HELLENIC STATISTICAL AUTHORITY

ROAD FREIGHT TRANSPORT STATISTICS: 1st Quarter 2024

The Hellenic Statistical Authority announces the results of the road freight transport survey for the first quarter of 2024.

- According to the survey results, in the 1st quarter of 2024 compared to the 1st quarter of 2023, a decrease of 1.8% is observed in the total weight of goods which were carried by road freight vehicles registered in Greece. Specifically, in the 1st quarter of 2024, the weight of goods carried by national¹ and international² road transport vehicles, amounted to 63,028.6 k-tonnes compared with 64,207.5 k-tonnes in the respective period of 2023. The tonne-kilometres in the 1st quarter of 2024 amounted to 5,267,506.6 thousands against 4,788,705.5 thousands in the respective period of 2023, thus recording an increase by 10.0% (Table 1, Graph 1).
- Regarding the type of cargo loading in Greece, in terms of weight carried, when comparing the 1st quarter of 2024 to the 1st quarter of 2023, an increase is observed in categories "Freight containers", "Any other type of cargo", "Mobile, self-propelled units", with the most significant, in absolute values, in "Freight containers" by 3,511.2 k-tonnes, while a decrease in absolute values is observed in the "Solid bulk goods (no cargo unit)" category by 4,209.7 k-tonnes. In terms of tonne-kilometres, an increase is observed in the categories: "Palletised goods", "Mobile, self-propelled units", "Freight containers", "Solid bulk goods (no cargo unit)", "Liquid bulk goods (no cargo unit)", with the most significant increase in absolute values in the category "Palletised goods" by 276,655.1 thousand tonne-kilometres while a decrease in absolute values is observed in the "Any other type of cargo" category by 74,191.4 thousand tonne-kilometres (Table 2, Graph 2).
- Table 3 illustrates, at the level of Large Geographical Areas (NUTS I), loading data with regard to the weight of freight and tonne-kilometres effected. Specifically, 30.6% of the loadings were observed in Voreia Ellada, recording a decrease by 11.8% in the 1st quarter of 2024 compared with the 1st quarter of 2023. Over the same time period, the most significant increase, by 52.6% was observed in Nisia Aigaïou, Kriti (Graphs 3 and 4).
- Table 4 illustrates, at the level of Large Geographical Areas (NUTS I), unloading data with regard to the weight of freight and tonne-kilometres effected. Specifically, 31.4% of the unloadings were observed in Kentriki Ellada, recording a decrease by 9.2% in the 1st quarter of 2024 compared with the 1st quarter of 2023. Over the same time period, the most significant increase, by 53.5% was observed in Nisia Aigaïou, Kriti (Graphs 5 and 6).

¹ National transport: transport where the point of departure and the point of arrival are located within Greece.

² International transport: the transport by a loaded or unloaded vehicle where the point of departure and the point of arrival are located in different EU Member States, or a transport from an EU Member State to a non-EU Member State, or between non-EU Member States.

Table 1. Weight of transported goods and tonne-kilometres¹ effected by road freight vehicles registered in Greece, national and international transport, 1st quarter of 2023-2024

Type of road freight transport	Weight of transported goods (k-tonnes)			Transport performance in thousand tonne-Kilometers (k-tkm)		
	2023	2024	change %	2023	2024	change %
Total	64,207.5	63,028.6	-1.8	4,788,705.5	5,267,506.6	10.0
National road freight transport	63,077.6	61,779.6	-2.1	3,453,134.6	3,724,281.7	7.9
International road freight transport	1,129.9	1,249.0	10.5	1,335,571.0	1,543,224.9	15.5

Remark: Any differences in the totals across tables are on account of rounding up

¹ Tonne-kilometres (tkm) = weight of transported goods x distance travelled

EXPLANATORY NOTES

SURVEY ON ROAD FREIGHT TRANSPORT	The survey on road freight transport is a quarterly survey which has been conducted in all EU Member States since 1999, by virtue of Council Regulation (EC) No 1172/98. The purpose of the survey is to monitor the carriage of goods by road by means of goods road transport vehicles, which are registered in each Member State, as well as the journeys made by such vehicles. The survey does not cover: a) goods road transport vehicles whose authorised weight or dimensions exceed the limits normally permitted in the Member States concerned and b) agricultural vehicles, military vehicles and vehicles belonging to central or local public administrations, with the exception of goods road transport vehicles belonging to public undertakings, and in particular railway undertakings. Each Member State may exclude from the scope of this Regulation goods road transport vehicles whose load capacity or maximum permissible weight is lower than a certain limit (3.5 tonnes of load capacity for Greece).
LEGAL FRAMEWORK	The survey is governed by Regulation (EU) No 70/2012 of the European Parliament and of the Council on statistical returns in respect of the carriage of goods by road. This Regulation is a recast edition of the Regulation (EC) 1172/98, which has been substantially amended several times.
REFERENCE PERIOD	Data refer to the 1 st quarter of 2024.
SURVEY METHODOLOGY	The survey is conducted on a quarterly basis. The sample is equally distributed into the thirteen weeks of a quarter. Every vehicle is surveyed during a specific week of the year, from Monday to Sunday. The sample is selected on the basis of various criteria: the vehicle performing national or international road freight transport; the vehicle being for private or for public use; class of load capacity; type of chassis; registered office of the vehicle, etc. The questionnaires are processed and the data are produced in line with rules and guidelines laid down in the relevant Manual of Eurostat.

LARGE GEOGRAPHIC AREAS OF GREECE (NUTS I)

DEFINITIONS

Registered vehicle: the state of having been entered in a register of road transport vehicles, kept by an official body in a Member State. In the case of carriage by means of a combination of road transport vehicles, the complete vehicle shall be deemed to be registered in the country where the goods road transport vehicle is registered.

International Transport: a) a laden journey undertaken by a vehicle the point of departure and the point of arrival of which are in two different Member States, b) a laden journey undertaken by a vehicle from a Member State to a third country or vice versa, c) a laden journey undertaken by a vehicle between third countries, d) an unladen journey in conjunction with the carriage referred to in points a), b) and c). International carriage shall be carried out subject to possession of a Community license.

National transport: transport by a loaded vehicle where the point of departure and the point of arrival are located in the same country (Greece).

Load capacity: maximum weight of goods declared permissible by the competent authority of the country of registration of the vehicle. When the goods road transport vehicle is a road train made up of a lorry with trailer, the load capacity of the road train is the sum of the load capacities of the lorry and the trailer.

Place of loading: the first place in which goods are loaded on the goods road transport vehicle, which was previously completely empty.

Place of unloading: the last place in which goods are unloaded from the goods road transport vehicle, which is subsequently completely empty.

Distance traveled: actual distance excluding the distance covered by the goods road transport vehicle while being transported by another means of transport.

Types of journey: 1) laden journey involving one single basic transport operation 2) laden journey involving several transport operations, but not considered as a collection or distribution round, 3) laden journey of the collection or distribution round type, 4) unladen journeys.

REMARK

Any differences between the totals across tables are on account of rounding up.
