EXPLANATORY NOTES

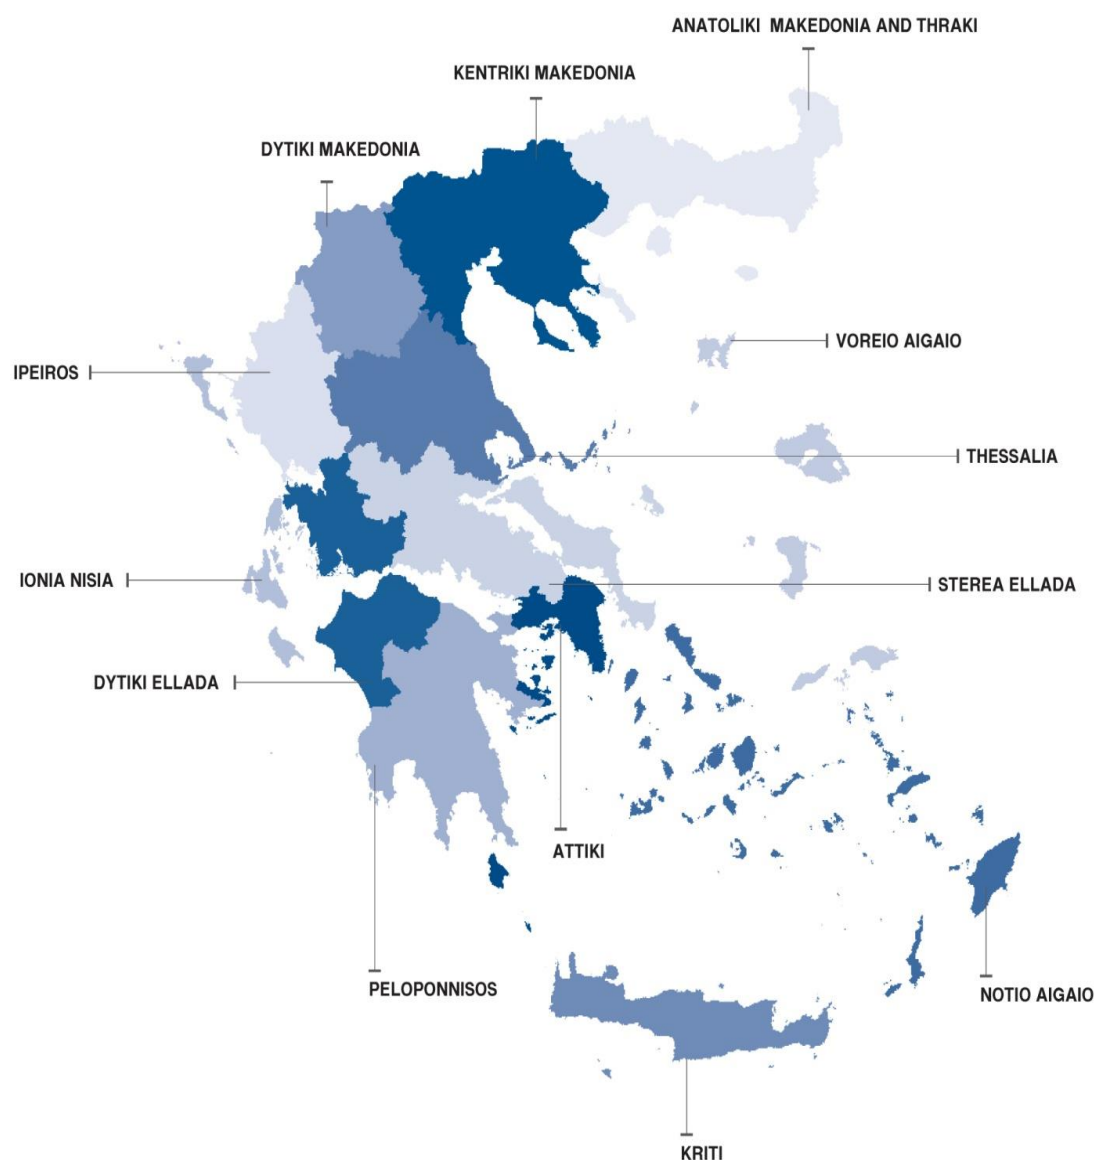

General: Regional accounts provide information on basic economic variables at regional level. These are Gross Value Added, Gross Domestic Product (GDP), per capita GDP, gross fixed capital formation (investments) and employment. Per capita GDP is estimated using the revised population in the middle of the year based on 2011 census data per region. Data are also provided on regional level for Households Accounts.

Legal basis: Regional accounts are compiled in accordance with the European System of Accounts - [ESA 2010](#) of the Council Regulation (EU) No 549/2013 of the European Parliament and of the Council of 21 May 2013.

Reference period: The calendar year.

Geographical coverage: The total of Greece with breakdown into region and prefecture level.

Map of the 13 Regions(NUTS II) of Greece

- Unit of measure:** The variables concerning values are expressed in million of euro, apart from the per capita values which are expressed in euro. All the employment variables are counting number of persons.
- Revision:** The data of regional accounts are revised following the revisions of annual national accounts data. Additionally, they are revised when the primary data used for their compilation is revised.
- Statistical classification:** The classification NACE Rev2 is applied for the breakdown of economic activities. Data are published at the level of 10 industries (A10).
All industries of economic activity are covered.
For the classification per territorial unit (geographical breakdown) the nomenclature NUTS is applied and specifically levels 0: total of the country, 1: greater geographical area, 2: region, 3: prefecture.
- Publication of data:** Regional accounts data are published in January of each year (t) referring to the data of the year t-2.
- References:** More information on the methodology concerning the compilation and calculation of Regional accounts is available on the ELSTAT website:
