More specifically, the evolution of the Services Producer Price Indices is depicted in the following tables.

- Table 1 shows the above-mentioned indices for the 3rd quarter of the years 2023, 2024 and 2025 and the respective annual rates of change.
- Table 2 shows the above-mentioned indices for the 3rd quarter of the years 2024 and 2025 and the respective quarterly rates of change.

The data are provisional when first released and published as final in the next quarter.

On ELSTAT's website and in particular at the link:

<http://www.statistics.gr/en/statistics/-/publication/DKT59/->, methodological information on the SPPI is available, as well as the timeseries of the indices.

Table 1. Annual rates of change (%) of the Services Producer Price Indices

Base year: 2021=100.0

NACE Rev.2 codes	Sections / Divisions of services	3 rd quarter			Annual rates of change (%)	
		2025	2024	2023	2025/2024	2024/2023
	Total Services (in Sections H, I, J, L, M, N)	116.2	115.3	110.3	0.8	4.5
H	Transport Sector	115.3	115.0	113.7	0.3	1.2
49	Land transport and transport via pipelines	117.5	114.4	113.0	2.7	1.2
50	Water transport	128.6	128.0	125.4	0.5	2.0

Note: The indices and the percentage changes are published rounded up to one decimal digit.

METHODOLOGICAL NOTES

Producer Price Indices for Services	The Services Producer Price Indices (SPPI) are quarterly indices which were first released in 2007, with base year (b.y.) 2006=100.0, then were revised with b.y. 2010=100.0, 2015=100.0, until the current revision with b.y. 2021=100.0.
Purpose of the indices	The purpose of these indices is to measure the quarterly rates of change in the services producer prices and to record the prices evolution that reflect the supply and demand conditions in the services markets, for the analysis of the real changes in the economy and for monitoring inflationary pressures. In addition, they are used for the deflation of turnover indices in services to calculate the new production (volume) indices in services sections (which are compiled from the year 2024 and retrospectively from 2021), also using as deflators certain services indices of the Harmonized Index of Consumer Prices with fixed taxes (HICP-ST).
Definitions	<p>The services producer price indices (SPPI) are output price indices for the service production of resident producers. The SPPI cover services provided in the market for all uses, that is intermediate consumption, final consumption and exports. The SPPI refer to the overall index (Business to All), while in many divisions they do not differ from intermediate consumption for the branches of services where the production is mainly directed to other production units (Business to Business). Exception case: the two indices for postal and courier services, that are compiled as overall indices and also as partial indices for enterprises (Business to Business) and for consumers (Business to Consumer).</p> <p>For the compilation of SPPI the recorded transactions are those that reflect the prices received by the producers for services actually sold to purchasers, including discounts, rebates or other charges. The collected prices are the basic prices for services sold. i.e. prices excluding VAT and other similar deductible taxes directly linked to turnover and also excluding all other taxes on products but including any subsidies on products.</p>
Legal framework	The compilation and publication of the indices are based on the Regulation (EU) No 2019/2152 of the European Parliament and of the Council on European business statistics. as well as Commission Implementing Regulation (EU) No 2020/1197 laying down technical specifications and arrangements pursuant to Regulation (EU) No 2019/2152.
Reference period	Quarter.
Base year	2021=100.0.
Revision	Pursuant to the provisions of Council Regulation No 2019/2152 concerning the indices, they are updated, every five (5) years in years ending in 0 or 5, while, in the current revision 2021=100.0 due to the impact of the pandemic, they were revised with base year the year 2021. The purpose of the revision is to adapt the index to recent developments as regards the structure of services sector.
Statistical classifications	At the level of categories of economic activities the statistical classification NACE Rev. 2 was used (Regulation No.1893/2006), while at the services level the classification CPA 2008 was used according to the Council Regulation No.451/2008.
Geographical coverage	The indices cover the whole country.
Coverage of economic activities	<p>SPPI are compiled in the following services of the H, I, J, L, M, N sections of economic activities, of the NACE Rev.2 statistical classification:</p> <ul style="list-style-type: none"> • Land transport and transport via pipelines (Section H division 49) • Water transport (Section H division 50) • Air transport (Section H division 51) • Warehousing and support activities for transportation (Section H division 52) • Postal and courier activities (Section H division 53) • Accommodation activities (Section I division 55) • Food Service activities (Section I division 56) • Publishing activities (Section J division 58)

- Motion picture, video and television program production, sound recording and music publishing activities (Section J division 59)
- Programming and broadcasting activities (Section J division 60)
- Telecommunications (Section J division 61)
- Computer programming, consultancy and related activities (Section J division 62)
- Information service activities (Section J division 63)
- Real estate activities (Section L division 68)
- Legal and accounting activities (Section M division 69)
- Management consultancy activities (Section M division 70)
- Architectural and engineering activities, technical testing and analysis (Section M division 71)
- Advertising and market research (Section M division 73)
- Other professional, scientific and technical activities (Section M division 74)
- Rental and Leasing activities (Section N division 77)
- Employment activities (Section N division 78)
- Travel agency, tour operator reservation service and related activities (Section N division 79)
- Security and investigation activities (Section N division 80)
- Services to buildings and landscape activities (Section N division 81)
- Office administrative, office support and other business support activities (Section N division 82)

Statistical survey The sampling unit used is the enterprise per Kind of Activity Unit (KAU). The data are collected from 500 enterprises (units), while the total number of observations (prices) is approximately 2,500.

Compilation of indices The services producer price indices are fixed base indices. The indices are Laspeyres-type indices with weights based on turnover data at 6-digit level that are produced from the specific structural surveys of the year 2021 (while for the divisions 69, 70 of the year 2020). In addition, data from certain services indices of the Harmonized Index of Consumer Prices with fixed taxes (HICP-ST) is taking into account, such as in: H49, H52, I55, I56, I58, J59, J60, J61, L68, M74, N77, N79, N81, N82, in order not to repeat a price collection from the same enterprises (units) in the corresponding divisions of services.

Publication of data-References The SPPI with b.y. 2021=100.0 in divisions of services, the sections level indices and the overall services price index are published from September 2024, with first reference quarter in 2nd quarter 2024.

The SPPI retrospective timeseries with b.y. 2021=100.0 are available from 2007 to 2020 (in the divisions in which they were initially calculated) and in new divisions and sections level with the overall services price index since 2021. More information is available on the ELSTAT's website at: <http://www.statistics.gr/en/statistics/-/publication/DKT59/->.
