4. Statistical presentation [Top](#)

4.1 Data description

The purpose of the survey on maritime accidents (ships and persons) is to record the accidents (injuries, deaths and suicides) of persons on board and accidents of persons in the sea, mostly drawings, which took place in a port or on the coast area under the competency of the port authorities.

In addition, accidents of passenger ships and commercial ships are recorded, which took place during the journey or during the ship's entering the port or during loading or unloading of cargo and only for ships of 100 GRT and over.

The survey results include mostly data on bathers' drawings but also injuries of seafarers or passengers on commercial or passenger ships, as well as sinking, damages and fire incidents of commercial or passenger ships.

The survey is a census survey and it is conducted on a yearly basis.

The data are collected exclusively from the port authorities all over Greece. The survey is conducted pursuant to the provisions of the Permanent Circular No 1 YEN/ΔΜΠ of the Ministry of Mercantile Marine dated 16/1/1975, which was replaced by the Permanent Joint Circular dated 15/4/1998.

4.2 Classification system

The geographical breakdown is based on the nomenclature of territorial units for statistics, at the level of NUTS 2.

4.3 Sector coverage

The sectors are covered on the basis of NACE rev. 2

4.4 Statistical concepts and definitions

The variables of the survey are:

- a. Persons injured: sex, year of birth, place of birth, citizenship, marital status. If the injured person is a seafarer whether he is employed in the port area. If the injured person is a visitor, bather or if he was on duty, where exactly on the coast or in the port he was when the accident occurred, date of the accident, who was responsible for the accident, the cause of the accident, the direct impact of the accident, type of body injury, whether he was made redundant –in case of a seafarer, and whether the injured person was on board during the accident.
- b. Ships involved in the accident: name of the ship, GRT, registration port, ship category, whether it was loaded or in ballast, whether the accident was caused by intention or negligence, personal data of the person responsible for the accident, marine region, weather conditions, visibility, date of the accident, damage of the ship or injury/death of a person, causes of the accident.

The definitions used are the following:

- a. Ship category (cargo ship, passenger ship, fishing ship, etc.)
- b. International radio call sign

<ul style="list-style-type: none"> c. Gross Registered Tonnage (GRT) d. Registration port and registration number e. Type of cargo f. Marine region
4.5 Statistical unit
Ships and persons.
4.6 Statistical population
Persons and ships for which accidents (injuries, deaths, suicides) have been recorded. Accidents of persons in the sea, mostly drawings, which took place in a port or on the coast area under the competency of the port authorities. In addition, accidents of passenger ships and commercial ships which took place during the journey or during the ship's entering the port or during loading or unloading of cargo and only for ships of 100 GRT and over.
4.7 Reference area
All the ports of Greece.
4.8 Time coverage
From 1999 until 2013, tables with the survey results are available on the website of ELSTAT on a yearly basis.
4.9 Base period
Not applicable.

5. Unit of measure	Top
Number of ports, ships and injured persons.	

6. Reference period	Top
One calendar year.	

7. Institutional mandate	Top
7.1 Legal acts and other agreements	
<p>The legal framework concerning the organization and operation of ELSTAT is as follows:</p> <ul style="list-style-type: none"> ➤ Law 3832/2010 (Government Gazette No 38, Issue A): "<i>Hellenic Statistical System Establishment of the Hellenic Statistical Authority (ELSTAT) as an Independent Authority</i>", as amended by article 90 paragraphs 8 and 9 of the Law 3842/2010 (Government Gazette No 58, Issue A): "<i>Restoration of fiscal justice, confrontation of tax evasion and other provisions</i>", by article 10 of the Law 3899/2010 (Government Gazette No 212, Issue A): "<i>Urgent measures for the implementation of the assistance program of the Greek Economy</i>", by article 45 of the Law 3943/2011 (Government Gazette No 66, Issue A): "<i>Combating tax evasion, staffing of auditing services and other provisions falling within the competence of the Ministry of Finance</i>", by article 22 paragraph 1 of the Law 3965/2011 (Government Gazette No 113, Issue A): "<i>Operations Reform of the Consignment and Loan Fund, Public Debt Management Agency, Public Enterprises and Government bodies, the establishment of the General Secretary of Public Property and other provisions</i>", by article first of the Law 4047/2012 (Government Gazette No 31, Issue A): "<i>Ratification of the Act of Legislative Content "Very urgent measures for the implementation of the Medium-term Fiscal Strategy 2012-2015 and of the State Budget for 2011" and of the Act of Legislative Content "Regulation of very urgent issues for the implementation of law 4024/2011 "Pension provisions, uniform pay scale - grading system, labour reserve and other provisions for the implementation of the Medium-term Fiscal Strategy Framework 2012-2015" and of issues falling within the competence of the Ministries of Administrative Reform and E-Governance, Interior, Finance, Environment, Energy and Climate Change, and of Education, Lifelong Learning and Religious Affairs and related to the implementation of the Medium-term Fiscal Strategy Framework 2012-2015" and other provisions</i>", by article 323 of the Law 4072/2012

- **Article 14 of the Law 3470/2006** (Government Gazette No 132, Issue A): *"National Export Council, tax regulations and other provisions"*.
- **Article 3, paragraph 1c, of the Law 3448/2006** (Government Gazette No 57, Issue A): *"For the further use of information coming from the public sector and the settlement of matters falling within the responsibility of the Ministry of Interior, Public Administration and Decentralization"*.
- **European Statistics Code of Practice** adopted by the Statistical Programme Committee on 24 February 2005 and promulgated in the Commission Recommendation of 25 May 2005 on the independence, integrity and accountability of the national and Community statistical Authorities, after its revision, which was adopted on 28 September 2011 by the European Statistical System Committee.
- **Presidential Decree 226/2000** (Government Gazette No 195, Issue A): *"Organization of the General Secretariat of the National Statistical Service of Greece"*.
- **Articles 4, 12, 13, 14, 15 and 16 of the Law 2392/1996** (Government Gazette No 60, Issue A): *"Access of the General Secretariat of the National Statistical Service of Greece to administrative sources and administrative files, Statistical Confidentiality Committee, settlement of matters concerning the conduct of censuses and statistical works, as well as of matters of the General Secretariat of the National Statistical Service of Greece"*.
- Permanent Circular No 1 YEN/ΔΜΠ of the Ministry of Mercantile Marine dated 16/1/1975 which was replaced by the Permanent Joint Circular dated 15/4/1998.

7.2 Data sharing

No.

8. Confidentiality

[Top](#)

8.1 Confidentiality policy

The issues concerning the observance of statistical confidentiality by the Hellenic Statistical Authority (ELSTAT) are arranged by articles 7, 8 and 9 of the Law 3832/2010 as in force, by Articles 8, 10 and 11(2) of the Regulation on Statistical Obligations of the agencies of the Hellenic Statistical System and by Articles 10 and 15 of the Regulation on the Operation and Administration of ELSTAT.

More precisely:

ELSTAT disseminates the statistics in compliance with the statistical principles of the European Statistics Code of Practice and in particular with the principle of statistical confidentiality.

8.2 Confidentiality – data treatment

- ELSTAT protects and does not disseminate data it has obtained or it has access to, which enable the direct or indirect identification of the statistical units that have provided them by the disclosure of individual information directly received for statistical purposes or indirectly supplied from administrative or other sources. ELSTAT takes all appropriate preventive measures so as to render impossible the identification of individual statistical units by technical or other means that might reasonably be used by a third party. Statistical data that could potentially enable the identification of the statistical unit are disseminated by ELSTAT if and only if:
 - a) these data have been treated, as it is specifically set out in the Regulation on Statistical Obligations of the agencies of the Hellenic Statistical System (ELSS), in such a way that their dissemination does not prejudice statistical confidentiality or
 - b) the statistical unit has given its consent, without any reservations, for the disclosure of data.
- The confidential data that are transmitted by ELSS agencies to ELSTAT are used exclusively for statistical purposes and the only persons who have the right to have access to these data are the personnel engaged in this task and appointed by an act of the President of ELSTAT.
- ELSTAT may grant researchers conducting statistical analyses for scientific purposes access to data that enable the indirect identification of the statistical units concerned. The access is granted provided the following conditions are satisfied:
 - a) an appropriate request together with a detailed research proposal in conformity with current scientific standards have been submitted;
 - b) the research proposal indicates in sufficient detail the set of data to be accessed, the methods of analyzing them, and the time needed for the research;
 - c) a contract specifying the conditions for access, the obligations of the researchers, the measures for respecting the confidentiality of statistical data and the sanctions in case of breach of these obligations has been signed by the individual researcher, by his/her institution, or by the organization commissioning the research, as the case may be, and by ELSTAT.
- Issues referring to the observance of statistical confidentiality are examined by the Statistical Confidentiality Committee (SCC) operating in ELSTAT. The responsibilities of this Committee are to make recommendations to the President of ELSTAT on:
 - the level of detail at which statistical data can be disseminated, so as the identification, either directly or indirectly, of the surveyed statistical unit is not possible;
 - the anonymization criteria for the microdata provided to users;
 - the granting to researchers access to confidential data for scientific purposes.
- The staff of ELSTAT, under any employment status, as well as the temporary survey workers who are employed for the collection of statistical data in statistical surveys conducted by ELSTAT, who acquire access by any means to confidential data, are bound by the principle of confidentiality and must use these data exclusively for the statistical purposes of ELSTAT. After the termination of their term of office, they are not allowed to use these data for any purpose.
- Violation of data confidentiality and/or statistical confidentiality by any civil servant or employee of ELSTAT constitutes the disciplinary offence of violation of duty and may be punished with the penalty of final dismissal.
- ELSTAT, by its decision, may impose a penalty amounting from ten thousand (10,000) up to two hundred thousand (200,000) euros to anyone who violates the confidentiality of data and/or statistical confidentiality. The penalty is always imposed after the hearing of the defense of the person liable for the breach, depending on the gravity and the repercussions of the violation. Any relapse constitutes an aggravating factor for the assessment of the administrative sanction.

9. Release policy

[Top](#)

9.1 Release calendar

Not applicable.

9.2 Release calendar access

Not applicable.

9.3 User access

Information on user access can be found in the Library's Newsletter, at the following link:
http://www.statistics.gr/portal/page/portal/ESYE/BUCKET/General/library_news_letter.pdf

10. Frequency of dissemination

[Top](#)

The survey results are transmitted to the Library of ELSTAT not later than 2 months after the end of the reference year of the survey.

11. Dissemination format

[Top](#)

11.1 News release

No.

11.2 Publications

No.

11.3 On-line database

No.

11.3.1 Data tables - consultations

No.

11.4 Micro-data access

Microdata are made available to users after their submitting a request to the:
Division of Statistical Information and Publications
46, Peireos and Eponiton Str.,
18510 Piraeus
Tel: +30 213 135 2173
Fax: +30 213 135 2022
e-mail: data.dissem@statistics.gr

For confidentiality reasons, access to microdata is granted to users only under strict conditions and by always adhering to the relevant procedure.

11.5 Other

No.

11.5.1 Metadata – consultations

No.

12. Accessibility of documentation

[Top](#)

12.1 Documentation on methodology

There is not any methodological note concerning the survey.

12.1.1 Metadata completeness - rate

Metadata completeness rate is 100%.

12.2 Quality documentation

No.

13. Quality management

[Top](#)

13.1 Quality assurance

Quality controls mainly refer to comparisons between the available data with the corresponding data of the previous year.

When big differences are identified in the produced data, the primary data are further investigated, in cooperation with the competent administrative sources and subsequently the data are duly justified and validated.

Moreover, in order to ensure the quality of data, all the procedures that are described in the circulars on the Quality Policy of ELSTAT are followed:

http://www.statistics.gr/portal/page/portal/ESYE/BUCKET/General/ELSTAT_quality_guidelines.pdf

13.2 Quality assessment

As regards the quality of the results of the survey on maritime accidents, during the collection and processing of data, logical checks and completeness checks are carried out and any errors are duly corrected. Afterwards the data are tabulated.

14. Relevance

[Top](#)

14.1 User needs

Users are mostly individual users or agencies involved with maritime transport for educational, vocational, scientific, research and other purposes.

14.2 User satisfaction

Information on user' profile and user satisfaction and other relevant information are available in the Library's Newsletter, posted at the following link:

http://www.statistics.gr/portal/page/portal/ESYE/BUCKET/General/library_news_letter.pdf

14.3 Completeness

The completeness of the survey amounts to 100%.

15. Accuracy and reliability

[Top](#)

15.1 Overall accuracy

Overall accuracy of the survey is satisfactory and the main source of errors is non-sampling error.

15.2 Sampling error

No sampling errors, because the survey is a census survey and the relevant data are collected exclusively from the Port Authorities.

15.3 Non-sampling error

No coverage errors because the survey refers to Greece total.

Non-response errors refer to the response rate of the suppliers of data to the Port Authorities. In most of the cases, errors are due to the inappropriate filling in of questionnaires by the Port Authorities; these errors are checked and are duly corrected

15.3.1 Coverage error

The survey is a census survey and therefore there are no coverage errors.

15.3.1.1 Over-coverage – rate

No.

15.3.1.2 Common units – proportion

No.

15.3.2 Measurement error

There are some errors in the data supplied by the port authorities, which after communication with them, are duly corrected.

15.3.3 Non response error

Non-response errors are very limited. The response rate of the respondents is checked in order to ensure transmission of data.

15.3.4 Processing error

After data entry, the data are checked.

15.3.5 Model assumption error

No.

16. Timeliness and punctuality

[Top](#)

16.1 Timeliness

The data are published and finalized 2 months after the end of the reference month.

16.2 Punctuality

The data are published on time and the statistical product is up-to-date.

17. Comparability

[Top](#)

17.1 Comparability – geographical

No.

17.1.1 Assymetry for mirror flows statistics – coefficient

Not applicable.

17.2 Comparability over time

The data are checked as regards their comparability over time by the Hellenic Statistical Authority.

18. Coherence

[Top](#)

18.1 Coherence cross-domain

There are no other relevant data from other sources or agencies of the Hellenic Statistical System concerning this survey.

18.1.1 Coherence – sub annual and annual statistics

The data of the survey on maritime accidents are coherent.

18.1.2 Coherence – National Accounts

No other relevant data are compiled by the National Accounts.

18.2 Coherence – internal

Internal coherence of data (between time series and between variables) is checked by ELSTAT during the final stage of data processing.

19. Cost and burden

[Top](#)

Not estimated.

20. Data revision

[Top](#)

20.1 Revision policy

The data are revised in compliance with the Revision Policy of ELSTAT.

http://www.statistics.gr/portal/page/portal/ESYE/BUCKET/General/ELSTAT_Revisions_Policy_22_5_2013_EN.pdf

20.2 Revision practice

The revision policy of ELSTAT is implemented.

21. Statistical processing

[Top](#)

21.1 Source data

The primary data of the survey on maritime accidents derive from administrative sources and they are supplied by the port authorities. Census data are collected referring to the total number of ports, ships, accidents and injured persons pursuant to the Permanent Circular No 1 YEN/ΔΜΠ of the Ministry of Mercantile Marine dated 16/1/1975 which was replaced by the Permanent Joint Circular dated 15/4/1998.

21.2 Frequency of data collection

Data are collected on a monthly basis.

21.3 Data collection

ELSTAT/ Division of Trade and Services Statistics/Section of Maritime Transport sends the questionnaire to the competent agencies (shipping companies and port authorities) and then it collects the required data by post.

21.4 Data validation

The primary data are checked (logical, quality and computational checks), mostly as regards their chronological consistency. When big differences are identified between two consecutive years, the data are further investigated. Any errors that may occur are identified and are duly corrected by means of logical checks.

21.5 Data compilation

The data, after having been collected, undergo logical checks, they are processed, imported in the electronic data base, tabulated and finally they are published.

21.5.1 Imputation – rate

Not applicable, the survey is a census survey.

21.6 Adjustment

No adjustment.

21.6.1 Seasonal adjustment

Not applicable.
