

CONSUMPTION OF PETROLEUM PRODUCTS, 2024

The Hellenic Statistical Authority (ELSTAT) announces the provisional results on the Consumption of Petroleum Products in Greece for the year 2024 and the final results for the year 2023.

According to these data, there is a 2.8% increase in the total consumption of petroleum products for the year 2024 compared to the year 2023, with the corresponding amounts reported at 7,029,109 metric tons for the year 2024 and 6,837,722 metric tons for the year 2023 (Table 1, Graph 1).

Graph 1: Annual consumption of petroleum products 2017-2024*

* Provisional data

Specifically, an increase is observed in the annual consumption of super unleaded 98/100 motor gasoline by 4.9%, transport diesel by 3.7%, high-sulphur heavy fuel oil by 3.1%, heating gasoil by 2.5%, unleaded motor gasoline by 1.8%, low-sulphur heavy fuel oil by 1.6% and Liquefied Petroleum Gases (LPG) by 0.9% (Table 1, Graph 2).

Table 2 presents the share of consumption of petroleum products in the Regions of Greece for the years 2017-2024. In 2024, the regions recording the highest consumption are Attiki and Kentriki Makedonia, followed by Thessalia, Dytiki Ellada, Sterea Ellada, Kriti, Peloponnisos, Anatoliki Makedonia and Thraki, Ipeiros, Notio Aigaio and Dytiki Makedonia. The lowest consumptions are recorded in Ionia Nisia and Voreio Aigaio.

Map 1 illustrates the regional distribution of the consumption of petroleum products for Greece total, on the basis of the results of the year 2024.

Map 1. Consumption (%) of Petroleum Products 2024

EXPLANATORY NOTES

Survey on the Consumption of Petroleum Products The survey on the Consumption of Petroleum Products is conducted annually on a census basis by the Ministry of Environment and Energy. The results of the survey concern the total consumption of petroleum products by product category. Data are presented at the level of the Country, Region and Regional Unit in order to cover national needs in statistical information in this sector.

Reference period The results of the survey refer to year 2024.

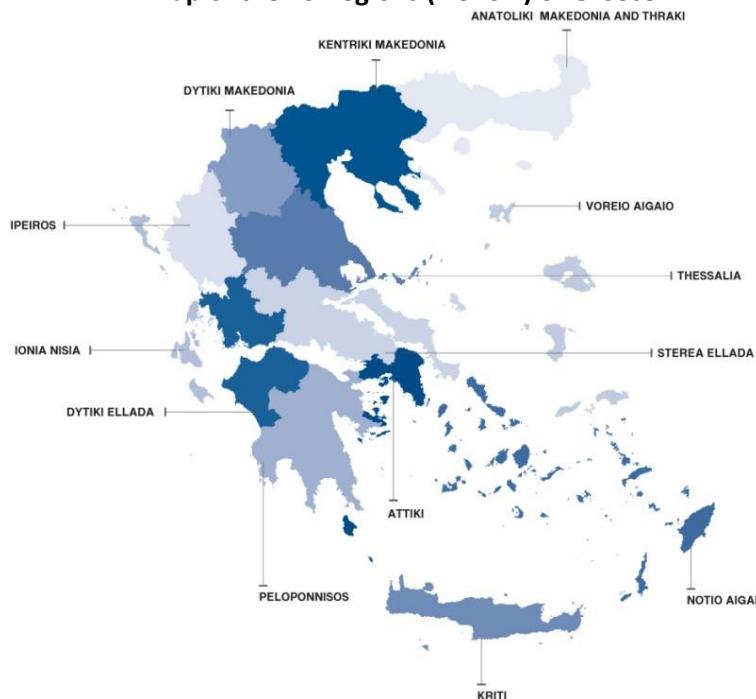

Classification system The classifications used for the data of the survey on the Consumption of Petroleum Products are as follows:

1. Geographical classification: by Region and by Regional Unit of the Country.
2. Classification of petroleum products into the following categories: motor gasoline (super, unleaded and super unleaded 98/100), heating gasoil, transport diesel, heavy fuel oil (low and high sulphur), liquefied petroleum gases (LPG). From the year 2019 the consumption data in motor gasoline categories: super, unleaded and super unleaded 98/100, include the consumption in mixture with biofuels.

Methodology The data are collected by the General Directorate of Energy of the Ministry of Environment and Energy from all petroleum products trading and refining enterprises. The above General Directorate transmits to ELSTAT aggregated data on the consumption of petroleum products by product category, broken down by Regional Units of the Country. Based on these data, tables are produced presenting overall figures for petroleum product consumption by product category for the entire country, as well as by Region and by Regional Unit. Consumptions do not include own consumption of fuel oil and oil for electricity generation by the Public Power Corporation.

Geographical classification The geographical classification is based on *Nomenclature of Territorial Units for Statistics*.

Map of the 13 Regions (NUTS 2) of Greece
