## PRESS RELEASE

## TURNOVER INDEX IN RETAIL TRADE: September 2016

The Hellenic Statistical Authority announces the turnover and volume indices in retail trade with base year 2010=100.0 for September 2016 according to provisional and reduced data of a typical month, as follows:

- The overall turnover index in retail trade in September 2016 recorded an increase of $1.7 \%$ compared with the corresponding index of September 2015, while compared with the corresponding index of August 2016 recorded a decrease of $0.8 \%$ (tables 1,2 ).
- The overall volume index in retail trade (i.e. turnover in retail trade at constant prices) in September 2016, recorded an increase of $2.6 \%$ compared with the corresponding index of September 2015, while compared with the corresponding index of August 2016, recorded a decrease of $4.3 \%$ (tables 1,2).
- The seasonally adjusted (after eliminating the monthly effects e.g. the beginning of the school year, holidays, tourist period etc) overall turnover index in September 2016 compared with the corresponding index of August 2016 recorded an increase of 1.0\% (table 5).
- The seasonally adjusted overall volume index in September 2016 compared with the corresponding index of August 2016 recorded an increase of $1.8 \%$ (table 5).

Graph 1. Evolution of Annual Growth Rates of Turnover and Volume Index in Retail Trade
(2010=100.0)

Time series of the index is available on the ELSTAT website : http://www.statistics.gr/en/statistics/-/publication/DKT39/-

Graphs 2 and 3 depict the evolution of seasonally and non seasonally adjusted overall indices of turnover and volume in retail trade.

It should be noted that the whole series with seasonally adjusted indices is recalculated every time a new observation is added in time series. Therefore, the seasonally adjusted data differ from the published data of the previous Press Release.

## 1. Annual comparison of the turnover index

The $1.7 \%$ change of the turnover index in September 2016 compared with the corresponding index in September 2015 is due to the following changes in the main retail trade store categories:

| Specialized store categories | Annual change \% |
| :--- | ---: |
| Books, Stationery, other goods | 6.6 |
| Supermarkets | 3.5 |
| Pharmaceutical products, cosmetics | 0.3 |
| Furniture, electrical equipment, | -1.9 |
| household equipment | -2.3 |
| Automotive fuel |  |

## 2. Annual comparison of the volume index

The $2.6 \%$ change of the volume index in September 2016 compared with the corresponding index in September 2015 is due to the following changes in the main retail trade store categories:

| Specialized store categories | Annual change \% |
| :--- | ---: |
| Books, Stationery, other goods | 9.8 |
| Supermarkets | 5.0 |
| Pharmaceutical products, cosmetics | 0.6 |
| Furniture, electrical equipment, | 0.0 |
| household equipment | -0.5 |
| Automotive fuel |  |

Graph 6. Monthly rates of change (\%) of the seasonally adjusted volume index in retail trade, between September 2016 and August 2016

It should be noted that the Retail Trade Turnover and Volume Index of August 2016, which had been announced as provisional in the previous press release, has been revised, due to new available information, as follows:

| Retail Trade Store Categories | Turnover Index of August 2016 |  |  |  | Volume Index of August 2016 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Provisional | Annual change (\%) | Revised | Annual change (\%) | Provisional | Annual change (\%) | Revised | Annual change (\%) |
| Overall Index | 72.8 | -3.1 | 73.2 | -2.5 | 74.1 | -2.6 | 74.5 | -2.1 |
| Overall Index except automotive fuel | 74.4 | -1.3 | 74.9 | -0.7 | 76.5 | -1.7 | 77.0 | -1.0 |
| I. Main store categories Food sector | 86.8 | -2.3 | 87.2 | -1.8 | 82.2 | -2.8 | 82.7 | -2.2 |
| Non-food sector except automotive fuel | 61.8 | 0.7 | 62.2 | 1.3 | 71.0 | 0.9 | 71.5 | 1.6 |
| II. Specialized store categories |  |  |  |  |  |  |  |  |
| Supermarkets | 88.4 | -2.1 | 89.1 | -1.3 | 85.4 | -2.6 | 86.1 | -1.8 |
| Department stores | 77.8 | 2.8 | 77.4 | 2.2 | 97.4 | 4.1 | 97.0 | 3.6 |
| Automotive fuel | 66.4 | -11.2 | 66.4 | -11.2 | 67.4 | -4.7 | 67.4 | -4.7 |
| Food-beverages-tobacco | 76.4 | -4.0 | 75.8 | -4.8 | 71.9 | -4.5 | 71.3 | -5.3 |
| Pharmaceutical products, cosmetics | 59.7 | -2.1 | 60.3 | -1.1 | 62.1 | -2.1 | 62.7 | -1.1 |
| Clothing and footwear | 61.2 | -0.2 | 61.7 | 0.7 | 87.0 | 1.3 | 87.7 | 2.1 |
| Furniture, electrical equipment, household equipment | 50.3 | -0.6 | 50.7 | 0.2 | 60.3 | -4.9 | 60.7 | -4.3 |
| Books, Stationery, other goods | 84.0 | 5.0 | 84.0 | 5.0 | 93.6 | 6.6 | 93.6 | 6.6 |
| Retail sales not in stores | 51.6 | -1.0 | 55.9 | 7.3 | : | : | . |  |

: Volume Index for the "Retail sale not in stores" is not calculated.

The final indices of the specialized store categories of August 2016 have been changed in relation to the corresponding provisional indices published in the previous press release. The changes are due to new data of the surveyed enterprises mainly in the economic activities of "Supermarkets", "Food-beverages-tobacco", "Pharmaceutical products, cosmetics", "Clothing and footwear", "Furniture, electrical equipment, household equipment" and "Retail sales not in stores".

## METHODOLOGICAL NOTES

Generally The Retail Trade Turnover Index with the current form is being released since January 2005. The Retail Trade Turnover Index is a continuation of the Retail Sales Value Index, which had been compiled during the period 1963 to 2004.

#### Abstract

Purpose of the index - The purpose of the Retail Trade Turnover Index is to depict the evolution of the goods and definitions services market. Turnover comprises the total amounts invoiced by the enterprise during the reference period which correspond to the resale of goods without any further transformation. The data collected each month refers to the actual sales (both retail and wholesale) excluding VAT but including other duties and taxes on the goods.

Legal basis The compilation of the Retail Trade Turnover Index is governed by Council Regulation (EC) No.1165/98 of 19 May 1998 concerning short-term statistics and by Regulation (EC) No.1893/2006 of the European Parliament and of the Council of 20 December 2006 establishing the statistical classification of economic activities NACE Revision 2.

## Reference period Month

Base year 2010=100.0.

Revision Pursuant to the provisions of the Council Regulation No 1165/98 concerning short-term statistics, the index in question is revised every five (5) years, in years ending in 0 or 5 . The purpose of revising the Retail Trade Turnover Index is to adapt the index to the changes in the structure of retail trade.

Statistical The NACE Rev. 2 statistical classification of economic activities is used in conformity with the classification Regulation (EC) No 1893/2006 of the European Parliament and of the Council.

Geographical The index covers the Whole Country with data coming from 61 Regional Units. coverage
Coverage of economic activities
Statistical survey
The index covers the division 47 of NACE Rev 2 statistical classification of economic activities.
In the framework of the survey carried out for the compilation of the Retail Trade Turnover Index ( $2010=100.0$ ), it was decided to include 41,801 retail trade enterprises listed in the Business Register of ELSTAT having an annual turnover (in 2010) equal to or higher than 200.000 euro. Out of these enterprises a random sample of 1,607 enterprises was selected.

Volume Index Since 2005 onwards the Retail Trade Volume Index is also being compiled aiming at measuring changes in the volume of retail trade.

Calculating the The turnover index is calculated by the chaining method. First the moving based index is indices calculated by comparing the estimated turnover value for the current month with the corresponding value of the previous month. Afterwards the fixed base index for the current month is calculated by multiplying the moving-based index by the fixed base index of the previous month.
The indices are reduced to a typical month of equal duration. To this end the turnover estimates are multiplied by a suitable correction factor that is calculated by dividing the mean monthly number of working days in the given year by the number of the regular working days in the month under consideration.
The Retail Trade Volume Index is calculated by deflating the Retail Trade Turnover Index using the Consumer Price Index (CPI) as deflator.

Seasonal Adjustment Seasonal adjustment is the procedure followed to remove the impact of seasonality on the time series in order to improve the comparability over time. The method used is the TRAMO-SEAT method with the use of JDemetra+ 2.0.0. The whole series with seasonally adjusted indices is recalculated every time a new observation is added in time series.

Compiled index series Since the revision of the Retail Trade Turnover and Volume Indices due to the implementation of the classification NACE Rev 2, parallel time series for the indices including and not including fuels are provided. In addition, seasonally adjusted time series data are compiled.

Publication of data The time series of Retail Trade Turnover and Volume Indices $(2010=100.0)$ which include fuel have being published since 2000 by categories of aggregated economic activity classes*.

References More information on the methodology concerning the compilation and calculation of the index and for the time series is available on the ELSTAT website: http://www.statistics.gr/en/statistics/-/publication/DKT39/-
*Categories of aggregated economic activity classes in the Turnover Index:

## Super-markets

Non-specialised stores with food. beverages or tobacco predominating

## Department stores

Other retail sale in non-specialised stores

## Food-beverages-tobacco

Fruit and vegetables. meat products. fishes. crustaceans and molluscs. bread. cakes. flour confectionery and sugar confectionery. beverages. tobacco products. other retail sale of food in specialised stores

Automotive fuel
Automotive fuel in specialised stores
Pharmaceutical products. Cosmetics
Dispensing chemist. medical and orthopaedic goods. cosmetic and toilet articles in specialised stores
Clothing and footwear
Textiles. clothing.. footwear and leather goods in specialised stores
Furniture. electrical equipment. household equipment
Furniture. lighting equipment. audio and video equipment. hardware. paints and glass. electrical household appliances and other household articles. music and video recordings in specialised stores

Books. stationery and other goods
Books. newspapers and stationery. computers. peripheral units and software. telecommunications equipment. carpets. rugs. wall and floor coverings. sporting equipment. games and toys. flowers. plants. seeds. fertilisers. pet animals and pet food. watches and jewellery. other retail sale of new goods in specialised stores

## Retail sale not in stores

Retail sale via mail order houses. via Internet. via stalls and markets of other goods and other retail sale not in stores. stalls or markets
