

Piraeus 22 March 2010

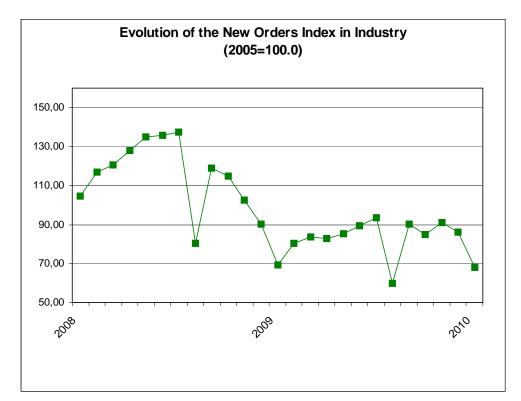

# PRESS RELEASE

The New Orders Index in Industry recorded a fall of 2.0% in January 2010 as compared to January 2009.

## NEW ORDERS INDEX IN INDUSTRY: January 2010

The New Orders Index in Industry (both domestic and non-domestic market) in January 2010 as compared to January 2009 recorded a fall of 2.0%. A year earlier, the annual rate of change of the New Orders in Industry was -33.7%.

The average New Orders Index in Industry for the 12-month period February 2009 – January 2010, as compared to the 12-month period February 2008 – January 2009, fell by 26.2%. A year earlier, the corresponding average rate of change of the New Orders Index in Industry was -3.8%.

Information:

Economic and Short-Term Indicators Division

**Production Indices Section** 

Diamantaki Aikaterini Tel: 0030 210 4852122 Fax: 0030 210 4852738 The decrease of the New Orders Index in Industry by 2.0% in January 2010, as compared to January 2009, was due to the annual changes of the indices of the markets as following:

- The New Orders Index in Industry for the domestic market fell by 6.1%.
- The New Orders Index in Industry for the non-domestic market rose by 4.1%.

The increase of the New Orders Index in Industry for the non-domestic market by 4.1% in January 2010, as compared to January 2009, was due to the annual changes as following:

- The New Orders Index in Industry for the Eurozone countries fell by 0.6%.
- The New Orders Index in Industry for the non-Eurozone countries rose by 7.8%.

#### **METHODOLOGICAL NOTES**

- **Generally** The New Orders Index in Industry is an important business indicator and shows the monthly demand of the market of goods and services in industry. This Index was first compiled by the National Statistical Service of Greece in 2006, with base year 2000=100.0.
- **Purpose of the index** The purpose of this index is to assess the future evolution of demand for goods and services in industry as an indication of future production. An order is defined as the value of the contract linking a producer and a third party in respect of the provision by producer goods and services. The New Orders Index is also suitable to indicate whether the demand originates from the domestic or the non-domestic market.
  - Legal basis The compilation and publication of this index is based on the framework of requirements of the Council Regulation (EC) No 1165/98 concerning short-term statistics (STS-R), as well as the amendment Regulation (EC) No 1158/05 of the European Parliament and Council, amending the Council Regulation (EC) No 1165/98. Furthermore, this index is governed by the Regulation (EEC) No.1893/2006 of the European Parliament and of the Council, by the Commission Regulation (EEC) No.656/2007 and by the Regulation (EEC) No.451/2008 of the Council.
  - Reference period Month
    - Base year 2005=100.0.
      - **Revision** The last revision of the New Orders Index in Industry with base year 2005=100.0 is done in the framework of the Short Term Statistics (STS) Council Regulation (EC) No 1165/98 concerning short-term statistics. According to this regulation the index in question is updated every five years, in years ending in 0 or 5.
    - Statistical At the level of categories of economic activities the new Eurostat classification NACE Rev. 2 was used (Regulation 1893/2006), while at the level of main industrial groups, the allocation of two-digit and three-digit NACE Rev. 2 headings to categories of aggregate classification was used, in accordance with the Commission Regulation 656/2007. At product level, the new Eurostat classification CPA 2008 was used, according to the Council Regulation 451/2008.
    - Geographical The Index covers the whole country.
- **Coverage of economic** activities The New Orders Index in Industry covers the whole country and is compiled for the activities listed in Section D (manufacturing) of the NACE Rev.2 classification and specifically only for the divisions: 13, 14, 17, 20, 21, 24, 25, 26, 27, 28, 29 and 30.
  - **Computation of the** Index The New Orders Index in Industry is a fixed base index. This index is calculated initially at the four-digit level of economic activity and subsequently, with the implementation of appropriate weighting coefficients, the index is calculated at higher levels (three-level, two-level and onelevel of economic activity) or at the level of Main Industrial Groupings (MIGs).
  - Publication of data The New Orders Index with the new base year (2005) is released from April 2009 with January 2009 as first reference month. The availability of data with base year 2005=100.0 starts from January 2000.
    - **References** More information about the methodology for the compilation and calculation of the index and for the time series is available in the HSA website (www.statistics.gr).
