METHODOLOGICAL NOTES

Generally	The Industrial Turnover Index is an indicator of an enterprise's business cycle showing the monthly evolution of the market of goods and services in industry. The first compilation of the Turnover Index was completed by the Hellenic Statistical Authority in 2006, with base year 2000=100.0 and is compiled from 2000 onwards.
Purpose of the index	The purpose of this index is to measure the monthly activity of the industrial sector in terms of value. Turnover comprises the totals invoiced by the observation units during the reference period and corresponds to the market sales of goods or services supplied to third parties. The purposes and the characteristics of the Turnover Index apply, as well, to the indices for the distinction between domestic and non-domestic turnover.
Legal Framework	The compilation and publication of the Turnover Index is based on the framework of the implementation of Council Regulation (EC) No 1165/1998 concerning short-term statistics (STS-R), as well as Regulation (EC) No 1158/2005 of the European Parliament and of the Council amending Council Regulation (EC) No 1165/1998. Furthermore, this index is governed by Regulation (EC) No 1893/2006 of the European Parliament and of the Council, by Commission Regulation (EC) No 656/2007 and by Regulation (EC) No 451/2008 of the Council.
Reference period	Month.
Base year	2015=100.0.
Revision	The latest revision of the Turnover Index in Industry (base year 2015=100.0) took place in the framework of Council Regulation (EC) No 1165/1998 concerning short-term statistics. In accordance with this regulation the index is revised every five years, in years ending in 0 or 5.
Statistical classifications	At the level of classes of economic activities, the statistical classification of economic activities NACE Rev. 2 of EU was used (Regulation No 1893/2006), while at the level of main industrial groupings, the allocation of two-digit and three-digit NACE Rev. 2 headings to categories of aggregate classification was used, in accordance with Commission Regulation No 656/2007.
Geographical coverage	The index covers the whole Country.
Coverage of economic activities	The Turnover Index in Industry is compiled for all activities listed in Sections B (mining and quarrying) and C (manufacturing) of the NACE Rev. 2 statistical classification.
Computation of the Index	The Turnover Index in Industry is a fixed base index. This index is calculated at a first stage at the four-digit level of economic activity and subsequently, with the implementation of appropriate weighting coefficients, the index is calculated at higher levels (three-level and two-level of economic activity) as well as at the level of Main Industrial Groupings (MIGs).
Data collection, processing and imputation in the context of the COVID-19 pandemic	The compilation of the indices was mainly based on data collected by the enterprises (via web-based application, email), as well as data from administrative sources. For September 2020 there was no significant change in the data collection compared to previous reference months.
Publication of data	The Turnover Index in Industry (2015=100.0) is released since August 2019 with June 2019 as first reference month. Data with base year 2015=100.0 are available from January 2000 onwards.
