

### MATERIAL COSTS INDEX IN THE CONSTRUCTION OF NEW RESIDENTIAL BUILDINGS: July 2023, y-o-y change 7.1%

The Overall Material Costs Index in the Construction (CSTM) of New Residential Buildings with base year 2015=100.0 in July 2023 recorded an increase of 7.1% in comparison with July 2022. The corresponding index in July 2022 had recorded an increase of 12.0% compared with July 2021 (Table 1).

The Overall Index in July 2023, compared with the corresponding index in June 2023, recorded an increase of 0.4%. The index had recorded an increase of 0.8% between July 2022 and June 2022 (Table 2).

The average Index for the twelve-month period from August 2022 to July 2023, compared with the corresponding index for the twelve-month period from August 2021 to July 2022, recorded an increase of 10.0%. The comparison of the average Material Costs Index in the corresponding previous twelve-month periods had shown an increase of 8.6% (Table 3).

The time series of CSTM is available on the website of the Hellenic Statistical Authority (ELSTAT), at:  
<http://www.statistics.gr/en/statistics/-/publication/DKT60/->

### Annual rates of change: July 2023 compared with July 2022

The Overall Material Costs Index in the Construction of New Residential Buildings in July 2023, compared with the corresponding index in July 2022 recorded an increase of 7.1% (Table 1). The main changes in the individual costs indices of the material categories are as follows:

Material categories	Rates of change %
Bricks	17.1
Safety glass	12.7
Central heating radiators	12.3
Plastic pipes	12.1
Cupreous Pipes	8.9
Floor and wall tiles generally	8.1
Emulsion paints	7.9
Parquet flooring	7.9
Aluminium door and window frames	7.8
Ready-mixed concrete	7.4
Wall cupboards	7.2
Marble slabs	7.0
Steel reinforcing rods	6.5
Windows	6.2
Cement	5.4
Copper pipes	5.3
Internal doors	5.1
Builders' timber	4.6
Diesel fuel	-15.9
Electric energy	-16.2

### Monthly rates of change: July 2023 compared with June 2023

The Overall Material Costs Index in the Construction of New Residential Buildings in July 2023 recorded an increase of 0.4% in comparison with the corresponding index in June 2023 (Table 2). The main changes in the individual costs indices of the material categories are as follows:

Material categories	Rates of change %
Cupreous Pipes	1.2
Bricks	1.1
Central heating radiators	0.8
Aluminium door and window frames	0.6
Copper pipes	0.6
Ready-mixed concrete	0.2
Electric energy	-2.2

## METHODOLOGICAL NOTES

<b>Generally</b>	The compilation of the Material Costs Index in the Construction of New Residential Buildings started in 1971. The index with base year 2015 is compiled since April 2019, when it replaced the previous index with base year 2010.
<b>Purpose of the index – definitions</b>	<p>The purpose of the index is to measure the monthly rates of change in the prices of building materials paid by the constructors and consumed in the construction of new residential buildings.</p> <p>The Material Costs Index is a monthly index and consists a sub-index of the Overall Costs Index in Construction of New Residential Buildings.</p> <p>For the compilation of the index the prices of the materials supplied, which are actually paid by the construction enterprises at the site, are collected and do not include VAT and other deductible taxes.</p>
<b>Legal framework</b>	The compilation of the Material Costs Index is governed by Council Regulation (EC) No 1165/1998 concerning short-term statistics and by Regulation No 1158/2005 of the European Parliament and of the Council (amending the above mentioned Regulation). Furthermore, this index is governed by Regulation (EU) No 2019/2152 of the European Parliament and of the Council on European business statistics, as well as Commission Implementing Regulation (EU) No 2020/1197 laying down technical specifications and arrangements pursuant to Regulation (EU) No 2019/2152.
<b>Reference period</b>	Month.
<b>Base year</b>	2015=100.0.
<b>Revision</b>	The Material Costs Index is a fixed base index. After the last revision, the index is calculated with base year 2015=100.0. Pursuant to the provisions of Council Regulation No 1165/1998 concerning short-term statistics, the index is revised every five (5) years, in years ending in 0 or 5.
<b>Statistical classification</b>	A national classification is followed, which includes 91 categories of materials, aggregated in 15 groups.
<b>Geographical coverage</b>	The geographical coverage of the index includes the country as a whole however prices are collected only in the biggest urban centers of the country (Greater Athens, Thessaloniki, Patra, Herakleio, Larisa and Volos).
<b>Coverage of economic activities</b>	The Material Costs Index in Construction of New Residential Buildings is a construction costs index (input index) and covers the transactions for the acquisition of building materials of the new residential buildings construction sector from the units / enterprises that provide these materials.
<b>Statistical survey</b>	A total number of 1,512 observations (prices) collected from 280 commercial or industrial enterprises supplying building materials are used for the compilation of the index. For electricity, prices are collected from the Public Power Corporation, while for water data are provided by water supply companies.
<b>Publication of data</b>	The index with the new base year 2015=100.0 is released since April 2019, with March 2019 as the first reference month. Times series data with base year 2015=100.0 are available from January 2000 onwards.
<b>References</b>	More information about the methodology concerning the compilation and calculation of the index and for the time series is available on the website of the Hellenic Statistical Authority (ELSTAT) ( <a href="http://www.statistics.gr/en/statistics/-/publication/DKT60/">http://www.statistics.gr/en/statistics/-/publication/DKT60/</a> ).
