

PRESS RELEASE

MATERIAL COSTS INDEX IN CONSTRUCTION OF NEW RESIDENTIAL BUILDINGS: February 2017, y-o-y increase 0.3%

The Hellenic Statistical Authority (ELSTAT) announces the Overall Material Costs Index in Construction of New Residential Buildings for the month February 2017. More Specifically:

- In February 2017, compared with the corresponding index of February 2016, the Overall Material Costs Index in Construction of New Residential Buildings recorded an increase of 0.3%. The index in February 2016 had recorded a decrease of 2.3% compared with the corresponding index of February 2015 (Table 1).
- The Overall Index in February 2017 compared with the corresponding index of January 2017 recorded an increase of 0.1%. The index had recorded a decrease of 0.2% between February 2016 and January 2016 (Table 2).
- The average Index for the twelve-month period from March 2016 to February 2017, compared with the same index for the twelve-month period from March 2015 to February 2016, decreased by 1.3%. The comparison of the twelve-month average Material Costs Index in the corresponding previous twelve-month periods recorded a decrease of 2.0% (Table 3).

Evolution of annual rate of changes of Material Costs Index in Construction of New Residential Buildings (2010=100.0)

METHODOLOGICAL NOTES

Generally	The compilation of the Material Costs Index in Construction of New Residential Buildings started in 1971. The index is being released with their current form since February 2013 with base year 2010=100.0 and the time series were revised accordingly.
Purpose of the index – definitions	<p>The purpose of the index is to measure the monthly rates of change in the prices of building materials paid by the constructors and are consumed in the construction of new residential buildings.</p> <p>The Material Costs Index is a monthly index and consists a sub-index of the overall cost index in construction of new residential buildings.</p> <p>For the compilation of the index the selected prices of the materials are those which are actually paid by the construction enterprises for materials supplied at the site and do not include VAT and other taxes.</p>
Legal basis	The compilation of the Material Costs Index is governed by Council Regulation (EEC) No.1165/98 concerning short-term statistics and by Regulation No.1158/05 (amending the above mentioned Regulation) of the European Parliament and of the Council.
Reference period	Month
Base year	2010=100.0
Revision	The Material Costs Index is a fixed base index. After the last revision, the index is calculated with base year 2010=100.0. Pursuant to the provisions of Council Regulation No 1165/98 concerning short-term statistics, the index in question is revised every five (5) years, on years ending in 0 or 5.
Statistical classification	The national classification is followed, which includes 91 categories of materials, aggregated in 15 groups.
Geographical coverage	The geographical coverage of the index includes the country as a whole, but prices are collected only in the biggest cities of the country (Greater Athens, Thessaloniki, Patras, Herakleion Larisa and Volos).
Coverage of economic activities	The Material Costs Index in Construction of New Residential Buildings is an input index that refers to the purchase prices of materials paid by the constructors of new residential buildings.
Statistical survey	A total number of 1515 observations (prices) collected from 280 commercial or industrial enterprises supplying building materials, are used for the compilation of the index. For electricity, prices are collected from the Public Power Corporation, while for water, data are provided by water supplies companies.
Publication of data	The index with the new base year 2010=100.0 is being released since March 2013, with February 2013 as the first reference month. Times series data with base year 2010=100.0 are available from January 2000 onwards.
References	More information on the methodology concerning the compilation and calculation of the index and for the time series is available on the ELSTAT website: http://www.statistics.gr/en/statistics/-/publication/DKT60/
