---

<sup>1</sup> The Turnover Index in Industry is a short-term index with base year 2005=100.0, covering the period from 2005 onwards. The compilation and publication of this index is based on the framework of requirements of the Council Regulation (EC) No 1165/98 concerning short-term statistics (STS-R), as well as the amendment Regulation (EC) No 1158/05 of the European Parliament and Council, amending the Council Regulation (EC) No 1165/98.

<sup>2</sup> The Turnover Index is an important business indicator and shows the monthly evolution of the market of goods and services in industry. The purpose of this index is to measure the monthly activity of the industrial sector in terms of value. Turnover comprises the totals invoiced (without VAT) by the observation units during the reference period and corresponds to the market sales of goods or services supplied to third parties. The purposes and the characteristics of the Turnover Index apply, as well, to the indices for the distinction between domestic and non-domestic turnover.

<sup>3</sup> The revision of the Turnover Index in Industry with base year 2005=100.0 is done in the framework of the Short – Term Statistics (STS) Council Regulation (EC) No 1165/98 concerning short-term statistics. According to this regulation the index in question is updated every five years, in years ending in 0 or 5. At this revision has been applied (Council Regulation 1893/2006) the new Eurostat classification NACE Rev.2 (at the level of categories of economic activity). In addition, at product level has been applied the new Eurostat classification CPA 2008 (Council Regulation 451/2008). The Turnover Index in Industry covers the whole country and is compiled for all activities listed in Sections B (mining and quarrying) and C (manufacturing) of the NACE Rev.2 classification.

<sup>4</sup> The weights, taking into consideration the need to distinct turnover to domestic and non-domestic market with a further split of the non-domestic market to Eurozone and non-Eurozone market, are based on the total turnover values of the products that were disposed to the domestic and to the two zones of the non-domestic market, during the base year (2005=100.0), according to the results of the Annual Industrial Survey, the annual PRODCOM Survey, the annual Mining – Quarrying Survey and the annual External Trade Survey of the year 2005.

<sup>5</sup> The data is provisional when first released and become final as soon as all gathered data become definite. More specifically, the data released for the most recent month is provisional and is published together with revised data of the previous month, which are indicated as such.

The decrease of the Turnover Index in Industry by 20.4% in March 2009, as compared to March 2008, was due to the annual changes as following:

- by Industrial Sections

- Mining and quarrying turnover fell by 15.5%.
- Manufacturing turnover fell by 20.5%.

- by Main Industrial Groupings

- Energy turnover fell by 28.3%.
- Intermediate Goods turnover fell by 24.5%.
- Capital Goods turnover fell by 18.7%.
- Consumer Durables turnover fell by 12.3%.
- Consumer Non-Durables turnover fell by 4.8%.

In addition, the decrease of the Turnover Index in Industry by 20.4 % in March 2009, as compared to March 2008, was due to the annual changes of the indices of the markets as following:

- The Turnover Index in Industry for the domestic market fell by 20.7%.
- The Turnover Index in Industry for the non-domestic market fell by 20.1%.

The decrease of the Turnover Index in Industry for the non-domestic market by 20.1% in March 2009, as compared to March 2008, was due to the annual changes as following:

- The Turnover Index in Industry for the Eurozone countries fell by 25.8%.
- The Turnover Index in Industry for the non-Eurozone countries fell by 15.9%.
