

PRESS RELEASE

IMPORT PRICE INDEX IN INDUSTRY: November 2017, y-o-y increase of 5.8%

The Overall Import Price Index in Industry (MPI) with base year 2010=100.0 in November 2017 recorded an increase of 5.8% compared with November 2016. The corresponding index in November 2016 had recorded an increase of 3.1% compared with November 2015 (Table 1.I).

The Overall Index in November 2017 recorded an increase of 1.4% compared with October 2017. The corresponding index in November 2016 had recorded a decrease of 0.4% compared with October 2016 (Table 1.II).

The twelve-month average Overall Index from December 2016 to November 2017, increased by 6.3% in comparison with the corresponding index of the period from December 2015 to November 2016 (Table 4).

The time series of MPI are available on the website of ELSTAT, at:

<http://www.statistics.gr/en/statistics/-/publication/DKT18/>

1. Annual rates of change: November 2017 compared with November 2016

The increase of 5.8% in the Overall Import Price Index in Industry in November 2017 compared with November 2016 is on account of the yearly changes of the sub-indices of the markets as follows:

- a. 0.6% increase in the MPI of the Eurozone Market (Table 2.I).
- b. 10.8% increase in the MPI of the Non-Eurozone Market (Table 3.I).

More specifically, the aforementioned increase was the result of the yearly changes of the sub-indices in the following NACE Rev.2 Divisions:

Code	Division	Rates of change (%)
06	Extraction of crude petroleum and natural gas	25.3
19	Manufacture of coke and refined petroleum products	23.4
24	Manufacture of basic metals	6.3
29	Manufacture of motor vehicles, trailers and semi-trailers	1.6
17	Manufacture of paper-pulp, paper and paper products	1.3
28	Manufacture of machinery and equipment n.e.c.	1.1
20	Manufacture of chemicals and chemical products	1.0
22	Manufacture of rubber and plastic products	0.7
10	Manufacture of food products	0.7
27	Manufacture of electrical equipment	0.7
11	Manufacture of beverages	-2.0
21	Manufacture of basic pharmaceutical products and pharmaceutical preparations	-3.2

2. Monthly rates of change: November 2017 compared with October 2017

The increase of 1.4% in the Overall Import Price Index in Industry in November 2017 compared with October 2017 is on account of the monthly 2.7% increase in the MPI of the Non-Eurozone Market (Table 3.II), while the MPI of the Eurozone Market remained unchanged (Table 2.II).

More specifically, the aforementioned increase was the result of the monthly changes of the sub-indices in the following NACE Rev.2 Divisions:

Code	Division	Rates of change (%)
19	Manufacture of coke and refined petroleum products	6.7
06	Extraction of crude petroleum and natural gas	5.6
35	Electricity, gas, steam and air conditioning supply	2.3
27	Manufacture of electrical equipment	0.4
20	Manufacture of chemicals and chemical products	0.3
17	Manufacture of paper-pulp, paper and paper products	0.2
26	Manufacture of computer, electronic and optical products	0.1
28	Manufacture of machinery and equipment n.e.c.	0.1
13	Manufacture of textiles	-0.2
24	Manufacture of basic metals	-0.3
32	Other manufacturing	-0.3
10	Manufacture of food products	-0.6

METHODOLOGICAL NOTES

Generally	The Import Price Index (MPI) in Industry, in its current form, has been compiled since January 2005, when it replaced the Final Products Wholesale Price Index with foreign final products from abroad. The Import Price Index (MPI) in Industry was revised with base year 2010=100.0 and the time series were revised accordingly.
Purpose of the index – definitions	<p>The purpose of the Import Price Index in Industry (MPI) is to measure the monthly rates of change of the prices of imported products in the sectors of mining, processing and energy and that are sold to resident enterprises irrespective of their branch of economic activity.</p> <p>The Import Price Index is a monthly index and it is composed by the sub-indices of the import prices of the two market zones: the euro-zone and the non-euro-zone countries depending on the country of origin of imports.</p> <p>The collected prices of imported products are CIF (Cost Insurance Freight) prices at the Greek border, free of all taxes and duties payable by the import enterprises. This means that they include the product transport (freight) and insurance costs incurred by the enterprise for their importation.</p> <p>The selected price data for the compilation of the MPI are collected from units-enterprises that import the goods. The prices refer mainly to the transactions between the resident enterprises that import products and the enterprises established abroad which act as exporters of products to Greece.</p>
Legal basis	The compilation of MPI is governed by Council Regulation (EC) 1165/98 “concerning short-term statistics” and by the Regulation 1158/05 (amending the above mentioned Regulation) of the European Parliament and of the Council. Furthermore, the MPI is governed by Regulation (EC) 1893/2006 of the European Parliament and of the Council, by Commission Regulation (EC) 656/2007 and the Regulation (EC) 451/2008 of the Council.
Reference period	Month.
Base year	2010=100.0.
Revision	The MPI is a fixed base index. The index was revised with the new base year 2010 = 100.0 by virtue of Council Regulation (EC) 1165/98, according to which the short-term statistics indices are revised every five (5) years and more specifically in year ending in 0 or 5.
Statistical classifications	At the level of branches of economic activities the new Eurostat classification NACE Rev.2 was used (Regulation 1893/2006), while at the level of main industrial groups, the allocation of two-digit and three-digit NACE Rev.2 headings to categories of aggregate classification was used, in accordance with Commission Regulation 656/2007. At product level, the new Eurostat classification CPA 2008 was used, according to the Council Regulation 451/2008.
Geographical coverage	The Index covers the whole of the country, with data from Attica and other 32 prefectures of the country.
Coverage of economic activities	The index covers the sections of mining-quarrying manufacturing, energy and natural gas, the main industrial groups, and all the levels of economic activities (divisions, groups, classes) and the level of imported products.
Statistical survey	The data are collected from approximately 1,061 enterprises and the total number of observations (prices) is approximately 2,620. More specifically, the following items are surveyed: 329 product codes, derived from euro-zone countries (with 13 refer as new products), and 275 product codes that originate from non-euro-zone countries (with 34 refer as new products).
Publication of data	The MPI with the new base year 2010=100.0 is released since September 2013, with July 2013 as the first reference month. Data with base year 2010=100.0 are available from 2000 onwards.
References	<p>More information on the methodology concerning the compilation and calculation of the index, as well as the time series is available on the website of ELSTAT at the following link:</p> <p>http://www.statistics.gr/en/statistics/-/publication/DKT18/</p>
