

Piraeus, 29 April 2021

#### **PRESS RELEASE**

# PRODUCER PRICE INDEX IN INDUSTRY: March 2021, y-o-y increase of 9.1%

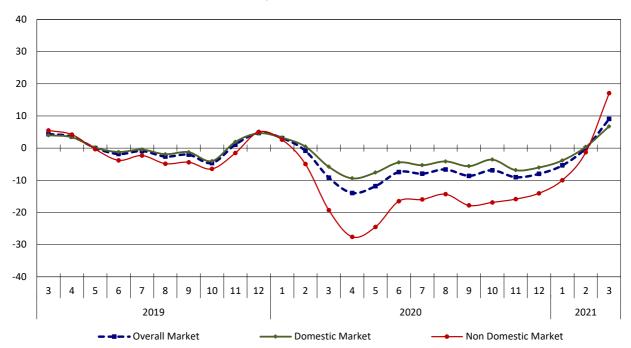

The Overall Producer Price Index (PPI) in Industry (total of domestic and non domestic market) with base year 2015=100.0 in March 2021 recorded an increase of 9.1% compared with March 2020. The corresponding index in March 2020 had recorded a decrease of 9.1% compared with March 2019 (Table 1.I).

The Overall Producer Price Index in March 2021 recorded an increase of 1.1% compared with February 2021. The corresponding index in March 2020 had recorded a decrease of 7.4% compared with February 2020 (Table 1.II).

The average Overall Index for the twelve-month period from April 2020 to March 2021 decreased by 6.5% in comparison with the corresponding index for the period from April 2019 to March 2020, while the decrease recorded between the previous twelve-month periods amounted to 0.8% (Table 6).

The time series of PPI are available on the website of ELSTAT, at: <a href="http://www.statistics.gr/en/statistics/-/publication/DKT15/-">http://www.statistics.gr/en/statistics/-/publication/DKT15/-</a>

# Evolution of annual rates of change (%) of Producer Price Index (PPI) in Industry: Overall Market, Domestic and Non-Domestic Market

#### Information for methodological issues:

Division of Business Statistics Section of Manufacture - Construction Indices and Industrial Products Head of the Section: Aikaterini Diamantaki

Tel: +30 213 135 2056

E-mail: a.diamantaki@statistics.gr

#### Information for data provision:

Tel: +30 213 135 2022, 2308, 2310 E-mail: data.dissem@statistics.gr

#### 1. Annual rates of change: March 2021 compared with March 2020

The increase of 9.1% in the Overall Producer Price Index in Industry in March 2021 compared with March 2020 is on account of the annual changes of the sub-indices of the markets as follows:

#### a. 17.1% increase in the PPI of the Non Domestic Market (Table 3.I).

More specifically, the aforementioned increase was the result of the yearly changes mainly of the sub-indices in the following NACE Rev.2 divisions:

Code	Division	Rates of change (%)
35	Electricity, gas, steam and air conditioning supply	224.1
19	Manufacture of coke and refined petroleum products	54.6
27	Manufacture of electrical equipment	15.9
07	Mininigs of metal ores	10.2
24	Manufacture of basic metals	8.6
10	Manufacture of food products	1.1
21	Manufacture of basic pharmaceutical products and pharmaceutical preparations	-2.0
25	Manufacture of fabricated metal products except machinery and equipment	-2.3
22	Manufacture of rubber and plastic products	-3.6
12	Manufacture of tobacco products	-4.4

#### b. 6.8% increase in the PPI of the Domestic Market (Table 2.I).

More specifically, the aforementioned increase was the result of the yearly changes mainly of the sub-indices in the following NACE Rev.2 divisions:

Code	Division	Rates of change (%)
19	Manufacture of coke and refined petroleum products	45.1
05	Mining of coal and lignite	40.6
25	Manufacture of fabricated metal products except machinery and equipment	5.5
27	Manufacture of electrical equipment	4.3
24	Manufacture of basic metals	3.1
35	Electricity, gas, steam and air conditioning supply	1.8
22	Manufacture of rubber and plastic products	1.8
11	Manufacture of beverages	1.7
20	Manufacture of chemicals and chemical products	1.2
10	Manufacture of food products	0.9

#### 2. Monthly rates of change: March 2021 compared with February 2021

The increase of 1.1% in the Overall Producer Price Index in Industry in March 2021 compared with February 2021 is on account of the monthly changes of the sub-indices of the markets as follows:

#### a. 2.0% increase in the PPI of the Non Domestic Market (Table 3.II).

More specifically, the aforementioned increase was the result of the monthly changes mainly of the sub-indices in the following NACE Rev.2 divisions:

Code	Division	Rates of change (%)
19	Manufacture of coke and refined petroleum products	5.8
35	Electricity, gas, steam and air conditioning supply	3.4
27	Manufacture of electrical equipment	1.5
12	Manufacture of tobacco products	1.3
10	Manufacture of food products	0.7
24	Manufacture of basic metals	0.3
20	Manufacture of chemicals and chemical products	0.2
17	Manufacture of paper-pulp, paper and paper products	-1.1
22	Manufacture of rubber and plastic products	-2.5
25	Manufacture of fabricated metal products except machinery and equipment	-2.9

#### b. 0.7% increase in the PPI of the Domestic Market (Table 2.II).

More specifically, the aforementioned increase was the result of the monthly changes mainly of the sub-indices in the following NACE Rev.2 divisions:

Code	Division	Rates of change (%)
19	Manufacture of coke and refined petroleum products	5.2
20	Manufacture of chemicals and chemical products	0.9
22	Manufacture of rubber and plastic products	0.7
24	Manufacture of basic metals	0.5
25	Manufacture of fabricated metal products except machinery and equipment	0.5
16	Manufacture of wood and of products of wood and cork	0.3
10	Manufacture of food products	0.3
35	Electricity, gas, steam and air conditioning supply	-0.3
27	Manufacture of electrical equipment	-1.4
26	Manufacture of computer, electronic and optical products	-5.2

Note: The indices are rounded up to two decimal digits when published and percantage changes up to one decimal digit when published.

Base year: 2015=100.0

#### **METHODOLOGICAL NOTES**

Generally

The Producer Price Index (PPI) in Industry, in its current form, has been compiled since January 2005, when it replaced the Wholesale Price Index which was compiled since 1963. The Producer Price Index (PPI) in Industry was revised with base year 2015=100.0 and the time series were adjusted accordingly.

Purpose of the index

The purpose of the Producer Price Index in Industry is to measure the monthly rates of change in the prices of goods that are produced in the domestic market, are sold in the domestic market, or are exported to the non domestic market.

Definitions

The Producer Price Index in Industry is a monthly index and it is composed by the sub-indices of the Domestic and Non Domestic Market. The Index of the Non Domestic Market is calculated as the composition of the Eurozone Index and the Non Eurozone Index.

The collected values for products sold in the domestic market are basic prices, i.e. prices excluding VAT and other similar deductible taxes directly linked to turnover and also, excluding duties and other taxes on products. Moreover, subsidies on products are included in the basic prices. The values collected for products sold in the non domestic market are quoted FOB (Free on board) prices.

The price data collected in the framework of the compilation of PPI refer mainly to transactions between the enterprises that produce and sell the surveyed products and the enterprises that buy those products, irrespectively of whether those products are to be used as raw materials or as merchandise.

Legal framework

The compilation of PPI is governed by Council Regulation (EC) 1165/1998 concerning short-term statistics and Regulation 1158/2005 (amending the above mentioned Regulation) of the European Parliament and of the Council. Furthermore, the PPI is governed by Regulation (EC) 1893/2006 of the European Parliament and of the Council, by the Commission Regulation (EC) 656/2007 and Regulation (EC) 451/2008 of the Council, by Regulation (EU) 2019/2152 of the European Parliament and of the Council on European business statistics (EBS-Regulation), as well as the Commission Implementing Regulation (EU) 2020/1197 laying down technical specifications and arrangements pursuant to Regulation (EU) 2019/2152.

Reference period

Month.

Base year

2015=100.0.

Revision

The PPI is a fixed-base index. Pursuant to the provisions of Council Regulation 1165/1998 concerning short-term statistics, the index is revised every five (5) years, with base years ending in 0 or 5.

Statistical classifications

At the level of branches of economic activities the statistical classification of economic activities NACE Rev.2 of EU is used (Regulation 1893/2006), while at the level of main industrial groupings, the allocation of two-digit and three-digit NACE Rev.2 headings to categories of aggregate classification is used, in accordance with Commission Regulation 656/2007. At product level, the statistical classification CPA 2008 of EU is used, according to the Council Regulation 451/2008.

Geographical coverage

The index covers the whole of the country, with data from 48 Regional Units of the country.

Coverage of economic activities

The index covers all the sections of the Industry (mining and quarrying, manufacturing, electricity, natural gas and water supply), the main industrial groupings (MIGs) and all the levels of economic activities (divisions, groups, classes) and the relevant products.

Statistical survey

The data are collected from approximately 821 enterprises and the total number of observations (prices) amounts approximately to 2,713. More specifically, 403 products sold in the domestic market and 171 products sold in the non-domestic market were selected. Out of the 171 products sold in the non-domestic market, 141 products are sold in the eurozone countries and 156 products are sold in the non eurozone countries.

in the context of the COVID-19 pandemic

Data collection and processing The compilation of the indicators was mainly based on data collected by the enterprises (via email, phone). When a break occurs in the flow of price data or when data are not available, the method used during the break is the so-called "carry forward" method, i.e. the repetition of the last observed price. Other options for dealing with the shortage of prices are administrative and other sources (data from the internet, from the press), as well as the application of an estimation method for the calculation of missing data using the monthly average change of other pricing sources at the product level. If an entire product index is missing, it is recommended to use the change/index of the next level up in aggregation as the basis for performing the imputation. For March 2021, there was no significant change in the price data collection compared to previous reference months.

Publication of data

The PPI with base year 2015=100.0 is released since March 2020, with February 2020 as the first reference month. Data with base year 2015=100.0 are available from January 2000 onwards.
