QUARTERLY NON-FINANCIAL SECTOR ACCOUNTS:

4th Quarter 2024 (Provisional data)

The Hellenic Statistical Authority (ELSTAT) announces the provisional data for the quarterly non-financial sector accounts for the 4th quarter of 2024.

Quarterly non-financial sector accounts provide an overall description of the Greek economy, based on the analysis of the economic behavior of the institutional sectors constituting the economy (households and non-profit institutions serving households, non-financial corporations, financial corporations, general government) and the relations of the national economy with the rest of the world.

The data which are presented in the current publication have been compiled according to the European System of National and Regional Accounts ESA 2010 (Regulation (EU) No 549/2013 of the European Parliament and of the Council on the European System of National and Regional Accounts in the European Union — ESA 2010), as amended by Regulation (EU) 2023/734 of the European Parliament and of the Council.

The data cover the period 1999 (1st quarter) till 2024 (4th quarter). For the compilation of these provisional estimates all the best available data sources have been used.

The data of previous quarters of 2024 have been revised due to the incorporation of General Government data announced on 22/4/2025 and the quarterly national accounts data announced on 7/3/2025.

The transaction figures are in full consistency with the published annual non-financial sector accounts announced on 24/10/2024.

Any discrepancies with the published figures of General Government data and quarterly national accounts data of the recent quarters are due to vintage differences.

During the 4th quarter of 2024, the external balance of goods and services recorded a deficit of 6.17 billion euro compared to a deficit of 6.28 billion euro recorded at the 4th quarter of 2023.

Moreover, during the 4th quarter of 2024, the external balance of primary income, current and capital transfers, recorded a surplus of 1.95 billion euro. The corresponding figure for the 4th quarter of 2023 was a surplus of 0.95 billion euro.

As a result of the above, the total economy (S.1) presented net borrowing of 4.22 billion euro to the rest of the world (S.2) in the 4th quarter of 2024. A year before, net borrowing was 5.34 billion euro (Table 1, Graph 1).
