

StatRun

General Information

The Hellenic Statistical Authority (ELSTAT) presents for the first time an entertaining-educational e-game. It is one of the actions included in ELSTAT strategy for "Fostering Statistical Literacy in Greece. The e-game is available in Greek and English.

The development is part of Eurostat project ESS. VIP: Digital Communication, User Analytics, and Innovative Products (DIGICOM). This is one of the projects of the Vision 2020 for the European Statistical System (ESS) and aims to modernise the communication and dissemination of European statistics.

The application has been developed by ELSTAT in collaboration with InDigital. The action has been funded by the EU.

What is StatRun

StatRun is an entertaining - educational e-game, which belongs to the category Endless Runner. The application is available for web, Android. in Augmented Reality/AR version and in Virtual Reality/VR version.

Theme of the game:

Children go out and run on the city streets to collect points. But they have to pay attention to the obstacles that appear along the way. Every time they stumble on an obstacle there is a challenge, a question related to statistics, which they have to answer in order to continue.

Aim of the game:

Students' familiarisation with basic statistical concepts.

*The content of the application is the responsibility of ELSTAT. The European Commission is not responsible for this content and its use.
