## PRESS RELEASE

### NEW ORDERS INDEX IN INDUSTRY: July 2013

The New Orders Index in Industry (both domestic and non-domestic market) in July 2013 compared with July 2012 recorded an increase of 0.8%. In July 2012, the annual rate of change of the New Orders Index in Industry was -14.8%.

The average New Orders Index in Industry for the 12-month period from August 2012 to July 2013, compared with the 12-month period from August 2011 to July 2012, decreased by 5.4%. In July 2012, the corresponding average rate of change of the New Orders Index in Industry was -7.8%.

The increase of the New Orders Index in Industry by 0.8% in July 2013, compared with July 2012, was due to the annual changes of the indices of the markets as following:

- The New Orders Index in Industry for the domestic market decreased by 3.2%.
- The New Orders Index in Industry for the non-domestic market increased by 3.9%.

The increase of the New Orders Index in Industry for the non-domestic market by 3.9% in July 2013, compared with July 2012, was due to the annual changes as following:

- The New Orders Index in Industry for the Eurozone countries increased by 9.5%.
- The New Orders Index in Industry for the non-Eurozone countries increased by 0.7%.

## METHODOLOGICAL NOTES

<b>Generally</b>	The New Orders Index in Industry is being compiled since 2006.
<b>Purpose of the index</b>	The purpose of this index is to assess the future evolution of demand for goods and services in industry as an indication of future production. An order is defined as the value of the contract which links a producer and a third party in respect of the provision of goods and services by producer. The New Orders Index is also suitable to indicate whether the demand originates from the domestic or the non-domestic market.
<b>Legal basis</b>	The compilation and publication of this index is based on the framework of requirements of the Council Regulation (EC) No 1165/98 concerning short-term statistics (STS-R), as well as the amendment Regulation (EC) No 1158/05 of the European Parliament and Council, amending the Council Regulation (EC) No 1165/98. Furthermore, this index is governed by the Regulation (EEC) No.1893/2006 of the European Parliament and of the Council, by the Commission Regulation (EEC) No.656/2007 and by the Regulation (EEC) No.451/2008 of the Council.
<b>Reference period</b>	Month
<b>Base year</b>	2005=100.0.
<b>Revision</b>	The last revision of the New Orders Index in Industry with base year 2005=100.0 is done in the framework of the Short – Term Statistics (STS) Council Regulation (EC) No 1165/98 concerning short-term statistics. According to this regulation the index in question is updated every five years, in years ending in 0 or 5.
<b>Statistical classifications</b>	At the level of categories of economic activities the new Eurostat classification NACE Rev. 2 was used (Regulation 1893/2006), while at the level of main industrial groups, the allocation of two-digit and three-digit NACE Rev. 2 headings to categories of aggregate classification was used, in accordance with the Commission Regulation 656/2007. At product level, the new Eurostat classification CPA 2008 was used, according to the Council Regulation 451/2008.
<b>Geographical coverage</b>	The Index covers the whole country.
<b>Coverage of economic activities</b>	The New Orders Index in Industry covers the whole country and is compiled for the activities listed in Section D (manufacturing) of the NACE Rev.2 classification and specifically only for the divisions: 13,14,17, 20, 21, 24, 25, 26, 27, 28, 29 and 30.
<b>Computation of the Index</b>	The New Orders Index in Industry is a fixed base index. This index is calculated initially at the four-digit level of economic activity and subsequently, with the implementation of appropriate weighting coefficients, the index is calculated at higher levels (three-level, two-level and one-level of economic activity) or at the level of Main Industrial Groupings (MIGs).
<b>Publication of data</b>	The New Orders Index with the new base year (2005) is being released since April 2009 with January 2009 as first reference month. Data with base year 2005=100.0 are available from January 2000 onwards.
<b>References</b>	More information about the methodology concerning the compilation and calculation of the index and for the time series is available on the Hellenic Statistical Authority (ELSTAT) website ( <a href="http://www.statistics.gr">www.statistics.gr</a> ).
