METHODOLOGICAL NOTES

Generally	The compilation of the Material Costs Index in the Construction of New Residential Buildings started in 1971. The index with base year 2021 is compiled since April 2024, when it replaced the previous index with base year 2015.
Purpose of the index – definitions	<p>The purpose of the index is to measure the monthly rates of change in the prices of building materials paid by the constructors and consumed in the construction of new residential buildings.</p> <p>The Material Costs Index is a monthly index and consists a sub-index of the Overall Costs Index in Construction of New Residential Buildings.</p> <p>For the compilation of the index the prices of the materials supplied, which are actually paid by the construction enterprises at the site, are collected and do not include VAT and other deductible taxes.</p>
Legal framework	The New Residential Construction Materials Price Index is compiled in the framework of the implementation of Regulation (EU) 2019/2152 of the European Parliament and of the Council concerning European business statistics and Commission Implementing Regulation (EU) 2020/1197 laying down technical specifications and arrangements in accordance with the said Regulation (EU) 2019/2152.
Reference period	Month.
Base year	2021=100.0.
Revision	The Materials Price Index for the Construction of New Residential Buildings is a fixed base index. The last revision of the index, with a new base year of 2021, was made in the context of the implementation of Regulation (EC) 2019/2152 of the European Parliament and of the Council.
Statistical classification	A national classification is followed, which includes 85 categories of materials, aggregated in 15 groups.
Geographical coverage	The geographical coverage of the index includes the country as a whole however prices are collected only in the biggest urban centers of the country (Greater Athens, Thessaloniki, Patra, Herakleio, Larisa and Volos).
Coverage of economic activities	The Material Costs Index in Construction of New Residential Buildings is a construction costs index (input index) and covers the transactions for the acquisition of building materials of the new residential buildings construction sector from the units / enterprises that provide these materials.
Statistical survey	A total number of 1,490 observations (prices) collected from 260 commercial or industrial enterprises supplying building materials are used for the compilation of the index. For electricity, prices are collected from the Public Power Corporation, while for water data are provided by water supply companies.
Publication of data	The index with the new base year 2021=100.0 is released since April 2024, with March 2024 as the first reference month. Times series data with base year 2021=100.0 are available from January 2000 onwards.
