## ANNOUNCEMENT

### New Publication by ELSTAT with Detailed Statistical Data from the Recent Population and Housing Census

The Hellenic Statistical Authority (ELSTAT) announces the publication of the detailed results from the recent Population and Housing Census, presented in four volumes, covering the four geographic Groups of Greece (NUTS 1). **This four-volume publication offers, for the first time, a comprehensive and user-friendly picture of the population and housing in Greece, utilizing infographics.** It also allows users of official statistics to easily compare regions as well as compare with the results of the previous Census.

The purpose of this publication is to provide the general public with an initial overview of the available data from Greece's first digital population census, encouraging interested parties to explore more detailed information on ELSTAT's website ([www.statistics.gr](http://www.statistics.gr)), which can prove useful for both work and everyday life.

The four volumes are available electronically and cover the following regions:

1. [Attiki](#)
2. [Voreia Ellada](#)
3. [Kentriki Ellada](#)
4. [Nisia Aigaiou, Kriti](#)

**Each volume includes detailed data on the population, household composition, education, employment, housing, and other significant social and demographic variables.** These data contribute to a deeper understanding of the demographic and social changes in Greece's population, supporting ELSTAT's strategy to promote statistical literacy and data democratization.
