The tables and the diagrams that follow present the evolution of the indices from 2005 onwards

¹ The compilation and publication of these new indices in Transport Sector is based upon the requirements of the Council Regulation (EC) No 1165/98 concerning short-term statistics as well as the amendment Regulation 1158/2005 of the European Parliament and Council amending the Council Regulation (EC) No 1165/98.

The turnover indices in services are important business indicators, which show the evolution of the market for services.

The objective of these indices is to calculate the activity of the surveyed sector in value terms.

The Turnover comprises the totals invoiced by the observation unit during the reference period (quarter) and corresponds to the market sales of goods and services supplied to third parties. Subsidies on goods or services are also included. Turnover excludes VAT and other similar deductible taxes directly linked to turnover as well as all duties and taxes on the goods or services invoiced by the unit. Income classified as other operating income, financial income and extraordinary income in company accounts is also excluded from turnover.

The Turnover Indices in Transport Sector cover the total of the country and are compiled for divisions **49** – land transport / transport via pipelines, **50** – water transport, **51** – air transport, **52** – warehousing and support activities for transportation and **79** - travel agency, tour operator reservation service and related activities of **NACE – Rev.2. statistical classification**.

For reasons of comparison the Turnover Indices, concerning the years 2005 till 2008, for divisions **52** and **79** have been recalculated according to NACE Rev.2.
