HELLENIC STATISTICAL AUTHORITY

Piraeus, 13 September 2024

## ANNOUNCEMENT

### **New publication by ELSTAT with disaggregated statistical data on children (0-17 years old) from the recent Population and Housing Census**

The Hellenic Statistical Authority (ELSTAT) announces the release of a special edition titled "Children through the 2021 Population and Housing Census," which contains disaggregated data on children aged 0-17 years. **This publication offers a comprehensive and user-friendly overview of the children's population in Greece, using infographics.** Additionally, it allows users of official statistics to easily compare data across regions and with the results of the previous Census.

This edition is the result of collaboration between ELSTAT and UNICEF Greece, **as part of the recently updated [Memorandum of Cooperation](#) signed by the President of ELSTAT and Chair of the Partnership Group of the European Statistical System, Dr. Athanasios C. Thanopoulos, and the UNICEF Representative in Greece, Dr. Ghassan Khalil.** The publication provides a complete analysis of the demographic, social, and economic conditions concerning children in Greece.

The data is available online and includes the distribution of children by region, age, and gender, as well as information on household composition, parental education, living conditions, parental employment, and other important social characteristics. Comparative data with the previous Census are also included, revealing demographic changes in the child population.

**The aim of this publication is to provide the general public with a first look at the available data on children from Greece's first digital population census.** Interested parties can find more detailed information on the ELSTAT website ([www.statistics.gr](http://www.statistics.gr)), which may prove useful for both professional purposes and everyday life.

**The information presented constitutes a valuable tool for understanding the challenges faced by children and their families, contributing to the development of policies aimed at protecting children's rights, based on official statistical data.**

**DATA ON  
CHILDREN**  
AS DERIVED FROM THE  
2021 POPULATION  
AND HOUSING CENSUS
