## METHODOLOGICAL NOTES

<b>Generally</b>	The Wholesale Turnover Index is a quarterly index, which was first released in 2006, based on the year 2005=100,0.
<b>Purpose of the index – definitions</b>	The purpose of this index is to measure in value terms the activity of wholesale trade in the market. Turnover excludes VAT and comprises the totals invoiced by the enterprise during the reference period (quarter), which correspond to sales of goods or services supplied to third parties.
<b>Legal basis</b>	The compilation of the Wholesale Turnover Index is governed by Council Regulation (EEC) No.1165/98 “concerning short-term statistics” and the requirements of Regulation (EC) No 1158/05 of the European Parliament and Council, amending the original Regulation 1165/98. Additionally the compilation of the above index is governed by the Regulation No.1893/2006 of the European Parliament and of the Council for the implementation of the new statistical classification NACE Rev.2.
<b>Reference period</b>	Quarter.
<b>Base year</b>	2010=100.0.
<b>Revision</b>	Pursuant to the provisions of Council Regulation No 1165/98 concerning short-term statistics, the index in question is updated every five (5) years in years ending in 0 or 5. The purpose of updating the Wholesale Turnover Index is to adapt the index to changes in the breakdown of wholesale trade.
<b>Statistical classification</b>	The new EU (Eurostat) NACE Rev.2 statistical classification of economic activities was used, in conformity with Regulation (EC) 1893/2006 of the Council and the European Parliament.
<b>Geographical coverage</b>	The index covers the whole of the country, with data from 46 prefectures.
<b>Coverage of economic activities</b>	The index covers division 46 “Wholesale trade, except of motor vehicles and motorcycles” of NACE Rev 2 statistical classification of economic activities.
<b>Statistical survey</b>	In the survey for the compilation of the Wholesale Turnover Index(2010=100.0) it was decided to include 19.932 wholesale trade enterprises listed in the Business Register, having an annual turnover (in 2010) equal to or higher than 300,000 euros from which a random sample of 478 enterprises was therefore selected.
<b>Calculating the indices</b>	The index is calculated by the chaining method. The index is reduced to a typical quarter by multiplying the turnover estimates for the current quarter by the appropriate correction factor.
<b>Compiled index series</b>	The time series of this index are compiled from 1 <sup>st</sup> quarter 2000 with base year 2010=100.0
<b>Publication of data</b>	Data of the Wholesale Turnover Index (2010=100.0) are released quarterly, 70 days after the end of the reference quarter, starting from 1 <sup>st</sup> quarter 2000.
<b>References</b>	More information on the methodology concerning the compilation and calculation of the index and for the time series is available on the ELSTAT website ( <a href="http://www.statistics.gr">www.statistics.gr</a> ).
