PRESS RELEASE

QUARTERLY NON-FINANCIAL SECTOR ACCOUNTS: 2nd Quarter 2017(Provisional data)

The Hellenic Statistical Authority (ELSTAT) announces the provisional data for the quarterly non-financial sector accounts for the 2nd quarter of 2017. Quarterly non-financial sector accounts provide an overall description of the Greek economy, based on the analysis of the economic behavior of the institutional sectors constituting the economy (households and non-profit institutions serving households, non-financial corporations, financial corporations, general government) and the relations of the national economy with the rest of world.

The data which are presented in the present Press Release have been compiled according to the new European System of National and Regional Accounts (ESA2010 – Regulation (EU) 549/2013).

The data cover the period 1999Q1-2017Q2.

During the second quarter of 2017, the external balance of goods and services recorded a deficit of 0.2 billion euro compared with a deficit of 0.8 billion euro recorded at the second quarter of 2016.

On account of the deficit decrease in the external balance of goods and services and the decrease of the net incomes and (current and capital) transfers received from the rest of the world, the total economy (S.1) presented net borrowing of 0.3 billion euro to the rest of the world (S.2), compared with the second quarter of 2016 when net borrowing was 0.4 billion euro (Table 1, Graph 1).

EXPLANATORY NOTES

General: The Quarterly non-financial Sector Accounts (QSA) provide a description

of the different stages of the economic process: production, generation of income, distribution of income, redistribution of income, use of income and non-financial accumulation. They also provide a list of balancing items that have high analytical value in their own right: value added, operating surplus and mixed income, balance of primary incomes,

disposable income, saving, net lending / net borrowing.

Legal basis: The QSA are compiled in accordance with the European System of

Accounts -ESA 2010 of the Council Regulation (EU) No 549/2013 of the

European Parliament and of the Council of 21 May 2013.

Reference period: The accounting period is the quarter.

Geographical coverage: The whole Greek territory.

Unit of measure: The economic data are published in million euro.

Revision: The Quarterly non-financial Sector Accounts are revised following the

revisions of annual non-financial sector accounts, quarterly national accounts and quarterly non-financial accounts of General Government, in

order to ensure coherence between them.

Statistical classification: The standard followed is the European System of Accounts (ESA

2010). The main categories are the institutional sectors and the transactions recorded between the sectors. The institutional sectors combine institutional units with similar characteristics and behaviour,

and are classified as follows:

Total Economy (S.1)

Non-financial corporations (S.11) Financial corporations (S.12)

General government (S.13)

Households and non-profit institutions serving households (NPISH)

(S.1M)

Rest of the World (S.2)

Publication of data: The QSA data are published at about 120 days after the end of the

reference quarter.
