

Piraeus, 15 June 2022

# **PRESS RELEASE**

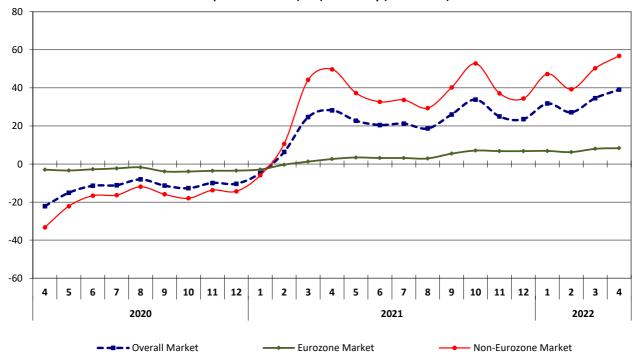

## IMPORT PRICE INDEX IN INDUSTRY: April 2022, y-o-y increase of 39.1%

The Overall Import Price Index (MPI) in Industry with base year 2015=100.0 in April 2022 recorded an increase of 39.1% compared with April 2021. The corresponding index in April 2021 had recorded an increase of 28.2% compared with April 2020 (Table 1.I).

The Overall Index in April 2022 recorded an increase of 5.0% compared with March 2022. The corresponding index in April 2021 had recorded an increase of 1.7% compared with March 2021 (Table 1.II).

The twelve-month average Overall Index from May 2021 to April 2022, increased by 27.3% in comparison with the corresponding index of the period from May 2020 to April 2021, while the decrease recorded between the previous twelve-month periods amounted to 4.0% (Table 4).

The time series of MPI are available on the website of ELSTAT, at: <a href="http://www.statistics.gr/en/statistics/-/publication/DKT18/-">http://www.statistics.gr/en/statistics/-/publication/DKT18/-</a>

## 1. Annual rates of change: April 2022 compared with April 2021

The increase of 39.1% in the Overall Import Price Index in Industry in April 2022 compared with April 2021 is on account of the yearly changes of the sub-indices of the markets as follows:

a. 56.8% increase in the MPI of the Non-Eurozone Market (Table 3.I).

b. 8.3% increase in the MPI of the Eurozone Market (Table 2.I).

More specifically, the aforementioned increase was the result of the yearly changes mainly of the sub-indices in the following NACE Rev.2 divisions:

Code	Division	Rates of change (%)
35	Electricity, gas, steam and air conditioning supply	221.1
19	Manufacture of coke and refined petroleum products	95.1
06	Extraction of crude petroleum and natural gas	82.3
24	Manufacture of basic metals	30.7
16	Manufacture of wood and of products of wood and cork	15.2
17	Manufacture of paper-pulp, paper and paper products	13.9
20	Manufacture of chemicals and chemical products	9.7
10	Manufacture of food products	9.6
26	Manufacture of computer, electronic and optical products	7.4
27	Manufacture of electrical equipment	4.3
29	Manufacture of motor vehicles, trailers and semi-trailers	4.3
22	Manufacture of rubber and plastic products	3.9

### 2. Monthly rates of change: April 2022 compared with March 2022

The increase of 5.0% in the Overall Import Price Index in Industry in April 2022 compared with March 2022 is on account of the monthly changes of the sub-indices of the markets as follows:

a. 7.0% increase in the MPI of the Non-Eurozone Market (Table 3.II).

b. 0.5% increase in the MPI of the Eurozone Market (Table 2.II).

More specifically, the aforementioned increase was the result of the monthly changes mainly of the sub-indices in the following NACE Rev.2 divisions:

Code	Division	Rates of change (%)
35	Electricity, gas, steam and air conditioning supply	206.5
12	Manufacture of tobacco products	11.9
06	Extraction of crude petroleum and natural gas	7.7
16	Manufacture of wood and of products of wood and cork	2.6
24	Manufacture of basic metals	2.0
17	Manufacture of paper-pulp, paper and paper products	1.5
20	Manufacture of chemicals and chemical products	1.4
10	Manufacture of food products	1.3
27	Manufacture of electrical equipment	0.7
26	Manufacture of computer, electronic and optical products	0.7
28	Manufacture of machinery and equipment n.e.c.	0.3
19	Manufacture of coke and refined petroleum products	-3.3

METHODOLOGICAL NOTES

Generally	The Import Price Index (MPI) in Industry, in its current form, has been compiled since January 2005, when it replaced the Final Products Wholesale Price Index with foreign final products from abroad. The Import Price Index (MPI) in Industry was recently revised with base year 2015=100.0 and the previous time series were adjusted accordingly.
Purpose of the index	The purpose of the Import Price Index (MPI) in Industry is to measure the monthly rates of change of the prices of products in the sectors of mining, manufacturing and energy that are imported from abroad and are transferred, through their purchase, to resident units-enterprises irrespective of their branch of economic activity.
Definitions	The Import Price Index is a monthly index and it is composed by the sub-indices of the import prices of the two market zones: the eurozone and the non-eurozone countries depending on the country of origin of imports.
	The collected values of imported products are CIF (Cost Insurance Freight) prices at the Greek border, free of all taxes and duties payable by the importing enterprises. This means that they include the product transport (freight) and insurance costs incurred by the enterprise for their importation.
	The price data for the compilation of the MPI are collected from units-enterprises that import the goods that have been selected at the initial stage. The prices refer mainly to the transactions between the resident enterprises that import products and the enterprises established abroad which act as exporters of products to Greece.
Legal framework	The compilation of MPI is governed by Council Regulation (EC) 1165/1998 "concerning short-term statistics" and by the Regulation 1158/2005 (amending the above mentioned Regulation) of the European Parliament and of the Council. Furthermore, the MPI is governed by Regulation (EC) 1893/2006 of the European Parliament and of the Council, by Commission Regulation (EC) 656/2007 and the Regulation (EC) 451/2008 of the Council, by Regulation (EU) 2019/2152 of the European Parliament and of the Council on European business statistics (EBS-Regulation), as well as the Commission Implementing Regulation (EU) 2019/2152.
Reference period	Month.
Base year	2015=100.0.
Revision	The MPI is a fixed base index. The index was revised with the new base year 2015 = 100.0 by virtue of
	Council Regulation (EC) 1165/1998, according to which the short-term statistics indices are revised every five (5) years and more specifically with base years ending in 0 or 5.
Statistical classifications	
Statistical classifications Geographical coverage	five (5) years and more specifically with base years ending in 0 or 5. At the level of branches of economic activities the statistical classification of economic activities NACE Rev.2 of EU is used (Regulation 1893/2006), while at the level of main industrial groupings, the allocation of two- digit and three-digit NACE Rev.2 headings to categories of aggregate classification is used, in accordance with Commission Regulation 656/2007. At product level, the statistical classification CPA 2008 of EU is used, according to the Council Regulation 451/2008. The index covers the whole of the country, with data from Attiki and other 31 Regional Units of the
