

**MATERIAL PRICE INDEX IN THE CONSTRUCTION OF NEW RESIDENTIAL BUILDINGS: April 2026, y-o-y increase 4.1%**

The Overall Material Price Index in the Construction (CSTM) of New Residential Buildings with base year 2021=100.0 in April 2026 recorded an increase of 4.1% in comparison with April 2025. The corresponding index in April 2025 had recorded an increase of 3.3% compared with April 2024 (Table 1).

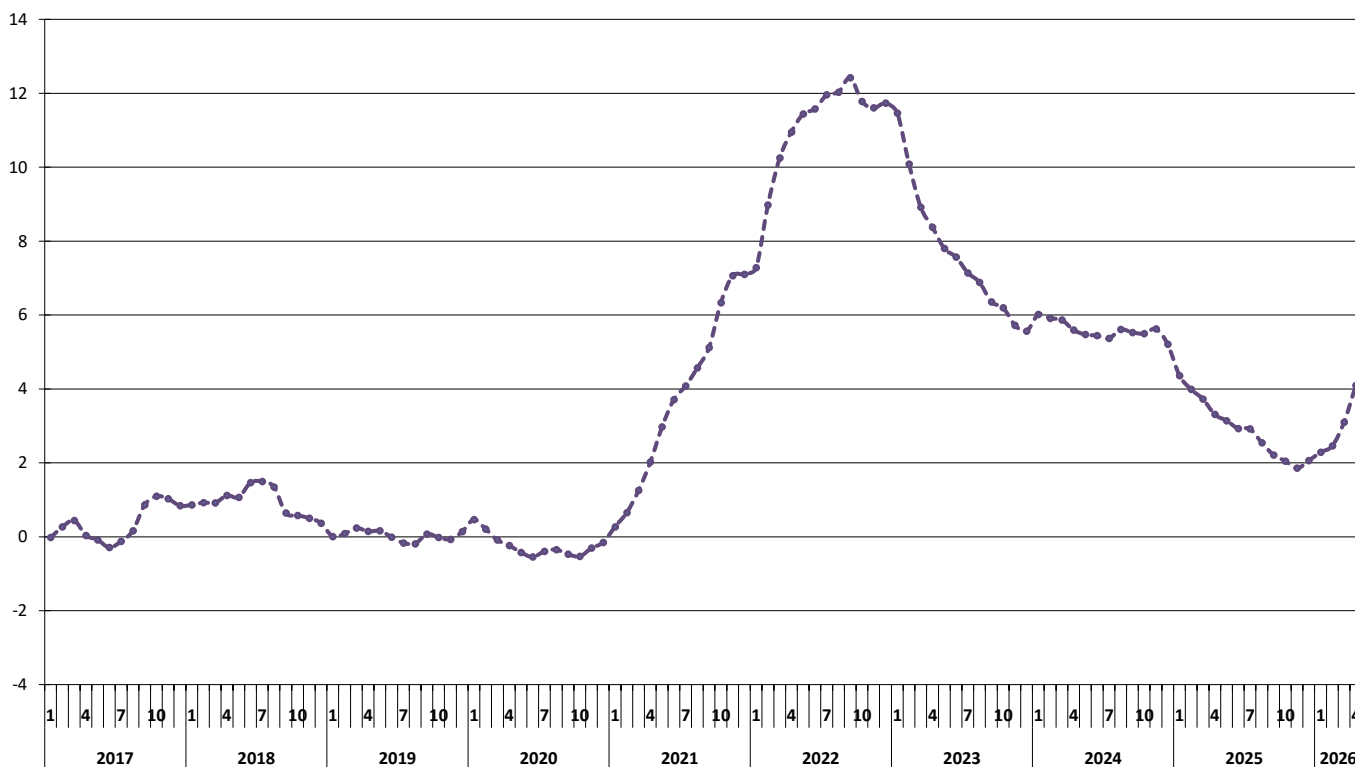

The Overall Index in April 2026, compared with the corresponding index in March 2026, recorded an increase of 1.0%. The index between April 2025 and March 2025 had recorded a decrease of 0.01% (Table 2).

The average Index for the twelve-month period from May 2025 to April 2026, compared with the corresponding index for the twelve-month period from May 2024 to April 2025, recorded an increase of 2.6%. The comparison of the average Material Price Index in the corresponding previous twelve-month periods had shown an increase of 4.9% (Table 3).

The time series of CSTM is available on the website of the Hellenic Statistical Authority (ELSTAT), at:

**Annual rates of change: April 2026 compared with April 2025**

The Overall Material Price Index in the Construction of New Residential Buildings in April 2026, compared with the corresponding index in April 2025 recorded an increase of 4.1% (Table 1). The main changes in the individual price indices of the material categories are as follows :

<b>Material categories</b>	<b>Rates of change (%)</b>
Diesel fuel	26.0
Electric energy	13.9
Cupreous Pipes	9.0
Bricks	7.5
Aluminium door and window frames	5.5
Ready-mixed concrete	5.2
Reinforcements of mortars and ready mixed concrete	3.9
Solar Heaters	3.4
Plastic pipes	3.3
Emulsion paints	3.3
Cement	3.0
Marble slabs	2.4
Parquet flooring	2.4
Steel reinforcing rods	2.2

**Monthly rates of change: April 2026 compared with March 2026**

The Overall Material Price Index in the Construction of New Residential Buildings in April 2026 recorded an increase of 1.0% in comparison with the corresponding index in March 2026 (Table 2). The main changes in the individual price indices of the material categories are as follows:

<b>Material categories</b>	<b>Rates of change (%)</b>
Bricks	2.8
Aluminium door and window frames	1.2
Ready-mixed concrete	1.1
Marble slabs	0.9
Steel reinforcing rods	0.8
Cement	0.8

**Table 1: Annual rates of change of the Material Price Index in the Construction of New Residential Buildings**

Base year: 2021=100.0

## METHODOLOGICAL NOTES

- Generally** The compilation of the Material Price Index in the Construction of New Residential Buildings started in 1971. The index with base year 2021 is compiled since April 2024, when it replaced the previous index with base year 2015.
- Purpose of the index – definitions** The purpose of the index is to measure the monthly rates of change in the prices of building materials paid by the constructors and consumed in the construction of new residential buildings. The Material Price Index is a monthly index and consists a sub-index of the Overall Costs Index in Construction of New Residential Buildings. For the compilation of the index the prices of the materials supplied, which are actually paid by the construction enterprises at the site, are collected and do not include VAT and other deductible taxes.
- Legal framework** The Material Price Index in the Construction of New Residential Buildings is compiled to cover national information needs (for the provision of more detailed statistical information to users and the calculation of the quarterly Price Index for Cost in Construction of New Residential Buildings in the framework of the implementation of Regulation (EU) 2019/2152 of the European Parliament and of the Council and Commission Implementing Regulation (EU) 2020/1197.
- Reference period** Month.
- Base year** 2021=100.0.
- Revision** The Material Price Index in the Construction of New Residential Buildings is a fixed base index. The last revision of the index, with base year 2021, was made in the context of the implementation of Regulation (EC) 2019/2152 of the European Parliament and of the Council.
- Statistical classification** A national classification is followed, which includes 85 categories of materials, aggregated in 15 groups.
- Geographical coverage** The geographical coverage of the index includes the country as a whole however prices are collected only in the biggest urban centers of the country (Greater Athens, Thessaloniki, Patra, Herakleio, Larisa and Volos).
- Coverage of economic activities** The Material Price Index in Construction of New Residential Buildings is a monthly index and consists a sub-index of the quarterly Price Index for Cost in Construction of New Residential Buildings. It is an input index and covers the transactions for the acquisition of building materials of the new residential buildings construction sector from the units / enterprises that provide these materials.
- Statistical survey** A total number of 1,490 observations (prices) collected from 260 commercial or industrial enterprises supplying building materials are used for the compilation of the index. For electricity, prices are collected from the Public Power Corporation, while for water data are provided by water supply companies.
- Publication of data** The index with the base year 2021=100.0 is released since April 2024, with March 2024 as the first reference month. Times series data with base year 2021=100.0 are available from January 2000 onwards.
- References** More information about the methodology concerning the compilation and calculation of the index and for the time series is available on the website of the Hellenic Statistical Authority (ELSTAT) (<http://www.statistics.gr/en/statistics/-/publication/DKT60/-> ).
