# STATISTICS IN INFOGRAPHICS

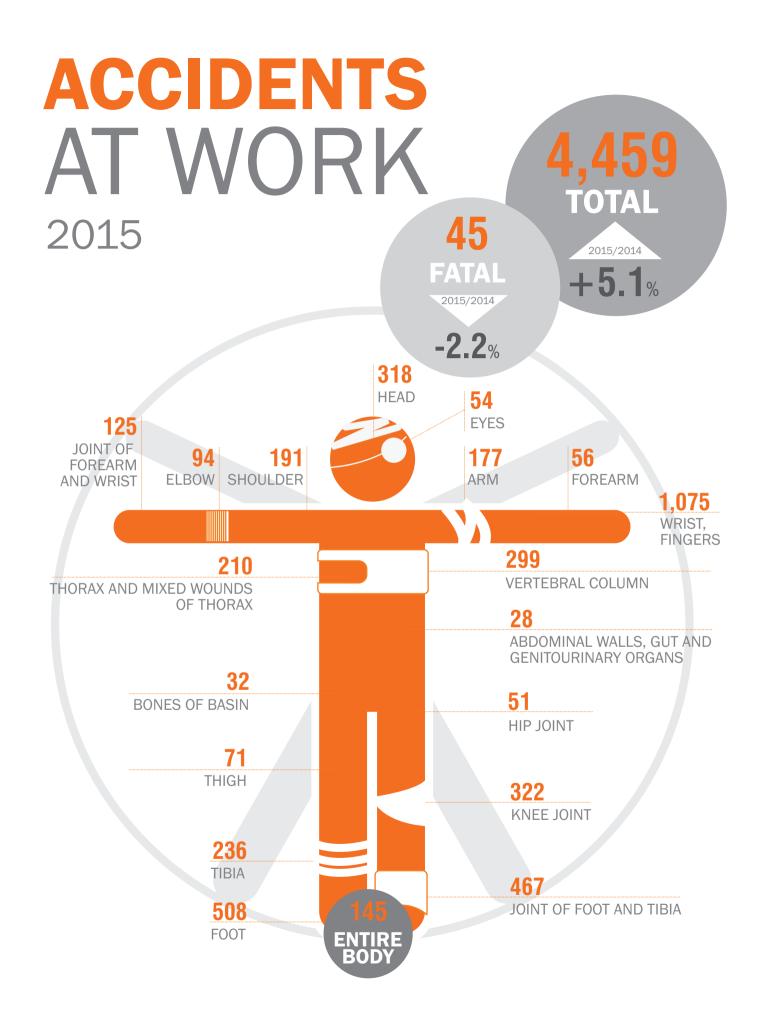

One of the priorities I set when I assumed duty as head of ELSTAT was to effectively communicate statistical information to the Greek society.

Building on the collective efforts of ELSTAT's personnel we started, about a year ago, working on the visualization of a selection of our statistics and their underlying production procedures. The idea is to provide information which is accessible to the wider public and easy to share in the social media, an important source of information for millions of users nowadays.

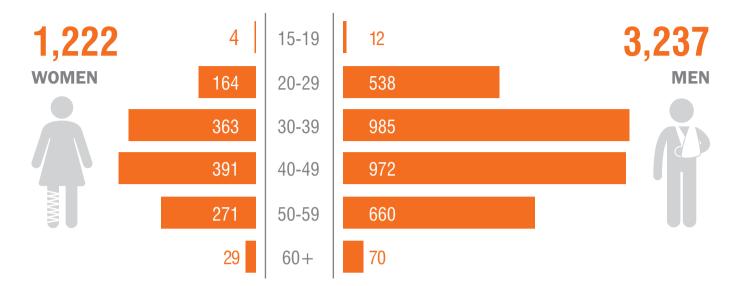

The collection you are holding is a selection of infographics, produced entirely in-house by the Directorate of Statistical Information and Publications. We are looking forward to any comments and suggestions you may have in order to help us achieve an even better result next year.

Wishing you an enjoyable reading,

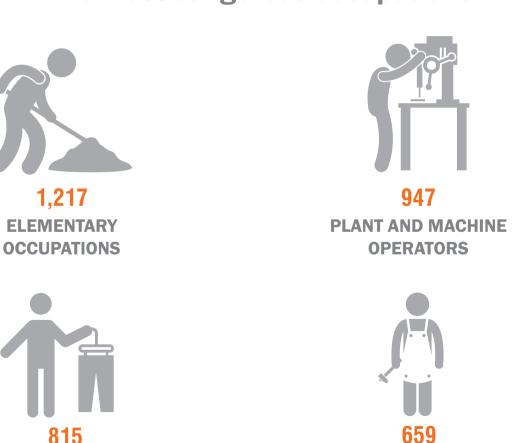

Athanasios C. Thanopoulos President of ELSTAT
