

PRESS RELEASE

INDEX OF WAGES COST: 1st quarter 2022

The Hellenic Statistical Authority (ELSTAT) announces the quarterly Index of Wages Cost for the whole Economy¹ excluding Primary Sector and Activities of Households, for the 1st quarter 2022. More specifically:

- The unadjusted Index of Wages Cost (not seasonally adjusted and not adjusted for the number of working days) for the 1st quarter 2022, compared with the corresponding index of the 1st quarter 2021, recorded a decrease of 1.3%, while an increase of 6.6% was recorded when comparing the corresponding index of 2021 with that of 2020 (Table 1, Index I).
- The Index of Wages Cost for the 1st quarter 2022, seasonally adjusted but not adjusted for the number of working days, recorded a decrease of 1.9%, compared with the corresponding index of the 1st quarter of 2021, while an increase of 5.8% was recorded when comparing the corresponding index of 2021 with that of 2020 (Table 1, Index II).
- The Index of Wages Cost for the 1st quarter 2022, adjusted for the number of working days but not seasonally adjusted, recorded a decrease of 1.8% compared with the corresponding index of the 1st quarter of 2021, while an increase of 6.5% was recorded when comparing the corresponding index of 2021 with that of 2020 (Table 1, Index III).

Graph 1 below presents the evolution of the Index of Wages Cost for the period from the 1st quarter 2008 to the 1st quarter 2022 (Not Adjusted, Seasonally Adjusted and Working Days Adjusted), while Graphs 2-4 depict the Index and the annual rates of change for the 1st quarter of 2008-2022.

EXPLANATORY NOTES

General The Index of Wages Cost for Sections B-S of NACE Rev. 2 is a Laspeyres quarterly index with base year the year 2016 (2016=100.00).

Purpose of the index The purpose of this index is to record the evolution of the hourly labour costs by branch of economic activity (Sections B-S of the European classification of economic activities. NACE Rev. 2).

Definitions Data for the calculation of the Index are collected with the Labour Cost and Job Vacancies survey which is conducted on a quarterly basis.

The statistical population is the total number of enterprises employing at least five (5) employees and belong to sections B-S of Nace Rev.2. The survey covers the entire Country.

The one-stage stratified sampling method was applied, using the enterprise as a surveyed unit. The strata are derived from the combinations of the 2-digit code of economic activity (NACE Rev.2) and the enterprise size class.

The sampling frame is the current Business Register of ELSTAT.

The survey is conducted by visits on enterprise premises by means of printed questionnaires (PAPI).

The Index of Wages Cost for each Section of NACE Rev. 2 is calculated as the ratio of the hourly wage of each reference quarter to the annual average hourly wage of the base year 2016.

The hourly wage is defined as the ratio of the gross earnings to the hours worked.

Gross earnings include salaries and wages (regular payments and overtime payments), bonuses and extraordinary bonuses (Christmas and Easter bonuses, annual leave and other kind of bonuses not paid on a regular basis), as well as payments for days not worked (e.g. holidays, national holidays, maternity leave, child benefits, severance payments until the 4th quarter of 2012, etc).

From the 1st quarter of 2013 and thereafter the severance payments are not included in the gross earnings.

The compilation of the indices was based on data collected by enterprises and the use of an estimation method for the calculation of the missing data.

For the calculation of the quarterly aggregate Labour Cost Index (LCI) of a group of Sections, the LCI of each Section is weighted on the basis of the contribution of the annual labour cost of employees of this section in the previous year to the total labour cost of employees of all sections of the group in the above year.

Legal Framework The Index of Wages Cost for the sections B-S is one of the main components of the LCI and it is compiled by virtue of the Regulation (EC) 450/2003 and the Implementing Regulation (EC) 1216/2003 of the European Parliament and of the Council.

The Index of Wages Cost is also made available to and released by international organizations (EUROSTAT, IMF).

Statistical Classification NACE Rev. 2 classification of economic activities is used. The Sections covered by the index are B to S.

Sections of Economic Activity	Sections of Economic Activity NACE Rev. 2	Description
	B	Mining and quarrying
	C	Manufacturing
	D	Electricity, gas, steam and air conditioning supply
	E	Water supply, sewerage, waste management and remediation activities
	F	Construction
	G	Wholesale and Retail Trade, Repair of Motor Vehicles and Motorcycles
	H	Transportation and Storage
	I	Accommodation and Food Services Activities
	J	Information and Communication
	K	Financial and insurance activities
	L	Real Estate Activities
	M	Professional, scientific and technical activities
	N	Administrative and support service activities
