Piraeus, 24 March 2026

ANNOUNCEMENT

Release of Detailed Tables of the Structure of Earnings Survey (SES), Reference Year 2022

The Hellenic Statistical Authority (ELSTAT) announces the release, for the first time, of **detailed statistical tables** of the **4-year Structure of Earnings Survey (SES) with reference year 2022**, the main results of which were published in December 2024, as well as selected demographic characteristics of employees from the survey of the previous reference years 2014 and 2018.

The release of the new tables is part of ELSTAT's efforts to enhance the availability of statistical products, in accordance with the principles of transparency and equal access to statistical information, aiming at expanding the possibilities for utilising SES results by users of statistical data, policymakers, research institutions, and other stakeholders.

The new tables include detailed data such as:

- analysis of earnings according to employer characteristics (economic activity sector, employment size class),
- analysis of earnings by employee characteristics (occupational groups, gender, age group, educational level, and employment status),
- additional data breakdowns that were not included in the Announcement of SES results in December 2024.

The tables also include indicators related to the gender pay gap, which is an important statistical area at European level.

All tables are available on the ELSTAT website, under the section "**Statistics-Population and Social Conditions-Earnings-Distribution of Earnings.**"

For additional information and clarifications, users can contact the relevant ELSTAT Section.
