

HELLENIC REPUBLIC

MINISTRY OF ECONOMY AND FINANCE

**GENERAL SECRETARIAT OF
THE NATIONAL STATISTICAL SERVICE
OF GREECE**

Piraeus, 19 August 2008

PRESS RELEASE
Turnover Index in Industry^{1,2,3,4}
June 2008

The National Statistical Service of Greece publishes the Turnover Index in Industry, with base year 2000=100.0, for June 2008, according to provisional⁵ results, as follows:

- ❑ The Turnover Index in Industry (both domestic and non-domestic market) in June 2008, as compared to June 2007, rose by 16.8%. A year earlier, the annual rate of change was –3.3%.
- ❑ The average Turnover Index in Industry for the 12-month period July 2007 - June 2008, as compared to the 12-month period July 2006 - June 2007, rose by 10.6%. A year earlier, the corresponding average rate of change was 3.7%.

¹ The Turnover Index in Industry is a new index with base year 2000=100.0, covering the period from 2000 onwards. The compilation and publication of the new index is based on the framework of requirements of the Council Regulation (EC) No 1165/98 concerning short-term statistics (STS-R), as well as the amendment Regulation (EC) No 1158/05 of the European Parliament and Council, amending the Council Regulation (EC) No 1165/98.

² The Turnover Index is an important business indicator and shows the monthly evolution of the market of goods and services in industry. The purpose of this index is to measure the monthly activity of the industrial sector in terms of value. Turnover comprises the totals invoiced (without VAT) by the observation units during the reference period and corresponds to the market sales of goods or services supplied to third parties. The purposes and the characteristics of the Turnover Index apply, as well, to the indices for the distinction between domestic and non-domestic turnover.

³ The Turnover Index in Industry covers the whole country and is compiled for all activities listed in Sections C (mining and quarrying) and D (manufacturing) of the NACE Rev.1 classification.

⁴ The weights, taking into consideration the need to distinct turnover to domestic and non-domestic market with a further split of the non-domestic market to Eurozone and non-Eurozone market, are based on the total turnover values of the products that were disposed to the domestic and to the two zones of the non-domestic market, during the base year (200=100,0), according to the results of the Annual Industrial Survey, the annual PRODCOM Survey, the annual Mining – Quarrying Survey and the annual External Trade Survey of the year 2000.

⁵ The data is provisional when first released and become final as soon as all gathered data become definite. More specifically, the data released for the most recent month is provisional and is published together with revised data of the previous month.

The increase of the Turnover Index in Industry by 16.8% in June 2008, as compared to June 2007, was due to the annual changes as following:

- by Industrial Sections

- Mining and quarrying turnover fell by 6.7%.
- Manufacturing turnover rose by 17.3%.

- by Main Industrial Groupings

- Energy turnover rose by 51.8%.
- Intermediate Goods turnover rose by 11.2%.
- Capital Goods turnover fell by 13.2%.
- Consumer Durables turnover rose by 2.7%.
- Consumer Non-Durables turnover rose by 3.1%.

In addition, the increase of the Turnover Index in Industry by 16.8% in June 2008, as compared to June 2007, was due to the annual changes of the indices of the markets as following:

- The Turnover Index in Industry for the domestic market rose by 17.7%.
- The Turnover Index in Industry for the non-domestic market rose by 15.8%.

The increase of the Turnover Index in Industry for the non-domestic market by 15.8% in June 2008, as compared to June 2007, was due to the annual changes as following:

- The Turnover Index in Industry for the Eurozone countries rose/fell by 50.0%.
- The Turnover Index in Industry for the non-Eurozone countries rose/fell by 5.1%.
