

Piraeus, 14 July 2022

## **PRESS RELEASE**

## IMPORT PRICE INDEX IN INDUSTRY: May 2022, y-o-y increase of 37.7%

The Overall Import Price Index (MPI) in Industry with base year 2015=100.0 in May 2022 recorded an increase of 37.7% compared with May 2021. The corresponding index in May 2021 had recorded an increase of 22.8% compared with May 2020 (Table 1.I).

The Overall Index in May 2022 recorded an increase of 0.4% compared with April 2022. The corresponding index in May 2021 had recorded an increase of 1.4% compared with April 2021 (Table 1.II).

The twelve-month average Overall Index from June 2021 to May 2022, increased by 28.6% in comparison with the corresponding index of the period from June 2020 to May 2021, while the decrease recorded between the previous twelve-month periods amounted to 1.1% (Table 4).

The time series of MPI are available on the website of ELSTAT, at: http://www.statistics.gr/en/statistics/-/publication/DKT18/-

# Evolution of annual rates of change (%) of Import Price Index (MPI) in Industry (2015=100.0)

### 1. Annual rates of change: May 2022 compared with May 2021

The increase of 37.7% in the Overall Import Price Index in Industry in May 2022 compared with May 2021 is on account of the yearly changes of the sub-indices of the markets as follows:

- a. 54.0% increase in the MPI of the Non-Eurozone Market (Table 3.I).
- b. 9.0% increase in the MPI of the Eurozone Market (Table 2.I).

More specifically, the aforementioned increase was the result of the yearly changes mainly of the sub-indices in the following NACE Rev.2 divisions:

Code	Division	Rates of change (%)
35	Electricity, gas, steam and air conditioning supply	180.5
19	Manufacture of coke and refined petroleum products	104.5
06	Extraction of crude petroleum and natural gas	75.4
24	Manufacture of basic metals	27.9
16	Manufacture of wood and of products of wood and cork	17.1
17	Manufacture of paper-pulp, paper and paper products	14.1
10	Manufacture of food products	11.7
20	Manufacture of chemicals and chemical products	9.6
26	Manufacture of computer, electronic and optical products	7.0
29	Manufacture of motor vehicles, trailers and semi-trailers	4.3
22	Manufacture of rubber and plastic products	4.1
27	Manufacture of electrical equipment	3.7

## 2. Monthly rates of change: May 2022 compared with April 2022

The increase of 0.4% in the Overall Import Price Index in Industry in May 2022 compared with April 2022 is on account of the monthly changes of the sub-indices of the markets as follows:

- a. 1.1% increase in the MPI of the Eurozone Market (Table 2.II).
- b. 0.2% increase in the MPI of the Non-Eurozone Market (Table 3.II).

More specifically, the aforementioned increase was the result of the monthly changes mainly of the sub-indices in the following NACE Rev.2 divisions:

Code	Division	Rates of change (%)
19	Manufacture of coke and refined petroleum products	6.2
10	Manufacture of food products	2.4
16	Manufacture of wood and of products of wood and cork	2.1
11	Manufacture of beverages	1.9
26	Manufacture of computer, electronic and optical products	1.2
20	Manufacture of chemicals and chemical products	1.0
17	Manufacture of paper-pulp, paper and paper products	0.8
28	Manufacture of machinery and equipment n.e.c.	0.5
13	Manufacture of textiles	0.4
24	Manufacture of basic metals	-0.3
06	Extraction of crude petroleum and natural gas	-0.6
35	Electricity, gas, steam and air conditioning supply	-13.2

Note: The indices are rounded up to two decimal digits when published and percantage changes up to one decimal digit when published.

#### **METHODOLOGICAL NOTES**

#### Generally

The Import Price Index (MPI) in Industry, in its current form, has been compiled since January 2005, when it replaced the Final Products Wholesale Price Index with foreign final products from abroad. The Import Price Index (MPI) in Industry was recently revised with base year 2015=100.0 and the previous time series were adjusted accordingly.

#### Purpose of the index

The purpose of the Import Price Index (MPI) in Industry is to measure the monthly rates of change of the prices of products in the sectors of mining, manufacturing and energy that are imported from abroad and are transferred, through their purchase, to resident units-enterprises irrespective of their branch of economic activity.

#### Definitions

The Import Price Index is a monthly index and it is composed by the sub-indices of the import prices of the two market zones: the eurozone and the non-eurozone countries depending on the country of origin of imports.

The collected values of imported products are CIF (Cost Insurance Freight) prices at the Greek border, free of all taxes and duties payable by the importing enterprises. This means that they include the product transport (freight) and insurance costs incurred by the enterprise for their importation.

The price data for the compilation of the MPI are collected from units-enterprises that import the goods that have been selected at the initial stage. The prices refer mainly to the transactions between the resident enterprises that import products and the enterprises established abroad which act as exporters of products to Greece.

#### Legal framework

The compilation of MPI is governed by Council Regulation (EC) 1165/1998 "concerning short-term statistics" and by the Regulation 1158/2005 (amending the above mentioned Regulation) of the European Parliament and of the Council. Furthermore, the MPI is governed by Regulation (EC) 1893/2006 of the European Parliament and of the Council, by Commission Regulation (EC) 656/2007 and the Regulation (EC) 451/2008 of the Council, by Regulation (EU) 2019/2152 of the European Parliament and of the Council on European business statistics (EBS-Regulation), as well as the Commission Implementing Regulation (EU) 2020/1197 laying down technical specifications and arrangements pursuant to Regulation (EU) 2019/2152.

### Reference period

Month.

Base year

2015=100.0.

Revision

The MPI is a fixed base index. The index was revised with the new base year 2015 = 100.0 by virtue of Council Regulation (EC) 1165/1998, according to which the short-term statistics indices are revised every five (5) years and more specifically with base years ending in 0 or 5.

### Statistical classifications

At the level of branches of economic activities the statistical classification of economic activities NACE Rev.2 of EU is used (Regulation 1893/2006), while at the level of main industrial groupings, the allocation of two-digit and three-digit NACE Rev.2 headings to categories of aggregate classification is used, in accordance with Commission Regulation 656/2007. At product level, the statistical classification CPA 2008 of EU is used, according to the Council Regulation 451/2008.

### **Geographical coverage**

The index covers the whole of the country, with data from Attiki and other 31 Regional Units of the country.

# Coverage of economic activities

The index covers the sections of mining-quarrying manufacturing, electricity and natural gas, the main industrial groups, and all the levels of economic activities (divisions, groups, classes) and the level of imported products.

## Statistical survey

The data are collected from approximately 880 enterprises and the total number of observations (prices) is approximately 2,540. More specifically, the following items are surveyed: 297 product codes, derived from eurozone countries and 260 product codes that originate from non-eurozone countries.

#### **Publication of data**

The MPI with the new base year 2015=100.0 is released since July 2019, with May 2019 as the first reference month. Data with base year 2015=100.0 are available from 2000 onwards.
