

SURVEY ON QUALITATIVE CHARACTERISTICS OF RESIDENT TOURISTS

Year 2023

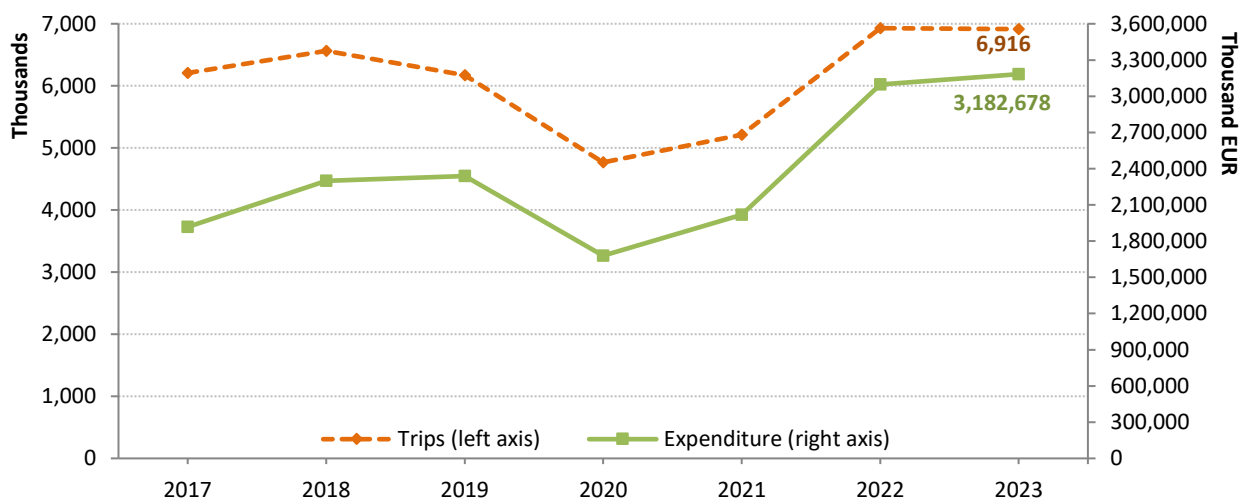

The Hellenic Statistical Authority (ELSTAT) announces the data of the Survey on the Qualitative Characteristics of Resident Tourists for the reference year 2023.

According to the survey, in 2023, the number of residents of any age who made at least one trip amounted to 4.9 million and the number of trips to 8.3 million, recording an increase of 1.7% and 0.6%, respectively, compared with 2022. The total number of nights spent amounted to 77.8 million and the relevant expenditure to 3,446.8 million euro, recording a decrease of 2.2% and an increase of 3.6%, respectively, compared with 2022 (Table 1).

According to the results of the survey, the number of residents aged 15 and over who made at least one trip in 2023 amounted to 4.1 million recording an increase of 2.4% and the number of trips amounted to 6.9 million, recording a marginal decrease of 0.2%, compared with 2022. In 2023, the total number of nights spent by these residents amounted to 66.0 million and the relevant expenditure to 3,182.7 million euro, recording a decrease of 3.8% and an increase of 2.8%, respectively, compared with 2022 (Table 1, Graph 1).

As regards the purpose of the aforementioned trips made by residents aged 15 and over, 96.6% of the trips were made for personal reasons (leisure, recreation and holidays, visiting friends and relatives, other personal reasons) and 3.4% were business trips (Graph 2).

When comparing the 2023 data on trips made for personal purposes with the corresponding 2022 data, an increase of 1.9% is observed to the number of people who made at least one trip (Table 3), of 0.4% to the number of trips (Table 4) and of 3.1% to the relevant expenditure (Table 13), whereas a decrease of 3.3% is observed to the number of nights spent (Table 9).

As regards the number of residents that made at least one trip for personal purposes, the most significant increase, in absolute values, compared with the previous year, is recorded for the age group 45-64 years with an increase of 4.5% (Table 3). For this specific age group, the number of trips increased by 4.6% (Table 6), the relevant expenditure by 6.2% (Table 14) and the nights spent by 2.2% (Table 10).

As regards the duration of personal trips, the most significant increase in 2023, in absolute values, compared with the previous year, is observed for the number of trips lasting from 4 to 7 nights, with an increase of 10.5% for the number of trips and of 9.6% for the number of nights spent (Tables 7 and 11).

Most of the personal trips were made by a land means of transport (4.7 million trips) and secondly by sea (1.0 million trips). When comparing the 2023 data with the corresponding 2022 data, the largest increase, in absolute values, is observed in the number of trips made by land means of transport, by 5.8% (Table 7).

For 55.2% of personal trips the main type of accommodation used was a non-rented one, of which 58.0% refer mainly to accommodation provided without charge by relatives and friends. Personal trips spent in non-rented accommodation account for 72.9% of the total number of nights spent. Trips spent in own holiday homes increased by 10.3%, while the corresponding nights spent recorded a marginal decrease of 0.3% (Table 12, Graph 11).

The main type of accommodation for personal trips spent in rented accommodation establishments (44.5% of personal trips) was hotels and similar establishments, representing 62.2% of such trips. Trips for which the main type of accommodation used was hotels and similar accommodation establishments recorded an increase of 4.1% in the number of trips and of 2.3% in the number of nights spent in 2023 compared with 2022 (Table 12, Graph 11).

EXPLANATORY NOTES

Survey on Qualitative Characteristics of Resident Tourists	The Survey on Qualitative Characteristics of Residents Tourists is conducted in all EU Member States. The purpose of the survey is to collect data on the characteristics of resident tourists, tourist expenditure and contribution of several socio-demographic groups in tourism and their behavior, with the aim of drawing national and European policy in the tourism sector. Data are collected for the number of tourists, trips, nights spent and expenditure incurred during these trips. Furthermore, data are collected on the characteristics of resident tourists e.g., age, gender, and on the characteristics of every trip, such as purpose of the trip, destination, transportation means, type of accommodation establishment, etc.
Legal framework	Regulation (EU) No 692/2011 of the European Parliament and of the Council
Statistical units	For participation in tourism, the statistical unit is the individual. For tourism trips and visitors making the trips, the statistical unit is the trip made by the individual.
Methodology	The Survey on Qualitative Characteristics of Residents Tourists is a sample survey on households that is conducted on a yearly basis. For each household a questionnaire is filled in pertaining to all the trips made by each household member during the reference year. The surveyed households are derived from the sample of the Labour Force Survey which is selected using a two-stage stratified sampling method. The primary unit of the survey is the surface area (one or more subsequent city blocks) and secondary unit is the household. The ultimate unit of the survey is the household.
Reference area	The whole territory of Greece.
Reference period	Calendar year 2023.
Statistical concepts and definitions	<p>Resident: any natural person, irrespective of citizenship, normally residing or having the intention to reside for a period of at least 12 months in Greece.</p> <p>Usual residence: the place where a person normally spends the daily period of rest, regardless temporary absences for purposes of recreation, holidays, visits to friends and relatives, business, medical treatment or religious pilgrimage.</p> <p>Usual environment: the geographical area, though not necessarily a contiguous one, within which an individual conducts the regular life routines.</p> <p>Tourism trip: trip with at least one night spent to a main destination outside one's usual environment, for less than a year, for any main purpose, including business, leisure or other personal purpose, other than to be employed by a resident entity in the place visited.</p> <p>Personal trip: trip whose purpose is vacation, leisure, rest, recreation, visiting friends and relatives, beyond the traveler's daily routine and activities, as well as other trips for pilgrim or health care purposes, etc.</p> <p>Business trip: trip related to the visitor's work, beyond his/her daily routine and activities.</p> <p>Main means of transport: the means of transport that was used for the trip. If different modes of transport were used to get to (or from) the destination, the one that covered the longest distance is reported.</p> <p>Expenditure: money spent on accommodation, food, transport, and other trip-related expenses e.g., for cultural, recreational activities, purchase of clothing, footwear, purchase of consumables and big-value goods, purchase of food, beverages, drinks, presents, souvenirs, etc.</p> <p>Rented accommodation establishments: hotels and similar establishments, therapeutic centres, camping grounds, conference centres, passenger transport means, other rented accommodation establishments, such as mountain refuges, youth hostels, etc.</p> <p>Non-rented accommodation establishments: own holiday homes, accommodation provided without charge by relatives and friends and other owner-occupied accommodation provided for free (caravans, tents, etc.).</p> <p>The statistical concepts and definitions of the survey are described in Regulation (EU) No 692/2011 of the European Parliament and of the Council. Further information on the definitions and the methodology of the survey are available in the Methodological Manual for Tourism Statistics.</p>
