6.2 Data sharing

None

7. Confidentiality

[Top](#)

7.1 Confidentiality policy

The issues concerning the observance of statistical confidentiality by the Hellenic Statistical Authority (ELSTAT) are arranged by articles 6, 7 and 8 of the Law 3832/2010, as amended by article 90 paragraph 8 of Law 3842/2010 and by article 10 of Law 3899/2010, as well as by article 8 of Law 2392/1996, which was brought back into force, in accordance with article 90 paragraph 8 of Law 3842/2010.

Furthermore, ELSTAT disseminates the statistics in compliance with the statistical principles of the European Statistics Code of Practice and in particular with the principle of statistical confidentiality.

7.2 Confidentiality – data treatment

ELSTAT protects and does not disseminate data it has obtained or it has access to, which enable the direct or indirect identification of the statistical units that have provided them by the disclosure of individual information directly received for statistical purposes or indirectly supplied from administrative or other sources. ELSTAT takes all appropriate preventive measures so as to render impossible the identification of individual statistical units by technical or other means that might reasonably be used by a third party. Statistical data that could potentially enable the identification of the statistical unit are disseminated by ELSTAT if and only if:

- a) These data have been treated, as it is specifically set out in the Regulation on Statistical Obligations of the agencies of the Hellenic Statistical System (ELSS), in such a way that their dissemination does not prejudice statistical confidentiality or
- b) the statistical unit has given its consent, without any reservations, for the disclosure of data.

The confidential data that are transmitted by ELSS agencies to ELSTAT are used exclusively for statistical purposes and the only persons who have the right to have access to these data are the personnel engaged in this task and appointed by an act of the President of ELSTAT.

The Statistical Confidentiality Committee (SCC) operating in ELSTAT, examines issues referring to the observance of statistical confidentiality. Within its competence is to recommend on:

- the level of detail at which statistical data can be disseminated, so as the identification, either directly or indirectly, of the surveyed statistical unit is not possible;
- the anonymization criteria for the microdata provided to users;
- the granting to researchers access to confidential data for scientific purposes.

12. Quality management	Top
12.1 Quality assurance	
<p>Quality controls and validation of data are carried out during the whole process of the compilation of statistics: from the data collection stage to the final compilation of the tables.</p> <p>First of all, well-trained and experienced staff is utilized for all the stages of the compilation of statistic that is, for data collection (including communication with prison establishments), initial checks, data entry and final checks, which are conducted after the tabulation of data. This way, the personnel have a comprehensive and longitudinal image of the prison establishments under their responsibilities.</p> <p>Data are validated either before or after data entry by means of logical checks. During data processing the data are checked in order to identify and correct any errors. When big differences are identified in the number of judicial decisions in comparison with the previous year, data are further investigated, in cooperation with the competent prison establishment in order to confirm that it is an error or it is about a real deviation.</p> <p>At the same time, a check is carried out in order to verify whether all the questionnaires have been collected from all the prison establishments of Greece and whether all the variables of the questionnaires have been filled in correctly. In case such kind of problems arises, the involved prison establishments are contacted (by letter or by phone).</p>	
12.2 Quality assessment	
<p>After all the above checks, cross-checks and comparisons taking place in every stage, the correction of any errors and the necessary adjustments, the produced results are considered high quality results.</p>	

13. Relevance	Top
13.1 User needs	
<p>The main users of the survey are: the Ministry of Justice, Transparency and Human Rights, the Ministry of Public Order, the University of Thessaloniki (Law School), The University of Athens (Law School), Panteion University of Social and Political Sciences, Democriteion University (Law School), university students, researchers, the Organisation for Intellectual Property, Eurostat and the UN.</p>	
13.2 User satisfaction	
<p>Users' needs are monitored on a regular basis by the Section of Justice and Public Order Statistics with the aim of satisfying users' needs. Generally, there is a good cooperation and immediate response to users' needs.</p> <p>At the same time, the Section of Dissemination of Statistical Information conducts a user satisfaction survey every six months.</p> <p>http://www.statistics.gr/portal/page/portal/ESYE/BUCKET/General/library_news_letter.pdf</p>	
13.3 Completeness	
<p>On the basis of users' needs, completeness is considered satisfactory.</p>	

14. Accuracy and reliability	Top
14.1 Overall accuracy	
<p>Since the survey is a census survey, any non-sampling errors (non-response or processing errors) are identified by means of appropriate checking and are duly corrected, in cooperation with the prison establishments, thus producing high accuracy results.</p>	
14.2 Sampling error	
<p>No sampling errors, because the survey is a census survey and data are collected from administrative data sources.</p>	
14.3 Non-sampling error	
<p>Non-response errors are due to the fact the some of the administrative sources do not return the questionnaires and in these cases there is a contact with the prison establishments either by phone or by a reminder letter. Non-response errors may also be due to the fact that some of the variables of the questionnaire are not filled in or are erroneously filled in; in these cases, after the checks carried out by the competent employees of ELSTAT the errors are duly corrected in cooperation with the involved prison establishments.</p>	

15. Timeliness and punctuality	Top
15.1 Timeliness	
<p>The time lag between the completion of data collection and the release of the results is 365 days.</p>	
15.2 Punctuality	
<p>Any delays are due to the fact that some administrative data sources delay response to questionnaires.</p>	

16. Comparability	Top
16.1 Comparability – geographical	
<p>The definitions and units of measure that are used do not rely on agreements between EU Member States and Eurostat, yet they are common with the definitions and units of measure used by the prison establishments all over Greece.</p>	
16.2 Comparability over time	
<ul style="list-style-type: none"> • Data for the years 2002, 2003 and 2004 are based on estimations • From 2005 onwards, there is a change in the grouping of the age of prisoners. 	

17. Coherence	Top
17.1 Coherence cross-domain	
-	

17.2 Coherence – internal

There are not significant differences between the common variables of the survey and the variables of other surveys.

18. Cost and burden

[Top](#)

No other burden than the operational expense of the competent Section of the Social Statistics Division of ELSTAT.

19. Data revision

[Top](#)

19.1 Revision policy

Data are revised when the relevant legislation is revised.

19.2 Revision practice

After having identified users' needs, the questionnaire is re-designed, when appropriate, fully ensuring comparability of data longitudinally.

20. Statistical processing

20.1 Source data

Primary data derive from administrative data sources.

20.2 Frequency of data collection

Data are collected on a quarterly basis.

20.3 Data collection

The statistical questionnaires, duly completed by the Director of the competent prison, are transmitted to the Section of Justice and Public Order Statistics of ELSTAT.

20.4 Data validation

The data are validated by means of a series of qualitative and quantitative checks which are mainly based on:

1. Cross-checking of primary data with corresponding data of the previous year.
2. Comparisons between the main aggregates of the survey with corresponding aggregates of other statistical surveys.

20.5 Data compilation

The data, after having been collected, undergo logical checks, they are codified, imported in the electronic data base, tabulated and finally they are published.

20.6 Adjustment
