

Piraeus, 30 May 2017

# **PRESS RELEASE**

# PRODUCER PRICE INDEX IN INDUSTRY: April 2017, y-o-y increase of 7.9%

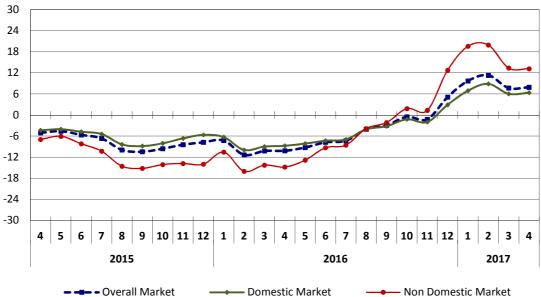

The Overall Producer Price Index in Industry (total of domestic and non domestic market) with base year 2010=100.0 in April 2017 recorded an increase of 7.9% compared with April 2016. The corresponding index in April 2016 had recorded a decrease of 10.2% compared with April 2015 (Table 1.II).

The Overall Producer Price Index (PPI) in April 2017 recorded an increase of 0.6% compared with March 2017. The corresponding index in April 2016 had recorded an increase of 0.4% compared with March 2016 (Table 1.I).

The average Overall Index for the twelve-month period from May 2016 to April 2017 increased by 0.4% in comparison with the corresponding index for the period from May 2015 to April 2016, while the decrease recorded between the previous twelve-month periods amounted to 8.5% (Table 6).

The time series of PPI are available on the website of ELSTAT, at: <a href="http://www.statistics.gr/en/statistics/-/publication/DKT15/-">http://www.statistics.gr/en/statistics/-/publication/DKT15/-</a>

# Evolution of annual rates of change (%) of Producer Price Index (PPI) in Industry: Overall Market, Domestic and Non-Domestic Market

### **Information:**

### 1. Monthly rates of change: April 2017 compared with March 2017

The increase of 0.6% in the Overall Producer Price Index in Industry in April 2017 compared with March 2017 is on account of the monthly changes of the sub-indices of the markets as follows:

- a. 0.5% increase in the PPI of the Domestic Market (Table 2.I).
- b. 0.7% increase in the PPI of the Non-Domestic Market (Table 3.I).

## 2. Annual rates of change: April 2017 compared with April 2016

The increase of 7.9% in the Overall Producer Price Index in Industry in April 2017 compared with April 2016 is on account of the annual changes of the sub-indices of the markets as follows:

- a. 6.4% increase in the PPI of the Domestic Market (Table 2.II).
- b. 13.2% increase in the PPI of the Non-Domestic Market (Table 3.II).

#### **METHODOLOGICAL NOTES**

#### Generally

The Producer Price Index (PPI) in Industry, in its current form, has been compiled since January 2005, when it replaced the Wholesale Price Index which was compiled since 1963.

# Purpose of the index – definitions

The purpose of the Producer Price Index in Industry is to measure the monthly rates of change in the prices of goods that are produced in the domestic market and are sold in this market or are exported to the non-domestic market.

The Producer Price Index in Industry is a monthly index and it is composed by the sub-indices of the Domestic and Non-Domestic Market. The Index of the Non-Domestic Market, in its turn, is broken down in the Eurozone Index and the Non-Euro-zone Index.

The collected prices for products sold in the domestic market are basic prices, i.e. prices excluding VAT and other similar deductible taxes directly linked to turnover and also, excluding duties and other taxes on products. Moreover, subsidies on products are included in the basic prices. The prices collected for products sold in the non-domestic market are quoted FOB (Free on board) prices.

The price data collected in the framework of the compilation of PPI refer mainly to transactions between the enterprises that produce and sell the surveyed products and the enterprises that buy those products, irrespective of whether those products are to be used as raw materials or as merchandise.

Legal basis

The compilation of PPI is governed by Council Regulation (EC) 1165/98 concerning short-term statistics and Regulation 1158/05 (amending the above mentioned Regulation) of the European Parliament and of the Council. Furthermore, the PPI is governed by Regulation (EC) 1893/2006 of the European Parliament and of the Council, the Commission Regulation (EC) 656/2007 and Regulation (EC) 451/2008 of the Council.

Reference period

Month.

Base year

2010=100.0.

Revision

The PPI is a fixed-base index. Pursuant to the provisions of Council Regulation 1165/98 concerning short-term statistics, the index is updated every five (5) years, in years ending in 0 or 5.

Statistical classifications

At the level of branches of economic activities the new Eurostat classification NACE Rev. 2 was used (Regulation 1893/2006), while at the level of main industrial groups, the allocation of two-digit and three-digit NACE Rev. 2 headings to categories of aggregate classification was used, in accordance with Commission Regulation 656/2007. At product level, the new Eurostat classification CPA 2008 was used, according to Council Regulation 451/2008.

**Geographical coverage** 

The Index covers the whole of the country, with data from 41 prefectures.

Coverage of economic activities

The index covers all the sections of Industry, the main industrial groups and all the levels of economic activities (divisions, groups, classes) and the relevant products.

Statistical survey

The data are collected from approximately 1,000 enterprises and the total number of observations (prices) amounts approximately to 2,500. More specifically, 407 products sold in the domestic market and 174 products sold in the non-domestic market were selected. Out of the 174 products sold in the non-domestic market, 151 products are sold in the euro-zone countries and 156 products are sold in the non-euro-zone countries.

**Publication of data** 

The PPI with the new base year 2010=100.0 is released since February 2015, with January 2015 as the first reference month. Data with base year 2010=100.0 are available from January 2000 onwards.
