EXPLANATORY NOTES

SURVEY ON ROAD FREIGHT TRANSPORT	The survey on road freight transport is a quarterly survey, which has been conducted in all EU Member States since 1999, by virtue of Council Regulation (EC) No 1172/98. The purpose of the survey is to monitor the road transport of goods carried out by road transport vehicles registered in each Member State, as well as the journeys made by these vehicles. The survey does not cover a) road vehicles for the transport of goods, the permissible weight or the permissible dimensions of which exceed the limits normally accepted in the MS concerned and b) agricultural vehicles, military vehicles and vehicles belonging to central or local public administrations, with the exception of road vehicles for the transport of goods belonging to public undertakings, and in particular railways. Each Member State may exclude from the scope of the survey goods transport vehicles whose load capacity or maximum permissible weight is below a certain limit (for Greece it is 3.5 tons of load capacity).
LEGAL FRAMEWORK	The survey is governed by Regulation (EU) No 70/2012 of the European Parliament and of the Council on statistical returns in respect of the carriage of goods by road. This Regulation is a recast edition of the Regulation (EC) 1172/98, which has been substantially amended several times.
REFERENCE PERIOD	The revised data refers to the 3rd Quarter 2019.
SURVEY METHODOLOGY	The survey is conducted on a quarterly basis. The sample is equally distributed into the thirteen weeks of a quarter. Every vehicle is surveyed during a specific week of the year, from Monday to Sunday. The sample is selected on the basis of various criteria: the vehicle performing national or international road freight transport; the vehicle being for private or for public use; category of load capacity; type of chassis; registered office of the vehicle, etc. The questionnaires are processed, and the data are produced in line with rules and guidelines laid down in the relevant Manual of Eurostat.
