

HELLENIC REPUBLIC  
MINISTRY OF ECONOMY AND FINANCE  
NATIONAL STATISTICAL SERVICE OF GREECE

Piraeus, 14 April 2006

**PRESS RELEASE**  
**Industrial Production Index <sup>1 2</sup>**  
**February 2006**

According to provisional<sup>3</sup> results, the Industrial Production Index (IPI) in February 2006, as compared to February 2005, fell by 1,8%. A year earlier, the annual rate of change of the IPI was 1,3%.

The decrease of the IPI by 1,8% in February 2006, as compared to February 2005, was due to the annual changes as following:

- by Industrial Sections

- Mining and quarrying production fell by 1,1%.
- Manufacturing production fell by 3,3%.
- Electricity, City-Gas, Water supply production rose by 4,4%.

---

<sup>1</sup>The Industrial Production Index (IPI) is released from October 2004, as first reference month, revised and re-based in 2000=100,0. The revision of the IPI with base year 2000=100,0 is based upon the results of the annual PRODCOM survey of the year 2000, the annual Mining-Quarrying survey of the year 2000 and the annual Industrial survey of the year 2000. The compilation and publication of the new index is based on the framework of requirements of the Council Regulation (EC) No 1165/98 concerning short-term statistics (STS-R) as well as the amendment Regulation (EC) No 1158/05 of the European Parliament and Council, amending the Council Regulation (EC) No 1165/98.

The IPI is an important business cycle indicator which shows the monthly activity of the industrial sector, which is one of the most volatile components of the economy. As specified in the STS-R 1165/98 and in line with traditional practice in business statistics, the IPI should show the evolution of value added at factor cost, at constant prices. Value added at factor cost can be calculated from turnover (excluding VAT), plus capitalised production, plus other operating income, plus or minus the changes in stocks, minus the purchases of goods and services, minus other taxes on products and taxes linked to production. Following the regulation, Greece records the value and not the volume for some products. For these cases, Greece adjusts the data by removing pure inflationary price changes in order to isolate pure volume development. The deflation is applied with base year 2000.

The coverage of IPI according to the STS-R 1165/98 includes all activities listed in Sections C to E (mining and quarrying, manufacturing, and electricity, gas and water supply) of the NACE Rev. 1 classification, except Division 41 (collection, purification and distribution of water) and Group 40.3 (steam and hot water supply).

<sup>2</sup> Figures in this release are based on data adjusted for working days.

<sup>3</sup> The data are provisional when first released. The data become final as soon as all data gathered become definite. More specifically, the data released for the most recent month are provisional and are published together with revised data of the previous month, which are indicated as such.

A short note on methodology in English is available on NSSG web site [www.statistics.gr](http://www.statistics.gr).

The data series of the IPI, with base year 2000=100,0, starts from 1993, onwards.

- by Main Industrial Groupings

- Energy Production rose by 5,3%.
- Intermediate Goods production fell by 2,5%.
- Capital Goods production fell by 1,9%.
- Consumer Durables production fell by 0,2%.
- Consumer Non-Durables production fell by 8,6%.

In the 2-month period January 2006 – February 2006, the average rate of change of the IPI, was -0,5%. A year earlier, the corresponding average rate of change of the IPI was 0,9%. The above decrease (-0,5%) , was due to the following 2-month average rate of changes:

- by Industrial Sections

- Mining and quarrying production fell by 4,1%.
- Manufacturing production fell by 1,3%.
- Electricity, City-Gas, Water supply production rose by 3,5%.

- by Main Industrial Groupings

- Energy Production rose by 3,1%.
- Intermediate Goods production fell by 0,4%.
- Capital Goods production fell by 2,5%.
- Consumer Durables production rose by 0,5%.
- Consumer Non-Durables production fell by 4,3%.

**TABLE A**

**Annual rates of change of the Industrial Production Index  
(Base year 2000 = 100,0)**

Branch code	Branch name	February 2006*	February 2005	February 2004	Rate of change (%) Feb06/Feb05	Rate of change (%) Feb05/ Feb04
	<b>TOTAL</b>	97,8	99,5	98,3	-1,8	1,3
