## HELLENIC STATISTICAL AUTHORITY

Piraeus, 23 April 2020

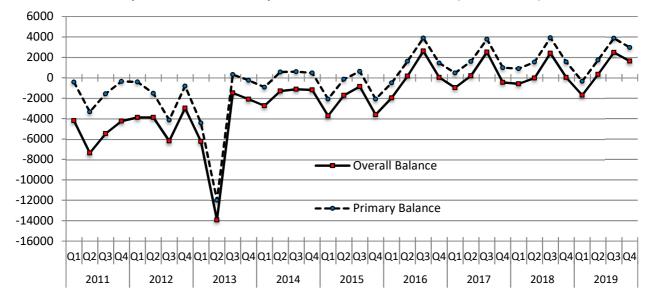

# **PRESS RELEASE** Quarterly Non-Financial Accounts of General Government

4th Quarter 2019

The Hellenic Statistical Authority (ELSTAT) with the present press release announces the quarterly non-financial accounts of General Government for the fourth quarter of 2019 (Table 1 & Table 2) as well as data on General Government debt at the end of that period (Table 3). These data have been produced on the basis of the Regulation ESA 2010 (549/2013) for the System of National Accounts, which became obligatory as of 01.09.2014.

Since the first quarter of 2009, the quarterly non-financial accounts of General Government have been compiled by ELSTAT based mainly on direct data sources. The data are compiled in full consistency with the European System of Accounts - ESA2010. It should be noted that the methods used to compile data on a quarterly basis are consistent with the methods used to compile the annual data.

The quarterly non-financial accounts of General Government provide information on the aggregates constituting General Government revenue (taxes, social contributions, capital transfers, etc) and expenditure (compensation of employees, intermediate consumption, social benefits, interest payments, etc).

Graph 2: Total Revenues and Expenditure of General Government (in million EUR)

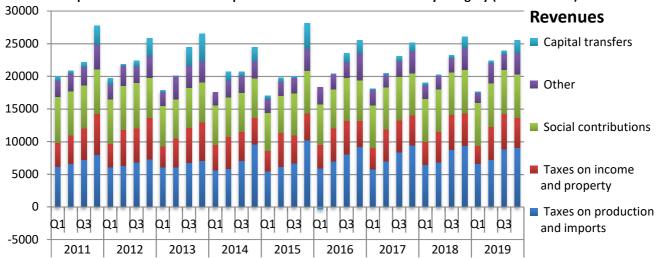

<sup>&</sup>lt;sup>1</sup> General Government primary balance is defined here as ESA 2010 General Government balance minus interest expenditure of General Government entities to other sectors. It differs from the definition of primary balance used under the Economic Adjustment Program for Greece.

<sup>&</sup>lt;sup>2</sup> Sign is negative when expenditures of the support exceed revenues. When the impact of the support to financial institutions is positive for the General Government balance, this is due to the fees accruing on the inter-bank lending guarantees and the bond loan scheme, and the revenues from bank preference shares being greater than the expenditures accrued.

Graph 3: Total Revenues and Expenditure of General Government by category (in million EUR)

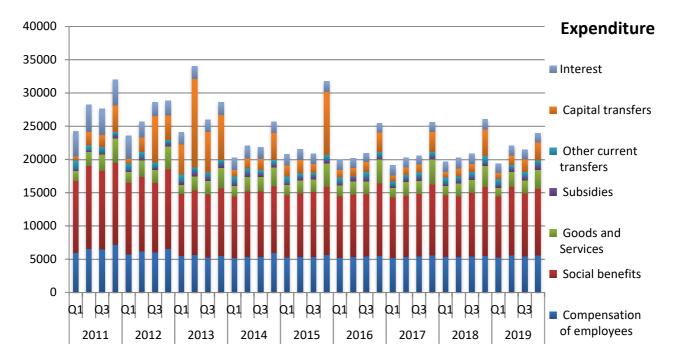

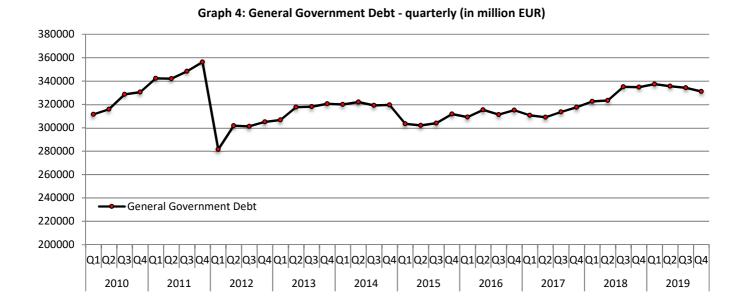

Table 3 below presents the evolution of the consolidated General Government Debt. The analysis of Debt in the categories currency and deposits, securities other than shares and loans, short-term and long-term, is according to the European System of Accounts (ESA2010). It should be noted that the information on debt is presented as the stock of debt at the end of each reference period.

#### Note:

### Measure of the primary balance under the Economic Adjustment Program for Greece

A measure of the primary balance as defined under the Economic Adjustment Program for Greece is not calculated by ELSTAT and is not shown in this statistical Press Release. The calculation of the primary balance as per the Economic Adjustment Program calls for a statistical treatment of certain expenditure and revenue items (such as revenue from privatisation of assets, transactions relating to bank recapitalisation, and revenues from transfers related to the income of euro-area national central banks from their investment portfolio holdings of Greek Government securities) that deviates from the typical ESA2010-compliant practice followed in the compilation of the quarterly fiscal figures that are presented in this statistical Press Release.
