in figures

7 October 2015

FOREWORD

The Hellenic Statistical Authority (ELSTAT) through the new quarterly publication **Greece in figures**, published in both the Greek and English languages, presents statistical data providing an updated demographic, social and economic picture of Greece in a clear and comprehensive manner.

The publication **Greece in figures** is intended for users of statistics who seek to have a comprehensive view of Greece, on the basis of the most recent statistical data. The statistical time series included in this publication are, mostly, compiled by ELSTAT. Furthermore, for comparability reasons, the publication also presents, by theme, selected tables with statistical data of EU Member States.

The publication will be updated with the most recent data on a quarterly basis and will be posted on the portal of ELSTAT on the first Wednesday of January, April, July and October.

For more information on the data and statistics provided in **Greece in figures**, please contact the Division of Statistical Information and Publications of ELSTAT (tel: +30 213 1352021, +30 213 1352301, e-mail: data.dissem@statistics.gr). We welcome any suggestions and recommendations on the content of the publication.

(2) Debt as defined in the Maastricht Treaty.

(3) For the four quarters of 2014 and the first quarter of 2015, the impact of the support to financial institutions has been positive for the General Government balance. This is due to the fees accruing on the inter-bank lending guarantees and the bond loan scheme and the revenues from bank preference shares, being greater than the expenditures accrued. For the remaining quarters, the expenditures of the support were larger than the related revenues.

- (1) As of June 2010, securitised assets are no longer derecognised from the Balance Sheet of banks that have adopted the International Accounting Standards. The counterpart of these assets is recorded on the liabilities side as "deposit liabilities to non-euro area residents".
- (2) In August 2011 domestic credit institutions registered a reduction in the value of their portfolio of Greek Government securities amounting to EUR 4 billion because of their participation in the securities exchange programme agreed by the EU Summit of 21st July 2011. In January 2012 credit institutions registered a further reduction in the value of this portfolio amounting to EUR 5.8 billion, in March 2012 a reduction of EUR 15.2 billion and in April 2012 a reduction of EUR 4.1 billion.
- (3) Revised data: as of June 2010 for oMFIs and as of June 2015 for the Bank of Greece, "capital and reserves" includes current year results and valuation adjustments. The revision was triggered by a recommendation of the relevant Eurosystem Working Group.
- (4) Greek contribution to euro area M3.
- (5) Credit to domestic non-MFI residents by domestic MFIs, including securitised loans and corporate securities that have been derecognised from the Balance Sheet.

- (6) Loans to public corporations that have been reclassified (in accordance with a decision by ELSTAT in November of 2010) from the private to the public sector are included in credit to General Government as of December 2009.
- (7) Growth rates derived from the differences in outstanding amounts corrected for loan write-offs, revaluations in security prices, exchange rate variations, reclassifications and any other changes which do not arise from transactions.

(1) Any kind of extraction of energy products from natural sources to a usable form is called primary production. Primary production takes place when the natural sources are exploited, for example in coal mines, crude oil fields, hydro power plants or fabrication of biofuels. Transformation of energy from one form to another, like electricity or heat generation in thermal power plants or coke production in coke ovens is not primary production.
