HELLENIC STATISTICAL AUTHORITY

PRESS RELEASE

DATA ON WEEKLY DEATHS: 1st to 44th week, 2020

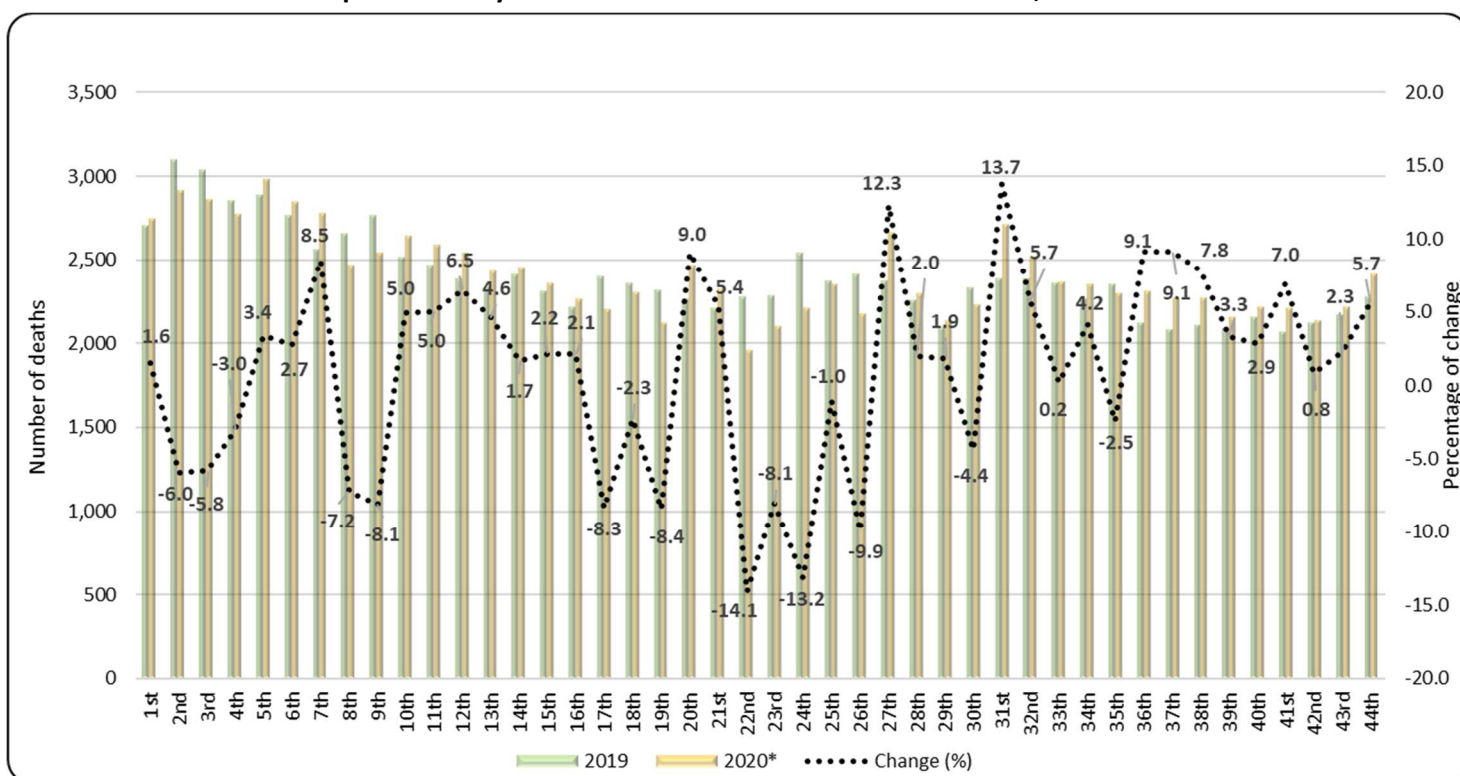

The Hellenic Statistical Authority (ELSTAT) announces an ad-hoc press release with provisional statistical data depicting the weekly evolution of death counts for the time period from the 1st to the 44th week of 2020. Data refer to the deaths that occurred in the Greek territory during that period due to various causes including deaths attributed to Covid-19.

The data included in this publication are compiled within the framework of the Vital Statistics Survey and are provided from all the Municipal Civil Register Offices of Greece according to the vital events that have been declared and registered up until the date of data transmission. Overdue registrations of deaths are integrated at a later stage in the date of occurrence.

The following tables present data on the weekly evolution of deaths during the first forty-four (44) weeks of 2020 by sex, age group and usual residence (NUTS-2) of the deceased.

According to these data, **the number of deaths in Greece in the first 44 weeks of 2020 amounted to 106,322** (53,387 men and 52,935 women) **while for the corresponding period of 2019 amounted to 105,529** (53,235 men and 52,294 women) recording an increase of 0.75%. 3,981 more deaths were recorded in 2020 as compared to the average number of the period 2015-2019 (3.89%). The corresponding percentage changes, per year, for the period 2015 - 2019 amount to 5.05% in 2019 as compared to 2018 (100,457), to -4.55% in 2018 as compared to 2017 (105,242), to 7.17% in 2017 as compared to 2016 (98,199) and -3.99% in 2016 as compared to 2015 (102,276) (Tables 1, 2, 3 and 4).
