

## PRESS RELEASE

### IMPORT PRICE INDEX IN INDUSTRY: February 2020, y-o-y decrease of 1.3%

The Overall Import Price Index (MPI) in Industry with base year 2015=100.0 in February 2020 recorded a decrease of 1.3% compared with February 2019. The corresponding index in February 2019 had recorded an increase of 2.9% compared with February 2018 (Table 1.I).

The Overall Index in February 2020 recorded a decrease of 4.7% compared with January 2020. The corresponding index in February 2019 had recorded an increase of 2.1% compared with January 2019 (Table 1.II).

The twelve-month average Overall Index from March 2019 to February 2020, increased by 3.2% in comparison with the corresponding index of the period from March 2018 to February 2019, while the increase recorded between the previous twelve-month periods amounted to 6.2% (Table 4).

The time series of MPI are available on the website of ELSTAT, at:

<http://www.statistics.gr/en/statistics/-/publication/DKT18/>

## 1. Annual rates of change: February 2020 compared with February 2019

The decrease of 1.3% in the Overall Import Price Index in Industry in February 2020 compared with February 2019 is on account of the yearly changes of the sub-indices of the markets as follows:

- a. 4.2% decrease in the MPI of the Non-Eurozone Market (Table 3.I).
- b. 0.5% increase in the MPI of the Eurozone Market (Table 2.I).

More specifically, the aforementioned decrease was the result of the yearly changes mainly of the sub-indices in the following NACE Rev.2 divisions:

Code	Division	Rates of change (%)
06	Extraction of crude petroleum and natural gas	-10.6
24	Manufacture of basic metals	-5.0
19	Manufacture of coke and refined petroleum products	-3.3
17	Manufacture of paper-pulp, paper and paper products	-3.2
21	Manufacture of basic pharmaceutical products and pharmaceutical preparations	-2.3
26	Manufacture of computer, electronic and optical products	-1.1
20	Manufacture of chemicals and chemical products	-0.8
15	Manufacture of leather and leather products	0.9
10	Manufacture of food products	1.3
13	Manufacture of textiles	1.4
31	Manufacture of furniture	2.5

## 2. Monthly rates of change: February 2020 compared with January 2020

The decrease of 4.7% in the Overall Import Price Index in Industry in February 2020 compared with January 2020 is on account of the monthly changes of the sub-indices of the markets as follows:

- a. 0.9% decrease in the MPI of the Eurozone Market (Table 2.II).
- b. 7.0% decrease in the MPI of the Non-Eurozone Market (Table 3.II).

More specifically, the aforementioned decrease was the result of the monthly changes mainly of the sub-indices in the following NACE Rev.2 divisions:

Code	Division	Rates of change (%)
19	Manufacture of coke and refined petroleum products	-14.4
06	Extraction of crude petroleum and natural gas	-12.0
24	Manufacture of basic metals	-0.8
30	Manufacture of other transport equipment	-0.5
17	Manufacture of paper-pulp, paper and paper products	-0.2
25	Manufacture of fabricated metal products except machinery and equipment	0.1
23	Manufacture of other non-metallic mineral products	0.3
12	Manufacture of tobacco products	0.3
13	Manufacture of textiles	0.5

## METHODOLOGICAL NOTES

<b>Generally</b>	The Import Price Index (MPI) in Industry, in its current form, has been compiled since January 2005, when it replaced the Final Products Wholesale Price Index with foreign final products from abroad. The Import Price Index (MPI) in Industry was recently revised with base year 2015=100.0 and the previous time series were adjusted accordingly.
<b>Purpose of the index</b>	The purpose of the Import Price Index (MPI) in Industry is to measure the monthly rates of change of the prices of products in the sectors of mining, manufacturing and energy that are imported from abroad and are transferred, through their purchase, to resident units-enterprises irrespective of their branch of economic activity.
<b>Definitions</b>	<p>The Import Price Index is a monthly index and it is composed by the sub-indices of the import prices of the two market zones: the euro-zone and the non-euro-zone countries depending on the country of origin of imports.</p> <p>The collected values of imported products are CIF (Cost Insurance Freight) prices at the Greek border, free of all taxes and duties payable by the importing enterprises. This means that they include the product transport (freight) and insurance costs incurred by the enterprise for their importation.</p> <p>The selected price data for the compilation of the MPI are collected from units-enterprises that import the goods that have been selected at the initial stage. The prices refer mainly to the transactions between the resident enterprises that import products and the enterprises established abroad which act as exporters of products to Greece.</p>
<b>Legal framework</b>	The compilation of MPI is governed by Council Regulation (EC) 1165/1998 “concerning short-term statistics” and by the Regulation 1158/2005 (amending the above mentioned Regulation) of the European Parliament and of the Council. Furthermore, the MPI is governed by Regulation (EC) 1893/2006 of the European Parliament and of the Council, by Commission Regulation (EC) 656/2007 and the Regulation (EC) 451/2008 of the Council.
<b>Reference period</b>	Month.
<b>Base year</b>	2015=100.0.
<b>Revision</b>	The MPI is a fixed base index. The index was revised with the new base year 2015 = 100.0 by virtue of Council Regulation (EC) 1165/1998, according to which the short-term statistics indices are revised every five (5) years and more specifically with base years ending in 0 or 5.
<b>Statistical classifications</b>	At the level of branches of economic activities the statistical classification of economic activities NACE Rev.2 of EU is used (Regulation 1893/2006), while at the level of main industrial groupings, the allocation of two-digit and three-digit NACE Rev.2 headings to categories of aggregate classification is used, in accordance with Commission Regulation 656/2007. At product level, the statistical classification CPA 2008 of EU is used, according to the Council Regulation 451/2008.
<b>Geographical coverage</b>	The index covers the whole of the country, with data from Attiki and other 31 Regional Units of the country.
<b>Coverage of economic activities</b>	The index covers the sections of mining-quarrying, manufacturing, electricity and natural gas, the main industrial groups, and all the levels of economic activities (divisions, groups, classes) and the level of imported products.
<b>Statistical survey</b>	The data are collected from approximately 880 enterprises and the total number of observations (prices) is approximately 2,540. More specifically, the following items are surveyed: 297 product codes, derived from euro-zone countries and 260 product codes that originate from non-euro-zone countries.
<b>Publication of data</b>	The MPI with the new base year 2015=100.0 is released since July 2019, with May 2019 as the first reference month. Data with base year 2015=100.0 are available from 2000 onwards.
<b>References</b>	<p>More information on the methodology concerning the compilation and calculation of the index, as well as the time series is available on the website of ELSTAT at the following link:</p> <p><a href="http://www.statistics.gr/en/statistics/-/publication/DKT18/">http://www.statistics.gr/en/statistics/-/publication/DKT18/</a></p>
