## METHODOLOGICAL NOTES

<b>Generally</b>	The Turnover Indices for Motor Trades are quarterly indices, which were released for the first time in 2006, based on the year 2005=100,0.
<b>Purpose of the index – definitions</b>	The aim of these indices is to measure in value terms the activity of motor trades sector. Turnover excludes VAT and comprises the totals invoiced by the enterprise during the reference period (quarter), which correspond to sales of goods or services supplied to third parties.
<b>Legal basis</b>	The compilation of the Turnover Indices for Motor Trades is governed by Council Regulation (EEC) No.1165/98 “concerning short-term statistics” and the requirements of Regulation (EC) No 1158/05 of the European Parliament and Council, amending the original Regulation 1165/98. Additionally the compilation of the Turnover Indices for motor trades is governed by the Regulation No.1893/2006 of the European Parliament and of the Council for the implementation of the new statistical classification NACE Rev.2.
<b>Reference period</b>	Quarter
<b>Base year</b>	2005=100.0.
<b>Revision</b>	Pursuant to the provisions of Council Regulation No 1165/98 concerning short-term statistics, the indices in question are updated every five (5) years in years ending in 0 or 5. The purpose of updating the Turnover Indices for Motor Trades is to adapt the indices to changes in the breakdown of the above sector. During the last revision, following the new Statistical Classification NACE Rev.2, the group “retail sale of automotive fuel” was excluded from Motor Trades Sector (Division 45) and is now surveyed under Retail Trade (Division 47).
<b>Statistical classification</b>	The new EU (Eurostat) NACE Rev.2 statistical classification of economic activities was used, in conformity with Regulation (EC) 1893/2006 of the Council and the European Parliament.
<b>Geographical coverage</b>	The indices cover the whole country, with data from 35 prefectures
<b>Coverage of economic activities</b>	The indices cover division 45 and group 451 of NACE Rev 2 statistical classification of economic activities.
<b>Statistical survey</b>	In the survey for the compilation of the Turnover Indices for Motor Trades (2005=100.0) it was decided to include 3.650 enterprises listed in the Business Register, having an annual turnover (in 2005) equal to or higher than 300,000 euros from which a random sample of 319 enterprises was therefore selected.
<b>Calculating the indices</b>	The indices are calculated by the chaining method. The indices are reduced to a typical quarter by multiplying the turnover estimates for the current quarter by the appropriate correction factor.
<b>Compiled index series</b>	The time series of these indices of the period 2005-2008 (division 50 and group 501 of the classification NACE Rev.1) were adjusted, during 2009, to the new classification NACE Rev.2 (division 45 and group 451). Due to the exclusion of the group “retail sale of automotive fuel” from the motor trades section these indices were recalculated. Moreover, as required by Commission Regulation (EC) 472/2008 concerning backcasting, data was estimated for the years 2000-2004.
<b>Publication of data</b>	Data of the Turnover Indices for Motor Trades (2005=100,0) are released quarterly, 70 days after the end of the reference quarter, starting from 1 <sup>st</sup> quarter 2000.
<b>References</b>	More information about the methodology for the compilation and calculation of the index and for the time series is available on the EL.STAT website ( <a href="http://www.statistics.gr">www.statistics.gr</a> ) .
