PRESS RELEASE

ROAD TRAFFIC ACCIDENTS: November 2021

The Hellenic Statistical Authority (ELSTAT) announces provisional¹ data from the survey on “Road Traffic Accidents” for November 2021. In particular, the road traffic accidents which occurred in Greece, resulting in death or injury, increased by 47.2% in comparison with the corresponding month of 2020 (958 road accidents in November 2021, against 651 road accidents in November 2020).

The casualties of the injury-causing accidents that occurred in November 2021 were as follows: 60 deaths, 36 serious injuries and 1,064 slight injuries. In contrast, in November 2020 the corresponding figures were: 51 deaths, 31 serious injuries and 705 slight injuries. Therefore, road traffic accident casualties in November 2021 increased by 17.6% for deaths by 16.1% for serious injuries and by 50.9% for slight injuries.

EXPLANATORY NOTES

Survey on Road Traffic Accidents

The Survey on Road Traffic Accidents is conducted on a monthly basis and it records, for each region (see map) and department of Greece and for each month separately, the number of accidents resulting in death or injury, as well as the number of persons injured by categories (drivers, passengers, pedestrians).

On a yearly basis, road traffic accidents are further analyzed. The competent agencies for filling in/collecting the forms on road accidents are the local Police Authorities and the local Port Authorities of Greece.

The lower level of analysis for the place where an injury road accident occurred is the settlement. Data are collected on a monthly basis. The main variables are the following: place of accident, kind of road, casualties, conditions of road surface and type of road.

Legal basis

The Survey on Road Traffic Accidents is governed by Council Decision 93/704 of the European Community.

Reference period

Monthly.

Availability of data

Provisional data are available 2 months after the reference month.
Final data are available 10 months after the reference year.

Definitions **Road accident** (injury accident): Any accident involving at least one road motor vehicle in motion on a public road or square to which the public has access (excluding yards, industrial sites or vehicle depot of public transport enterprises), resulting in at least one injured or killed person. Accidents with only material damages are not included.

Fatality (Death): Any person killed immediately or dying within 30 days as a result of an injury accident (This national definition applies since 01.01.1996)

Person injured: Any person who sustained an injury as result of an injury accident, and who normally needs medical treatment.

Serious injury: Any person who sustained an injury as result of an injury accident, such as brain damages, mutilation, multiple injuries, which may result in lack of awareness or which are life-threatening.

Slight injury: Any person injured who sustained minor and not life-threatening injuries.

Vehicle: Include motor vehicles, trolleybuses, motorcycles, bicycles, motorbikes, agricultural and road making machines, animal and hand-drawn vehicles. Railway vehicles are excluded, unless the road accident involves at least one of the aforementioned types of vehicles and therefore, railway vehicles are considered vehicles.

Methodology The forms of the survey are filled in by the local Police Authorities and the local Port Authorities as well.
