SUPPLY & USE TABLES 2019

The Hellenic Statistical Authority (ELSTAT) announces the Supply and Use Tables for year 2019.

Supply and Use tables are compiled on an annual basis and Input-Output tables are compiled every five years, three years after the end of the reference year, according to the European System of Accounts ESA 2010 (Regulation (EU) No 549/2013 of the European Parliament and of the Council). These tables are consistent with the respective annual national figures.

Information concerning the most recent publication of the Annual National Accounts, depicted in the compilation of the Tables of this announcement, is provided in the Annual National Accounts' publication as of 18/10/2022, available on ELSTAT site:

Gross Domestic Product (2nd estimate)

Supply-Use and Input-Output Tables provide detailed information for a given year on production activities, the supply and demand of goods and services, intermediate consumption, primary inputs and foreign trade.

Supply and Use Tables are matrices by product and industry showing the production processes and transactions for particular products or industries.

Symmetric Input-Output Tables are "product-by-product" or "industry-by-industry" matrices combining both Supply and Use into a single table.

These tables present:

- a) the structure of the costs of production and the value added that is generated in the production process;
- b) the flows of goods and services produced in the Greek territory; and
- c) the flows of goods and services with the rest of the world.

For the compilation of Supply-Use and Input-Output Tables, data are used from the tables compiled by the National Accounts Division of ELSTAT for the calculation of Gross Domestic Product and the macroeconomic variables.

The data sources used concern mainly:

- Surveys carried out by ELSTAT, like Structural Business Surveys (SBS), Household Budget Survey, Foreign Trade Statistics, Labor Force Survey, Labor Cost Survey, the census of population and buildings, Short Term Indicators for the volume and the prices etc.
- Data from the business register of ELSTAT
- Administrative sources, like the State Budget Outturn etc.
- Balance of Payments data from the Bank of Greece
- Other sources, like financial data of enterprises etc.

The data are presented using NACE Rev. 2 in 64 industries and under the CPA 2008 in 64 products.

The figures in the Supply-Use and Input-Output Tables are in current prices and the figures in the Symmetric Input-Output Table are in basic prices of the reference year.

Supply-Use and Input-Output Tables are available on the portal of ELSTAT at the following link:
