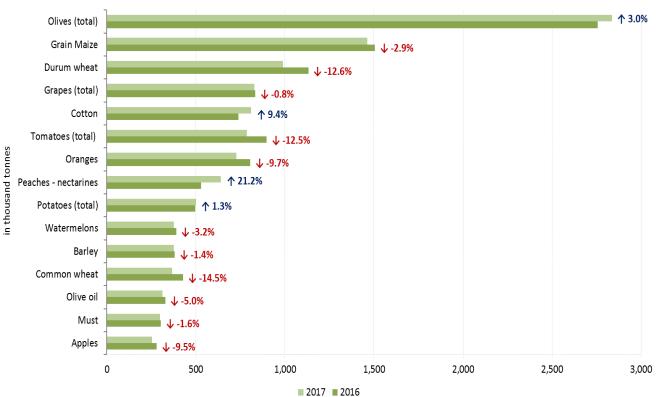

Table 3. Production of basic agricultural products (Greece total), 2016 – 2017 In thousand tonnes

| Agricultural products | 2016    | 2017    | Change (%)<br>2017/2016 |

Note: Any discrepancies in the sums and percentages are due to rounding.

Graph 4. Production and percentage change (%) of basic agricultural products, (Greece total), 2016 – 2017

# C. LIVESTOCK: NUMBER OF ANIMALS AND PRODUCTION OF LIVESTOCK PRODUCTS

# 1. Number of animals

The changes in the number of the most important animal species, as presented in Table 4 and Graph 5, are the following:

- the total number of **bovine animals** increased by 0.3% in 2017 compared with 2016. More specifically, the number of bovine animals amounted to 615,273 in 2017 and 613,390 in 2016,
- the total number of **pigs** increased by 2.7% in 2017 compared with 2016. More specifically, the number of pigs amounted to 716,856 in 2017 and 697,724 in 2016,
- the total number of **sheep** increased by 1.7% in 2017 compared with 2016. More specifically, the number of sheep amounted to 8,827,820 in 2017 and 8,680,235 in 2016,
- the total number of **goats** increased by 0.6% in 2017 compared with 2016. More specifically, the number of goats amounted to 3,998,205 in 2017 and 3,975,504 in 2016,
- the total number of **hens** increased by 4.8% in 2017 compared with 2016. More specifically, the number of hens amounted to 37,262,320 in 2017 and 35,544,837 in 2016.

# 2. Meat Production

The changes in meat production, by animal species, as presented in Table 5 and Graph 6, are the following:

- the total production of **beef** increased by 6.6% in 2017 compared with 2016. More specifically, the production of beef amounted to 41.8 thousand tonnes in 2017 and 39.2 thousand tonnes in 2016,
- the total production of **pork meat** increased by 0.8% in 2017 compared with 2016. More specifically, the production of pork meat amounted to 77.3 thousand tonnes in 2017 and 76.7 thousand tonnes in 2016,
- the total production of **sheep meat** decreased by 6.2% in 2017 compared with 2016. More specifically, the production of sheep meat amounted to 53.9 thousand tonnes in 2017 and 57.5 thousand tonnes in 2016,
- the total production of **goat meat** decreased by 13.0% in 2017 compared with 2016. More specifically, the production of goat meat amounted 21.9 thousand tonnes in 2017 and 25.2 thousand tonnes in 2016,
- the total production of **poultry meat** (except ostriches) decreased by 4.4% in 2017 compared with 2016. More specifically, the production of poultry meat amounted to 243.7 thousand tonnes in 2017 and 254.9 thousand tonnes in 2016.

Table 5. Meat production by animal species (Greece total), 2016 - 2017

In thousand tonnes

| Animal species                       | 2016  | 2017  | Change (%)<br>2017/2016 |
|--------------------------------------|-------|-------|-------------------------|

# 3. Production of livestock products

The changes in the production of the most important livestock products, in terms of volume of production, as presented in Table 6 and Graph 7, are the following:

- the total production of **milk** increased by 0.6% in 2017 compared with 2016. More specifically, the total production of milk amounted to 1,921.2 thousand tonnes in 2017 and 1,910.2 thousand tonnes in 2016,
- the production of **soft cheese** increased by 3.3% in 2017 compared with 2016. More specifically, the production of soft cheese amounted to 99.1 thousand tonnes in 2017 and 96.0 thousand tonnes in 2016,
- the production of **eggs** increased by 0.4% in 2017 compared with 2016. More specifically, the production of eggs amounted to 1,344.5 million pieces in 2017 and 1,339.0 million pieces in 2016.

Table 6. Milk production and livestock products by animal species (Greece total), 2016 – 2017 In thousand tonnes

#### D. **AGRICULTURAL MACHINERY**

The changes in the number of agricultural machinery as presented in Table 7 are as follows:

- Agricultural tractors decreased by 1.0% in 2017 compared with 2016. More specifically, the number of the agricultural tractors, which were used, amounted to 378,196 in 2017 and 382,176 in 2016,
- Sprayers decreased by 1,3% in 2017 compared with 2016. More specifically, the number of the spraying machines, which were used, amounted to 252,688 in 2017 and 256,048 in 2016,
- Irrigation systems increased by 0.0% in 2017 compared with 2016. More specifically, the number of irrigation systems, which were used, amounted to 371,197 in 2017 and 371,059 in 2016.

Table 7. Agricultural machinery (Greece total), 2016 - 2017 Number of agricultural machinery

| Type of machinery           | 2016    | 2017    | Change (%)<br>2017/2016 |
|-----------------------------|---------|---------|-------------------------|
| Agricultural tractors       | 382,176 | 378,196 | -1.0                    |
| Seeders                     | 60,961  | 60,119  | -1.4                    |
| Sprayers                    | 256,048 | 252,688 | -1.3                    |
| Threshers and harvesters    | 35,170  | 34,275  | -2.5                    |
| Irrigation pumps            | 241,589 | 239,737 | -0.8                    |
| Irrigation systems          | 371,059 | 371,197 | 0.0                     |
| Other agricultural machines | 411,713 | 412,120 | 0.1                     |

### **EXPLANATORY NOTES**

# Annual Agricultural Statistical Survey

The Hellenic Statistical Authority in cooperation with the central and regional offices of the Ministry of Rural Development and Food, the local authorities, the local government bodies, as well as with the experienced inhabitants of the rural settlements has been conducting since 1961 the Annual Statistical Survey on Agriculture and Livestock.

# Purpose of the survey

The purpose of the survey is to collect statistical data on the cultivated areas under several crops and on the production of agricultural and livestock products, as well as the agricultural machinery used. The data are necessary for drawing the agricultural policy of the country but also for covering other national and international needs and obligations.

# **Legal Framework**

The legal framework for the conduct of the annual statistical agricultural survey is the Royal Decree No 111/15-2-1962 and the Joint Ministerial Decisions No 8710/C2-1246/5-8-2010 and 2198/C2-248/24-2-2012 signed by the Minister of National Economy and the Deputy Minister of Interior, Public Administrations and Decentralization, as well as the relevant decision of the President of ELSTAT issued annually, on the approval, procurement, assignment and cost allocation on conducting the Annual Agricultural Statistical Survey and approval for using private bodies for the conduct of the survey and their remuneration.

### Reference Period

Year 2017

### **Definitions**

1 stremma = 0.1 ha

<u>Arable Crops (table 1):</u> net area of arable crops i.e. without secondary/successive crops.

<u>Irrigated arable land (table 1)</u>: includes secondary/successive arable or horticulture crops.

Arable land (table 2): includes secondary/successive crops.

Other cereals: oats, rice, rye, sorghum, meslin, millet, canary seed.

Other industrial plants: sesame, sorghum, soybeans, pumpkin seed, etc.

Horticulture land (table 1): net area of land under vegetables i.e. without secondary/successive crops.

<u>Irrigated horticulture land (table 1)</u>: includes secondary/successive horticulture (land under vegetables).

<u>Horticulture land (table 2)</u>: areas under vegetables including secondary/successive crops as well as the net areas of greenhouses, seedbeds, nurseries and ornamental plants.

Greenhouses: net areas of greenhouse flowers and vegetables.

<u>Seedbeds</u>: includes tobacco seedbeds and seedbeds for producing plantlets for transplantation.

Nurseries: areas for producing fruit and forest trees, ornamental plants and American vines.

<u>Tomatoes (total</u>): industrial tomatoes, tomato grown in the open and greenhouse tomato.

Olive trees (total area): edible and oil producing olives.

Olives (total production): edible and oil producing olives

Other citrus trees: cherry, quince, sloe, plum, kiwi and pomegranate trees.

Other nut trees: hazelnut trees and chestnut trees.

Other trees: carob, avocado, mastic, loquat, banana and other trees (palm, willow trees etc.).

Grapes (total): includes the production of wine and raisin grapes.

Agricultural tractors: Single-axle (dredgers, mowers, mini-mowers, etc.) and Biaxial tractors

<u>Seeders</u>: Wheat, cotton, maize, bean seeders, high technology seeders for linear sowing (e.g. carrots, onions) and potato mowers.

<u>Sprayers</u>: High-pressure sprinklers, Motorized sprayers, Motorized sprayers of linear crops, Motorized mufflers

<u>Agricultural machinery</u>: refers to the agricultural machinery which was used, except state agricultural machinery.

<u>Threshers and harvesters</u>: Combine harvesters, Simple mowers of all types, thresher machines of all types, Simple windrowers, Cotton collectors, Beet extractors, Potato extractors, Other harvesting machines (for industrial tomatoes, onions, carrots)

<u>Irrigation pumps</u>: Diesel-fueled, Gas powered, Electrically driven and other pumps (steam-driven, wind-powered, animal-powered, etc.) and fuel pumps

<u>Irrigation systems</u>: Sprinkling units - fast coupling pipes with injectors, Self-propelled gun sprinkling units with injectors, Horizontal irrigation ramp self-propelled sprinkling units, Drop irrigation systems.

<u>Other agricultural machinery</u>: incubators, milking machines – portable, milking machines with milk transfer lines, cream separators, wheat sorting machines, maize ginners, cotton ginners, tobacco threading machines, pruning saws, honey extractors.

# Methodology and Coverage

The statistical unit of this survey is the land area within the administrative boundaries of each communal/municipal department of the country according to "Kallikratis Plan". The survey covers, on a census basis, all the above-mentioned administrative departments except the area of Agion Oros, for which no data are collected. In the framework of quality improvement of the relative results, it is pointed out that from the reference year 2014 onwards, the private partners and statistical correspondents (people responsible for the collection of the relative data) were replaced by graduates holding a degree (certificate, MSc, Phd) in geotechnical sciences. Data collection is conducted via electronic questionnaires (in excel format) using a wide range of sources, namely administrative (decentralized services of the Ministry of Agriculture e.g. OPEKEPE, Directorates of the first and second degree of Self – Governance e.g. Municipalities and Regional Administration Units, as well as farmers possessing large farms and agronomists). For this purpose a relative communication with all of the above actors was in place well before the actual conducting of the Annual Agricultural Survey, via circulars and memoranda of mutual understanding. Finally, in the framework of data quality control preparation, proactive channels of communication with all the relative sources that could be used as verification sources during the comparability checks were established.

**Publication of data** 

The survey results are available on a yearly basis since 1961.
