## LABOUR FORCE SURVEY: 4<sup>th</sup> quarter 2022

The Hellenic Statistical Authority (ELSTAT) announces the results of the Labour Force Survey for the fourth quarter of 2022.

More specifically, during the fourth quarter of 2022:

- The number of **persons employed** amounted to 4,135,231, recording a decrease by 1.9% compared to the previous quarter and an increase by 2.0% compared to the same quarter of the previous year (Tables 1, 2).
- The number of **unemployed persons** amounted to 558,416, recording an increase by 0.5% compared to the previous quarter and a decrease by 9.6% compared to the same quarter of the previous year (Tables 1, 4). The unemployment rate for the fourth quarter of 2022 was 11.9% (Table 1). The unemployment rate was 11.6% in the previous quarter (2022 Q3) and 13.2% in the corresponding quarter of the previous year (2021 Q4).
- The number of **persons outside the labour force**, i.e., the persons who are neither working nor looking for a job, amounted to 4,351,018. In particular, persons outside the labour force **under the age of 75**, amounted to 3,130,986. Their share increased by 2.3% compared with the previous quarter and decreased by 1.7% compared to the same quarter of the previous year (Tables 1, 5).

The highest unemployment rates are observed among women, persons aged up to 24 years, in the Region of Thessalia (Thessaly), and persons that have completed less than primary education. The highest percentage of the labour force is observed among men, persons aged 30-44 years, in the Region Attiki (Attica), persons that have completed post-secondary education and persons of foreign citizenship (Table 1).

(1) The definitions of the characteristics that are presented in Table 1 and the other tables of the press release can be found in the **Explanatory notes**, at the end of the press release, under “**Definitions**”.

(2) Any difference between the grand total and the sum of the detailed categories is due to rounding.

## II. CHARACTERISTICS OF EMPLOYED PERSONS

Table 2 presents the number of employed by professional status, occupation, full-time and part-time employment, permanent and temporary job, for the 4th quarter of 2022. Furthermore, the table includes the corresponding data for the previous quarter and the same quarter one year ago, as well as the corresponding quarterly and annual rates of change.

Temporary	261.0	6.3	346.6	255.6	-24.7	2.1

In the 4th quarter of 2022, the majority of the employed are working as employees (69.6%), whereas a significant share is working as self-employed without employees (19.8%).

Part-time employment amounts to 8.1%, while the share of persons with temporary jobs is 6.3%. Part-time employment has increased in comparison with the previous quarter (10.1%) and decreased compared to the corresponding quarter of the previous year (-9.2%). Temporary jobs have decreased compared to the previous quarter (-24.7%) and increased compared to the corresponding quarter of the previous year (2.1%).

The occupations gathering the biggest shares of the employed are professionals (22.4%) and service workers and shop and market sale workers (20.9%). In comparison with the previous quarter the largest increase occurs for professionals (2.9%) while the largest decrease is observed in service workers and shop and market sale workers (-8.7%). In comparison with the same quarter of 2021, the largest increase occurs in plant and machine operators and assemblers (9.5%) while a decrease is observed in in service workers and shop and market sale workers (-6.0%) and in technicians and associate professionals (-4,4%) (Table 2).

As of the 1<sup>st</sup> quarter 2011, an increase in the share of low skilled non-manual occupations <sup>(3)</sup> is observed – a trend that is reversed to a certain degree since 2021. During the same period, the share of skilled manual occupations decreases but, however, is increased since 2021. The share of highly skilled non-manual occupations increased slightly while the share of elementary occupations remains relatively stable since 2011. The share of workers in agriculture, forestry, animal husbandry and fishing has been declining since 2014 (Graph 2).

**Graph 2: Percentage of employed by broad categories of occupations**

Table 3 presents the number of the employed by section of economic activity in the 4th quarter of 2022. Furthermore, the table includes the corresponding data for the previous quarter and the same quarter one year ago, as well as the corresponding quarterly and annual rates of change.

(3) It should be noted that from 2011 onward the new ISCO-08 is used for the classification of occupations and as a result, a sudden decrease is observed for “Highly skilled non-manual” occupations and a corresponding increase for “Low skilled non-manual” occupations. Nevertheless, a steady increase in the share of “Low skilled non manual” occupations is being observed from 2011 onwards.

As regards the evolution of the percentage of people employed in broad sectors of economic activity during the period Q1 2011 - Q4 2022, fluctuations are observed in the percentage of those working in the sector that includes trade, transport and communications, hotels and food service. A decrease is observed in the percentage of those working in the construction sector, while stabilizing trends are observed in the industry-energy and financial, real estate, renting and business activities sectors (Graph 3).

**Graph 3: Percentage of employed persons by broad groups of economic activity**

Most of the employed (49.5%) report having worked 40 - 47 hours in the reference week while a significant share (19.2%) reports having worked for 48 hours and more. Most of the employed persons (78.1%) worked the usual hours during the reference week. 7.1% of them state that they wish to work more hours, 3.1% are part-time workers who wish to work more, and they are available to start working more in the next two weeks, and 1.5% of the employed report having more than one job (Graph 4).

Most of the persons outside the labour force, 15-74 years old, have not worked in the past (46.4%) or they worked for the last time 8 years ago and more (28.6%). Among the persons that worked for the last time during the previous eight years, the majority stopped working due to retirement (55.7%) or because it was a job of limited duration that ended (21.6%).

92.1% of the persons outside the labour force state that they do not want to work. 1.2% of the persons outside the labour force are seeking a job but are not currently available to start working, while 4.6% of them want to work, are available for work in the next two weeks but are not seeking work.

(5) Persons who worked for the last time more than 8 years ago, are not asked why they stopped working.

## EXPLANATORY NOTES

**Labour Force Survey** The Labour Force Survey produces estimates since 1981 (second Quarter of the year). From 1998 onwards it is a continuous quarterly survey. The main statistical objective of the Labour Force Survey is to divide the population of working age (15 years and over) into three mutually exclusive and exhaustive groups - persons in employment, unemployed persons and persons outside the labour force. In addition, the Labour Force Survey collects information on demographic characteristics, main job characteristics, the existence and characteristics of a second job, educational attainment, participation in education, previous working experience and search of a job.

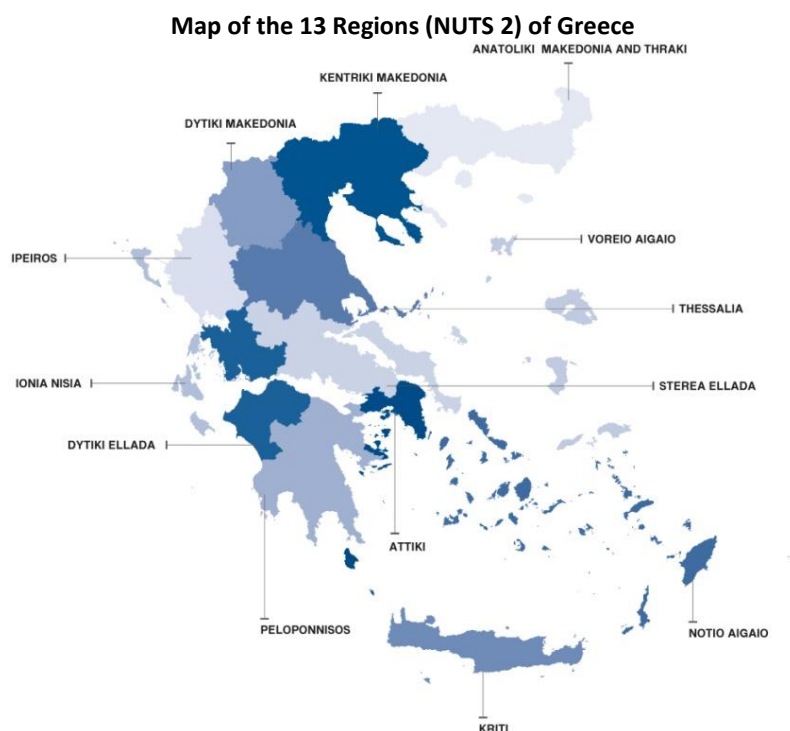

**Legislation** The current survey is fully harmonized with European legislation. The basic act is Regulation (EC) No 2019/1700 of the European Parliament and of the Council establishing a common framework for European statistics relating to persons and households, which is in force since 1/1/2021 and replaced Regulation (EC) 577/98. Implementing Regulation (EU) 2019/2240 sets out the design and characteristics of the survey and Implementing Regulation (EU) 2019/2241 lays down the technical elements of the monthly unemployment data.

**Reference Period** The sample of the Labour Force Survey is equally allocated to the 4 (or 5) weeks of the month. Every selected household is assigned to a specific week, the reference week, running from Monday to Sunday.

- for employment, the reference period is the reference week,
- for employment seeking, the reference period is the reference week and the previous 3 weeks.

**Coverage** The survey covers all members of the private households, who are residing at least one year in Greece and excludes the members of collective households (i.e. hospitals, hotels, military camps, asylums, homes for the elderly, orphanages, etc).

**Geographical classification** The geographical classification is based on Nomenclature of Territorial Units for Statistics.

**Methodology** The estimates of the Labour Force Survey are produced by a suitable unbiased estimator, which takes into account: a) the probability of selection of every sampled household, b) the response rate in every primary sampling unit, c) the allocation of population by NUTS 2 Regions, gender and age group, and d) the distribution of private households to Greece total. As of January 2021, data are collected via electronic questionnaire (CATI, CAPI).

**Definitions** **Employed:** comprise persons aged 15 to 89 (in completed years at the end of the reference week) who, during the reference week, were in one of the following categories:

- a) persons who during the reference week worked for at least 1 hour for pay or profit, including contributing family workers
- b) persons with a job or business who were temporarily not at work during the reference week but had an attachment to their job, where the following groups have a job attachment:
- persons not at work due to holidays, working time arrangements, sick leave, maternity or paternity leave;
  - persons in job-related training;
  - persons on parental leave, either receiving and/or being entitled to job-related income or benefits, or whose parental leave is expected to be 3 months or less;
  - seasonal workers during the off-season, where they continue to regularly perform tasks and duties for the job or business, excluding fulfilment of legal or administrative obligations;
  - persons temporarily not at work for other reasons where the expected duration of the absence is 3 months or less.

*Note: contributing family workers, persons in own-use production work, voluntary workers, unpaid trainees and individuals involved in other forms of work are defined in the 19th International Conference of Labour Statisticians (ICLS) Resolution concerning statistics of work, employment and labour underutilisation, adopted on 11 October 2013.*

**Unemployed persons** comprise persons aged 15 to 74 who were, during the reference week, (a) not employed, (b) currently available for work, and (c) actively seeking work, or found a job to start within a period of at most 3 months from the end of the reference week.

**Persons outside the labour force** comprise persons who were in one of the following categories: (a) aged below 15, (b) aged above 89, or (c) aged 15 to 89 and neither employed nor unemployed during the reference week, according to the definitions of employment and unemployment described above.
